To
The Director General
of Telegraphs.

Sir

I have the honor to request that you will be pleased to move the Government of India to cause the Canal between Vellar & Coleroon near Chidambaram to be deepened to 6 feet throughout, as the present depth of 4 feet only renders the navigation of the Canal very difficult & tedious, especially during the dry season when the water is low.

I have the honor to be
Sir
Your most obedient servant

Telegram from D.S. of Melbe. Lalor, Chiefly & Sec. expressing, attachment & esteem borne towards Sir Hy

Chf.

161
9/6

The Land Revenue collections for the Financial year 1876-77 were £ 329,65,000.

While the Land Revenue collections for the Financial Year 1877-78 were £ 349,50,000.

2. Comparing these with the sanctioned estimate for 1876-77 (which was taken by Sir J Strachey as the proper receipts under this head any thing less than which was loss) viz £ 449,50,000 —

The loss of Land Revenue for the Financial year 1876-77 was ——— £ 119,85,000

And the loss of Land Revenue for the Financial year 1877-78 was ——— £ 101,00,000

The total loss of Land Revenue for the two Financial Years was, therefore £ 219,85,000

3. I do not understand how the loss of £ 261,00,000 to

has been arrived at by the Government of India;- possibly calculations on the "Fusli" have imported some confusion into the matter.

4. As regards the present Financial year 1878-79, the collections of Land Revenue for the first four months ending July, have been 169 lakhs being one lakh above the average collections of the first four months of the three years 1873-74, 1874-75 and 1875-76, and being 15½ lakhs above the collections of the first four months of 1876-77, and 68 lakhs above the collections of the first four months of 1877-78.

5. In May last, the total arrears of Land Revenue amounted to 169 lakhs for the Fusli.

6. The collections of Land Revenue of the first four

four months of the current Financial year having been one lakh above a good average, and a very favourable change in the season having taken place, at the end of July, I should hope that the collections (including arrears) for the half year ending 30th September, will be considerably above the average. Probably less land than usual is under cultivation, but the arrears are so heavy that their collection, even though made with the greatest caution, should more than counter balance any decrease in current revenue.

If the North East monsoon be favourable, I should hope that the total collections for the financial year (including arrears) will very considerably exceed the average.

7. The accompanying

Statement

Statement A contrasts the receipts from all sources during the first four months of the current Financial Year with the receipts during the corresponding period of the years 1873-74, 1874-75, 1875-76, 1876-77 and 1877-78; and it will be seen that the receipts during the first four months of the current year have been half a lakh above a good average, and have exceeded the receipts of the first four months of 1876-77 by 16 lakhs, and those of the first four months of 1877-78 by no less than 77 lakhs, and I should hope that, if the season continues favourable, the total receipts of the current Financial year will very considerably exceed a good average.

8. As regards the question of

of the cost of relief measures during the present year, an estimate was made last March that, if there were a normal S.W. monsoon, the cost of the famine during the current financial year would not exceed Rs 50,00,000, over and above the ordinary Budget Grant.

9. The numbers on relief then estimated for, and the actual numbers to the end of August, with present estimate of numbers to the end of October, compare as shown in Statement B, which contrasts also the March forecast with the expenditure upon the actual numbers according to the estimated rate (Rs 3 per head per mensem) and with the expenditure upon the actual numbers according to what appears to have been the real rate, i.e., Rs 3 " 4 " 0 per head per mensem.

It will be noticed that in column 6 of this statement the famine expenditure is set down at £44,29,000, whereas, according to paras 19 & 20 it would be about 48½ lakhs. The so-called famine expenditure of paras 19 & 20 depends, however, to a great extent, upon the state of the Examiner's books, i.e, upon the greater or less rapidity with which charges are adjusted from "famine" against the ordinary head, and practically the only way of satisfactorily viewing the question is to contrast the total famine expenditure, which must be incurred plus

the

10 St

10. It will be seen that, had the expenditure been Rs 3 per head per mensem, the saving would have amounted to Rs 8,88,000.

11. The expenditure per head per mensem will, however be about Rs 3-4-0 and the saving at this rate will be Rs 5,71,000 or say 5½ lakhs as estimated in para: 17.

