GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

11th February 1879, No. 90 I.

Irrigation.

Read the following papers:—

No. 34. Endorsement of the Acting Chief Engineer for Irrigation, dated Fort St. George, 4th February 1879, No. 29 I.

From the Acting Superintending Engineer, First Circle, to the Chief Engineer for Irrigation, dated Dowlaishvaram, 27th January 1879, No. 266 G.D.

In continuation of this office letter No. 2,673, dated 15th November 1878, printed in G.O., No. 994 I., of the 5th December 1878, I have the honor to forward herewith copy of a detailed report (No. 175 of 29th December 1878) received from the Supervisor in charge of the late Rajahmundry Division, together with copies of the three lists of tanks which accompanied it relative to the damages done by the cyclone of the 5th November and 6th December 1878.

From P. W. SOOBIAH, Supervisor in charge of Rajahmundry Division, to the Superintending Engineer, First Circle, dated Samulcottah, 29th December 1878, No. 175.

Referring to your docket No. 2,633, dated the 15th ultimo, and in continuation of my letter, No. C-41, dated 8th ultimo, I most respectfully beg to bring to your notice that the extraordinary rains of the 5th November and 6th December have damaged the following works:—

1. ROAD FROM PEDDAPURAM TO JAGGAMPET.—This road has been breached in several places in the 1st, 2nd, and 3rd miles, and the tunnel in the 3rd mile is much damaged and the traffic is now passing on with great difficulty. The rest of the road is in fair condition.

2. ROAD FROM PEDDAPURAM TO RAJAHNAGARAM.—This road has been breached in 14th, 15th, and 16th miles, and the gravel washed away in several places. The tunnel in the 18th mile was smashed into pieces. All the small breaches have been filled up, so that there would be no difficulty for wheel traffic and travellers.

3. ROAD FROM BALAHNADRAPURAM TO KORCONDA.—Breaches have occurred to this road in the 6th and 7th miles, and the gravel washed away in several places along the road. The wheel traffic cannot pass at all near Dontamur unless the deep breaches formed in the tank bund are closed.

4. TRUNK ROAD WITHIN THE LIMITS OF THE CIRCLE.—Several breaches have occurred between Rajahnagaram and Tuni, and the gravel washed off in almost every mile. But arrangements have been made to keep the road in proper order for the convenience of the 29th Regiment which passed through the trunk road.

5. ROAD FROM KOTTAPILLE TO JAGGAMPET.—The first twelve miles of this road are in perfect order. Breaches have occurred in 12th and 13th miles. The breach in the 13th mile is of immense size, which should be particularly attended to. The extraordinary freshes that came down through Kottapille river washed away its banks up the Puttamamididoddy anicut and took its course across the Kottapille road leaving very little to pass down the Puttamamididoddy anicut. The course thus formed crossed the Kottapille road about 100 yards west of Puttamamididoddy anicut, where a small tunnel was swept off and the road was considerably damaged.

6. ROAD FROM KOTTAPILLE TO GOKARUM.—This road has been breached in three places in the 1st mile near the village Gokarum. The first of them is due to the insufficient waterway provided for the tunnel; and these breaches were filled in.

7. ROAD FROM RAJAHMUNDY TO GOKARUM.—This road has most seriously been damaged of all the rest in this division. Large breaches have occurred in the 11th, 12th, 13th, 14th, 15th, 16th, and 19th miles, and the gravel washed off. Two tunnels, one in 12th and the other in the 18th

mills, were damaged. The wheel traffic further up of the 11th mile is stopped. It would be very impracticable for the wheel traffic unless the deep breaches are filled up and the ordinary ones be stopped, which could be done if the unspent portion of the maintenance grant be allowed to this road.

8. **EMBANKMENT ROAD FROM RAJAHMUNDRY TO PURUSHOTTAPATNAM.**—No breaches have occurred to this road except the destruction of the tunnel across the Thorrigedda drain which was already reported in this office letter No. 153, dated 19th November last. The self-acting shutters of the sluice in question have been carried away by floods. Plan and estimate for constructing a new tunnel are under preparation and will shortly be sent in for sanction. The cut-waters of the tunnel across Jella Calva facing the river have blown down, and all the shutters have been carried away by the freshes; an estimate for the same is also under preparation and will be sent in shortly.

