GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

6th January 1879, No. 12.

Read the following papers :—

No. 25. Proceedings of the Board of Revenue, dated 4th December 1878, No. 3,241.

Read the following letter from H. W. BLISS, Esq., Commissioner of Salt Revenue, to C. A. GALTON, Esq., Acting Secretary to the Board of Revenue, dated Madras, 7th November 1878, No. 1,591 :—

REFERRING to G.O., dated 12th September 1878, No. 1,488, Revenue Department, I have the honor to state, for the information of the Board and Government, that, with the exception of one beam scale fitted for salt weighing by the substitution of a pan for one of the ordinary wooden scales (sanctioned by the Board, *vide* their Proceedings, No. 900, dated 2nd April 1878), the only experiment I have as yet made is the fitting of an adjusting apparatus devised by myself to the cup and Grainger's pan scales already in use as mentioned in my letter recorded in the Government Order above quoted. This has been done in consultation with Mr. Faulkner, the General Superintendent of the Public Works Stores and Workshops, and I know, I may safely say, that he considers it a complete success.

2. The cost of this adjustment is—

	Rs.	A.	P.
For a Grainger's pan machine	10	12	0
„ a two-maund cup scale }	9	0	0
„ a one „ „ }			

and I propose to have it fitted as soon as I can to every serviceable machine of the above descriptions now in the possession of the department, as I am convinced of its great utility.

3. I request therefore that if Government think it necessary, they will instruct such competent officer as they think fit to inspect and report on the matter. Machines fitted with the adjustment are in daily use in the Madras Salt Cotaurs where I shall be happy to show them to the members of the Board or to any officer who may be deputed to inspect them.

SUBMITTED to Government with reference to the order quoted.

2. The Superintendent, Department Public Works Workshops, will be requested to report upon the adjusting apparatus referred to.

(A true Copy and Extract.)

(Signed) C. A. GALTON,
Acting Secretary.

No. 26. From G. H. FAULKNER, Esq., Executive Engineer in charge of Presidency Public Works Workshops, to the Secretary to Government, Revenue Department, dated Madras, 14th December 1878, No. 3,664.

With reference to Board's Proceedings, dated 4th December 1878, No. 3,241, and order of Government, I have the honor to state that the Salt Commissioner has had some of the Salt weighing cup and Grainger's machine fitted with his adjustment.

2. There can be no doubt it is a very useful and great improvement to both kinds of weighing machines indeed; without this adjustment they are very imperfect.

3. I certainly recommend all the old machines to be fitted with it and the new ones, with the modification which, of course, is the same in principle but not so expensive as it will add little to the first cost.

No. 27. ORDER THEREON, 6th January 1879, No. 12.

Separate Revenue, No. 1.
Salt.

RECORDED. The report of the General Superintendent, Public Works Workshops, on the adjusting apparatus is highly satisfactory and appears conclusive.

(True Extract.)

(Signed) H. S. THOMAS,
Acting Secretary to Government.

Madras, 14 December 1878

No. 3664

From

THE GENERAL SUPERINTENDENT,
PUBLIC WORKS WORKSHOPS,

To

THE Secretary to Government
Revenue Department

Sir,

With reference to Boards Proceedings dt 12 Dec 1878 No 3241 and Order of Government I have the honor to state that the Salt Commissioner has had some of the Salt weighing Cots and Granyus Machines fitted with the adjustment.

2 There can be no doubt it is a very useful and great improvement to both Kinds of weighing Machines indeed, without this adjustment they are very unsurfied.

3 I certainly recommend all the old Machines fitted with it and the new ones with the Modification which of course is the same as provided but not so expensive as it will add little to the first Cost

I have the honor to be
Sir
Your most obedient Servant
G. M. Hazlewood Lt Colonel
In Chief Pay Mr Madras
