29TH OCTOBER 1885, No. 1197, REVENUE.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

READ—the following letter from M. A. LAWSON, Esq., Director, Government Cinchona Plantations, Gardens and Parks, Nilgiris, to the Secretary to Government, Revenue Department, dated Ootacamund, 13th October 1885, No. 67:—

It is commonly believed that the nauseating principle contained in the Darjeeling febrifuge is due to the amorphous alkaloids which have not been removed, but this, from experiments which have been recently conducted by Mr. Hooper, would seem to be erroneous.

2. I therefore send, herewith, a small quantity of the pure amorphous alkaloids which have been extracted by Mr. Hooper, and request that you will be so good as to obtain for me the opinion of the Government medical experts as to whether this view is correct.

ORDER—dated 29th October 1885, No. 1197, Revenue.

Miscellaneous.

Communicated to the Surgeon-General with the phial of amorphous alkaloids with the request that he will, after experiments, report the result of the exhibition of the drug.

(True Extract.)

(Signed) J. F. PRICE,
Ag. Secretary to Government.

To the Surgeon-General with the Government of Madras, with one phial.