12. The causes of the cost per head per month having been Rs 3-4-0, instead of Rs 3-0-0 are,—

(1) the dearness of grain noticed in para 13;

(2) the cost of the additional Establishment, obtained from the Government of India, when the lateness of the monsoon seemed to threaten another famine;

(3) the fact that the cost of Establishment has to be distributed among a smaller number than was estimated for;

the expenditure under the ordinary Budget Heads, which must take place in the famine districts on emergent works, with the ordinary Budget Grant plus the Famine Estimate.

In other words, the probable expenditure of 82 lakhs (viz 44½ extraordinary plus 37½ ordinary—see paras 23 and 26) during the Financial year should be contrasted with the estimate of 87½ lakhs (37½ lakhs ordinary Budget Grants plus 50 lakhs March Forecast) and the difference, viz 5½ lakhs, is the saving.

for, owing to the numbers on relief having been less than in the Forecast;

(4) the fact that owing to the lateness of the monsoon, these Establishments will have to be entertained through October, instead of being dispensed with in September.

13. The showers in April and May, by affording agricultural employment, prevented the sharp rise in minimum, which, it was feared, would take place during those two months, while, on the other hand, instead of relief measures being brought to a close in September, the lateness of the monsoon will necessitate their continuance, at least, until the end of October. — Owing to the same cause and perhaps, to other influences, prices, instead of gradually falling from the month of June, rose throughout June, July,

July and August, and it is only in the second week of September that they have fallen to the level that obtained at the time of the March Forecast.

14. The annexed Statement C shows, for the nine districts in question, the normal prices of Cholum and 2d sort rice, the prices obtaining at the time of the March Forecast and the course of prices since.

15. The general effects of the favourable, though somewhat abnormal, monsoon on the March Forecast have been,

(1) the prolongation of the period, during which it is necessary to continue relief measures, while, at the same time, the maximum pressure has been less than was anticipated;

(2) a slight increase of the cost of relief, per head due

due to the causes noted in para 12. 16/17

16 Shortly stated, the estimate was that, over and above the ordinary Budget Grants, the cost of relieving 1,560,000 persons would be Rs 46,80,000 plus Rupees 3,20,000 for unforeseen charges and, other things being equal, it would follow that the cost of relieving 1,264,000 would be about Rs 37,92,000 plus Rs 3,20,000 for unforeseen charges; or, in other words, that a saving of about 9 lakhs on the March Forecast would be effected.

See March Forecast page 25

See Statement B.

17. I anticipate, however, that owing to the causes already noticed, the saving on the March Estimate will not exceed 5½ lakhs.

18. The ordinary Budget allotment, in the nine famine districts, and in the Presidency Town, amounted to 3½ lakhs, which added to the additional

30 lakhs estimated for, make a total of 87½ lakhs.

19. Up to the end of July, the famine expenditure of all kinds, including Establishments, has amounted to about 31½ lakhs, while the expenditure against the ordinary D.P.W. Budget Grants in the 9 Districts in question, and in Madras, has amounted to 8¼ lakhs, or, in all, up to the end of July, the expenditure against the 8½ lakhs has been 39¾ lakhs, or say 40 lakhs.

The figures are taken from information furnished by the Accountant General and the Examiner D.P.W. Accounts.

20. During August, September and October, I estimate that the famine expenditure of all kinds will amount to about 17 lakhs and the expenditure against the Budget Grants in question to about 6 lakhs; or, in all, the expenditure during these 3 months will be about 23 lakhs.

21. At

21. At the end of October, then (when it is hoped that general famine relief measures will cease) the position will be that an expenditure of about 49 lakhs will be shown against famine, and an expenditure of about 14 lakhs will be shown against the ordinary D.P.W. Budget Grants.

22. It is, however, in the Districts in question, that distinction between Budgetted and Unbudgetted works has, for the most part, been abolished; and as the ordinary Budget Grants will have to be absorbed before an additional allotment is made, it will be sufficient to say that, at the end of October, the total expenditure will amount to 63 lakhs.

