Board's Proceedings
7th August 1878, No 2181
Recorded in G.O. 3rd
October 1878, No 1602

The Govt
desire to thoroughly
Examination of the
working of the Jungle
Conservancy Administ
-tration with a view
to satisfy themselves
that the ends for
which it was organized
are systematically bein
pursued, and being
practically attained
and that the Consid
-erable funds [illegible] ex
-pended are prudently
[illegible]

laid out.

The object is the conservancy and extension of village jungles for the benefit of the villagers. Should clear [illegible] letter in some places fuel does have been expended in erecting large fuel-stations where Casuarina can be sold from villages for the public utilized by farmers who not understood what is the nature of the villages before selected as cover [illegible] not known for affording shade and sustaining ground vegetation by [illegible] [illegible] fuel and wood for agricultural implements. Should there be [illegible] circumstances of the District allow of reboisement of denuded jungles in close proximity to all villages so to obviate [illegible] that Coupe Should

should be followed as the most economical and the most strictly in keeping with the objects of the fund. In such cases the returns required of the number of trees planted would seem to be inapplicable and misleading and proof of progress should be given in a different form.

Where circumstances will not allow of reboisement in close proximity to each village [illegible] in larger areas capable of supplying several villages generally preferable

to planting; such localities being selected as are best tapped by Canal, Rail or Road. On this principle the town of Madras is supplied by Canal. carried firewood.

When the creation of Regular plantations by the transplantation of seedlings to pits may be necessary it would seem desirable that the Tahsildars or other subordinates entrusted with the expenditure should be supplied with a few simple standing Rules for their general guidance to

to intelligent economy instead of wasteful ignorance. (8) It is a matter of no difficulty yet one in which the Government is not satisfied that money is not injudiciously spent.

The Govt. desire to know the area covered with jungle from these funds and that this jungle is calculated to answer the objects of the Fund.

The Board is requested to give its attention to these objects and devise means for their attainment

Mr Grant.

Mr Robertson
Mr Lowrie.

Sentence appears to me
unnecessary - and I think even
positively wrong. I think
there can be no doubt
that the expenditure of
this £1 a week is not out
of the intention of the Fund
which is to be a Fund
for an inquiry into the working
of the Simple Conservancy
Fund.
