GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

10th February 1882, No. 186.

READ THE FOLLOWING PAPER :—

No. 158. From the Conservator of Forests, to the Secretary to Government, Revenue Department, dated Mullapuram, 20th January 1882, No. 1092.

In forwarding copy of letter, No. 556, dated 17th instant, from the Deputy Conservator in charge of Chinchona Plantations, I have the honor, under the circumstances, to support his recommendation that the 200 bales now lying for shipment in Madras, of which I enclose Invoice received with another letter, may be put into the market, instead of being "converted into quinine and other alkaloids on account of Government," and beg that the Secretary of State may be addressed accordingly.

2. I am asking the Deputy Conservator whether he cannot supply further information as to site, age of trees, &c., as requested in paragraph 5 of the Secretary of State's despatch, recorded with G.O., No. 1927, dated 13th December 1881, the Deputy Conservator's special attention having been already called to paragraph 4 of the same Government Order.

• ENCLOSURE No. 1.

From Lieutenant-Colonel R. S. JAGO, Deputy Conservator of Forests, in charge Chinchona Department, Nilgiris, to the Conservator of Forests, Madras, dated Ootacamund, 17th January 1882, No. 556.

I FIND from paragraph 5 of the Secretary of State's despatch recorded in G.O., No. 1927, dated 13th December 1881, that it is contemplated to convert the whole of the bark of the Government Chinchona Plantations into alkaloids, instead of selling as heretofore.

2. A consignment of 200 bales of bark now lies at Madras ready for shipment to London. Among the bales are twelve of Cross's Pata De Galinazo (our Nagnafolia) and seven of Cross's "true Succirubra" (our Pubescens) besides some Calisaya and Cross's Micrantha (our Succirubra). It seems very likely that the fact of Mr. Cross's assertion as to the Red Barks on these estates will reach England before the consignment, and I think it should be interesting to know what effect Cross's assertion will have on the prices of the bark. With the doubt known and the different kinds of bark before them, the Brokers, Manufacturers, or Druggists should be able to detect the error.

3. I therefore beg to propose that the Secretary of State be requested to cause the whole 200 bales to be put into the market.

Sir,

I find from para 5 of the
Secretary of State's despatch, recorded in
G.O. No. 1927, dated 12th December 1881,
that it is contemplated to convert the whole
of the bark of the Government Chincha
Plantations into alkaloids, instead of
selling as heretofore.

2. A consignment of 200 Bales
of bark now lies at Madras ready for
shipment to London. Among the Bales
are 12 of 'Cross' Pata De Galinazo (our
magnafolia), and 7 of 'Cross' ²⁻¹⁻¹ ~~tree~~ Succirubra
(our Pubescens) besides some Calisaya and
Cross' Micrantha (our Succirubra). It seems
very likely that the fact of Mr. Cross' assertion

as to the Red Barks, on their estates will
reach England before the commencement,
and I think it should be interesting
to know what effect cross navigation will
have on the prices of the same. With the
doubt known and the different kinds of
bark before them, the 127. 1/2 s. manufacturers
or Druggists should be able to detect the
error.

3. I therefore beg to propose that the Secretary of State be requested to cause the whole 200 Bails to be put into the market.