23. Deducting from this sum, the ordinary D.P.W.

allotment.

allotments on the Districts in question, viz 37½ lakhs. The total extraordinary expenditure to the end of October will amount to 25½ lakhs.

24 It will, however, be necessary to allot about 8 lakhs for special relief works, (see margin) of a useful character, to be carried on until the end of March, and it may also be necessary to give about a lakh for gratuitous relief during the same period. Moreover, an allotment of about 10 lakhs will have to be distributed among the Districts in question, under the different D.P.W. Budget Heads, to prevent the stoppage of Emergent work and repairs.

Bellary. Hubli Railway say	2½ lakhs
Coast Canals — "	2½ —
Vanniar Tank — "	1 —
Other works — "	2 —
Total.	8 —

25. The total expenditure therefore, between the end of October and the end of March will amount to about 19 lakhs.

26 Adding

26. Adding this to the total extraordinary expenditure estimated to be incurred up to the end of October (viz 25½ lakhs) the grand total of the Extraordinary expenditure will be 44½ lakhs or 3½ lakhs less than the sum estimated for in the Imperial Forecast.

27. I anticipate, then, (assuming a favourable N.E. monsoon) that the total Gross of Revenue of all kinds will considerably exceed the average and that there will be a surplus on the March Forecast of about 5½ lakhs.

28. In the above, I have not included the cost of famine Relief on the one hand, and famine recoveries on account of the sale of grain, weavers cloths &c &c on the other, but I should estimate the net gain to Government

these accounts at about 10 lakhs.

29. Looking at the whole financial question, I think it possible that the excess of receipts over the average plus the famine recoveries may balance the extraordinary expenditure.

2/9.

Atta

A

Statement A contrasting the receipts of the first four months of the current Financial year with the receipts during the corresponding period of the Financial years 1873-74, 1874-75, 1875-76, 1876-77, 1877-78.

There is little doubt
that now within 4 or 5 weeks
general delivery Measures
will cease —

That Steam will shortly
supersede a vast deal of
employment for many
of the Poorly clad in
different districts which
if not provided for will
entail dangerous suffering
And Steam will be some
time distributed generally
Also Rain Ent all Rivers
and too much for Ireland

Who may need some
aid & enable Steps
& suggest Measures until
Juries enable ordinary
Charity & Resources to
full scope —

There will also be many
works incomplete. some
of them of much
importance —

It will be submitted to
Gov. & S. Whether
of these works a
few should be selected
and carried on — &
afford employ to all who
cannot otherwise obtain

employment — and
Devise the steps requisite
which must accompany
such works being left
incomplete & some compensation
therefor

The works suggested — are
the completion of the Canal
Canal communication
from the Victoria Southern
& Nuncamum via the Vorden
Muzzlepat & S. Arcot
which requires the completion
of locks & constructing
K. at the Junction between
the Canal & the
K. Delta System & the
Coast Canal — which is
Company & allow Boats to
pass through. This work
is partly done — a few locks

at the Salaam of the
~~from~~ Junction of Cornwall
Canal with the Corwa
& Smalle boats ~~from~~ to
Jaspfum the Port to
the South Canal — . R. ...

and the complete Excavation of the
Canal (Jpartly cut) from
the Sadar Dam to the
Mercantile Landing
Salt works — R —

2d The Public Landing
Salt works Storage &
Magazines Tenuty —

3d The completion of
the 3 Magistrates
of Damien
Bacon
Imamshahy in Salem.

The Adjt Lee. should
prepare draft letter to Genl
with his view setting out
the matter & call upon
in each -
and pointing to the
Probable saving on the
Batch proceeds with
that Item passed away
if sanctioned -

By 9/10

for Mr Wood

To the Hon.ble Court of
Directors of the Hon.ble
United East India Company

Sir - I am directed by
the Right Honble the Lords
Commissioners for the Affairs
of India in Council, to state
to you for the information
of the Court of Directors,
the opinion of
the Board upon the several
Questions contained in the Letter
from the Court of Directors
to the Governor General in
Council, dated the 4th of
May 1796, relative to the
Establishment of a Native
Regiment of Cavalry, to be
raised in the Province of
Bahar, and to request
that you will be pleased
to lay before the Court
of Directors, the following
Observations, which have
occurred to this Board,
upon the Subject of the
Proposition contained in
the Letter from the Court
of Directors, dated the
4th of May 1796.