9. **TANKS.**—I also beg to state that not less than 205 tanks have been damaged in the taluks as per margin owing to the cyclone of the 5th November and 6th December 1878. I have selected most of the important tanks and prepared estimates, for which, if early attention be not paid by the department in allotting funds, there will be immense loss both for Government and the ryots. Though the estimates for the most important tanks are nearly prepared, and some were countersigned by the Collector, I have deferred sending them up for your sanction and appropriation of funds owing to the low state of finances under "Irrigation" this year. I have, however, resolved to send in all the emergent estimates within a fortnight, fully expecting that you will be pleased to write to Government, as a special case, for an early allotment of funds, so that all the tanks may be put in order before the next rainy season sets in. I beg to bring to your most favorable notice the importance and state of certain tanks in this division, namely:

121 Pottapuram Taluk.
122 Rajahmundry Taluk.
123 Pottapuram Taluk.

10. **TIMMARAZU TANK AT LINGAMPARRU.**—This tank is one of the most important ones in this division, under which an extent of 2,000 acres is irrigated, yielding a sist of Rupees 12,201 a year. I have already reported in my letter No. 134, dated 23rd October last, stating that a large breach about 300 feet in length and 30 feet in depth has occurred to the bund of the Kokirigedda channel which supplies water to this tank. I have, in consultation with the Collector, framed an estimate for closing the same before the next rainy season commences. The western bund of the tank which lies on the Yelaiswaram side is much washed away by the waves and requires much strengthening. As the tank is brimful it is not possible now to frame an estimate until its contents subside. If the strengthening of the bund is not completed before the next rainy season sets in, the whole tank will be damaged.

11. **KONATIVARI TANK AT GUMMALADODDY.**—This tank is the second in this division, irrigating an extent of 112 acres, yielding a sist of Rupees 2,200. Two breaches of immense size have occurred by the cyclone and the masonry sluice swept off, leaving the tank almost empty. The bund of the tank is also much weakened.

12. **VENKIAH TANK AT NANDARADA.**—This is also one of the most important tanks in the division, under which an extent of 549 acres is irrigated yielding a sist of Rupees 1,343. More than twenty breaches have occurred to this tank, and the bund was considerably destroyed. The two old masonry sluices for which repair estimates have been sanctioned this year were entirely swept off. I have designed fresh ones instead amounting to Rupees 950, and submitted for sanction an appropriation of funds with this office letter No. 174, dated 28th instant. Unless the Government be pleased to allot sufficient funds to bring the tank into proper condition, much loss will be entertained by the ryots as well as by Government.

13. **KUNTA IVANNAH TANK AT BOORUGUPUDY.**—No less than six breaches have occurred to this tank, and the embankment, which also forms portion of the Gokarum road, was seriously damaged by the deep breaches of immense size. The tank is also one of the important ones irrigating an extent of 417 acres with an assessment of Rupees 1,118. An estimate for closing the breaches of this tank is submitted for sanction and appropriation of funds with this office letter No. 173, dated 19th December 1878.

14. **NALLA TANK AT RUNGAMPETA.**—The masonry sluices of this tank were entirely destroyed and the bund weakened; several breaches have also occurred leaving the tank almost empty.

15. **KODURIVARY TANK AT KOFARUM.**—The wing wall of the culingulah of this tank was broken down; the bund of the tank requires strengthening; breaches have occurred.

16. It would be superfluous to dwell on the condition of each tank in detail. I beg, therefore, to conclude that every tank in this division has received damage little or more. I beg therefore to request the favor of your addressing the Government for an additional allotment under "Irrigation," so that all these repairs may be completed before the rainy season sets in.

* Rupees 15,000.

17. **AVENUES.**—The cyclonic gales of the 5th November and that of the 6th December have eradicated no less than 300 large trees on the Great Northern Trunk road from Rajahnagaram to Tuni. Several flourishing young trees have also been destroyed with their fences on the other roads in this division.

No provision has been allowed under "maintenance of avenues" for expenditure in the remaining portion of the current official year in the statement accompanying your docket No. 27 G.D. of 15th instant. Unless the whole unexpended portion of the maintenance be allowed, it would be impossible to keep up the avenues in a satisfactory condition.

18. Under these circumstances I beg to request the favor of your kindly moving the Government to place additional funds* at our disposal under "Irrigation," and to grant at least the whole unspent balances of maintenance grants allowed for the roads in this division for expenditure during the remaining portion of the current official year, by which both the tanks and roads be kept up in a satisfactory way without loss to Government or inconvenience to the public.

List of Tanks reported to have been breached owing to the Cyclone on the 5th November 1878 in the Rajahmundry Taluk, Godavari District, Rajahmundry Division.

(Signed) B. H. YOUNG,
Asst. to Supg. Engr., First Circle,
for Ag. Supg. Engineer.

SUBMITTED for the information of Government.

2. In the budget for the last three months of the year lately sanctioned, a sum of Rupees 4,550 has been provided for the repair of irrigation works in the Rajahmundry Division, and it is hoped that it will be possible shortly to make a further grant from the reserve at the disposal of the Chief Engineer for Irrigation.

(Signed) J. O. HASTED, Lt.-Col., R.E.,
Ag. Chief Engineer for Irrigation.

To the Joint Secretary to Government, Public Works Department, Irrigation Branch.

No. 35.

ORDER THEREON, 11th February 1879, No. 90 I.

ORDERED to be recorded.