The Court of Directors
have stated, that they
are induced to adopt
the Proposition for raising
a Native Regiment of
Cavalry, to be stationed
in the Province of Bahar,
from the Consideration
of the Difficulty of
procuring Forage for
Horses in the Upper
Provinces, during the
Rainy Season, and from
the Expence attending
the Conveyance of Forage
from the Lower Provinces
to the Upper Provinces,
during the Rainy Season.
The Court of Directors
have also stated, that
they are induced to
adopt the Proposition
for raising a Native
Regiment of Cavalry,
to be stationed in the
Province of Bahar,
from the Consideration
of the Difficulty of
procuring Forage for
Horses in the Upper
Provinces, during the
Rainy Season, and from
the Expence attending
the Conveyance of Forage
from the Lower Provinces
to the Upper Provinces,
during the Rainy Season.

until prices shall
sufficiently to admit
of private charity
resuming its ordinary
course.

2. And it is hereby
further declared that
any person who shall
by any fraudulent
device or contrivance
which shall not be
fully completed,
and shall directly
admit or be summoned
before the
Justices of the Peace
in Council assembled
for the purpose
of such Justices
in Council assembled
to be examined
touching the
completion of such
work, and shall
thereupon refuse to
make such answer
as shall be required
touching the
completion of such
work, shall forfeit
and pay the sum of
£ [illegible]

3. And be it further
enacted that
(1) The
(2) The
(3) The

Communications between the
Cities of Dublin & Cork
Harbours or the Coasts
of Ships upon the Coast
Canal between the
Cities of Dublin & Cork
Cities of Dublin & Cork
(1) The completion of the
Canal work of the Railway
Cork Railway through the
Cities of Dublin & Cork
(2) The completion of the
Improvement of the Cities
Cities of Dublin & Cork
(3) The completion of the
Canal work of the Railway
Cities of Dublin & Cork

(a) The Harbour of
(b) The Harbour of
(c) The Harbour of

4. Be it enacted that
Canal Canal Canal
it shall be lawful for
the Cities of Dublin &
Cork Canal Canal
Canal Canal Canal
Canal Canal Canal
Canal Canal Canal
Canal Canal Canal
Canal Canal Canal
Canal Canal Canal
Canal Canal Canal
Canal Canal Canal
Canal Canal Canal
Canal Canal Canal

from the Sea to the Mediterranean entirely by the Shannon

5. The Railway, Docks & Railway works at Dublin, above referred to, are estimated at about £ [illegible]

6. The R.C. Buildings & Endowments are estimated at about £ [illegible]

Council in Ireland to sanction additional Public Works in that part of the Empire which may be deemed necessary for the employment of the people in connection with the Relief Funds.

The total amount will be £ [illegible] or about £ [illegible].

The total expenditure from Parliament and Private Relief Funds up to the present time is estimated to amount to about £ [illegible]

The total expenditure from Parliament and Private Relief Funds up to the present time is estimated to amount to about £ [illegible]

leaving an additional balance of about £ [illegible] to be provided for. Of this sum £ [illegible] will be required for ordinary Public Works and works of Improvement during the ensuing year, & the remainder at the rate of £ [illegible] per annum for [illegible] years.

Completing the works
above detailed, or carrying
them on with the said
6 hands, if not completed
before that time, there
will be a saving of
about 6 labourers on the
additional Expenditure,
added to the increase
above the average
in collection of income
from the Customs during
the year, which it
is reasonable to consider
probable, and to
encourage by the
Chancellor of the Exchequer which
is, I understand
to have been the reason
of the grant -

I. Such being
the Statement
Report - that I
the Chancellor
shall recommend
to Parliament
a Grant of £
for the Service
of the year -

with admit-
of the works being carried
to the end of the financial
year of the
completed within it
term.
