The Collector of Salem reports that it is not possible to assign separately any area to cinchona as it is grown at inter-vals amidst coffee plants.

The Collector of Malabar states that the return is not complete as some of the planters declined to furnish details for their estates, that in some cases the area alone has been given and others the number of plants only & that in such cases the omissions have been supplied by taking 1600 plants to the acre & finding out the area or the number of plants as the case may be. The species "Verde & Rabusta" have been included under mixed varieties for want of a separate head. The Collector of Nilgiris states that as reported in the previous year many of the planters have expressed their inability to furnish the required returns, while others have not sent any reply to those calls.

REVENUE BOARD OFFICE MADRAS.

Proceedings of the Board of Revenue

(Settlement, Land Records and Agriculture).

Dated 15th August ——— 1887.

No. 275

J. Grose Esq C.S. Commissioner

READ Statement from the Collector of Salem dated 13th June 1887, showing the progress made in the cultivation of cinchona in private plantations.

Reference thereon to the Collector of Salem dated 7th July 1887 calling for further information.

Read letter from the Collector of Malabar No 3709 dated 15th July 1887, forwarding revised statement showing the cultivation of cinchona.

Read letter from the Collector of Salem No 1711 dated 18th July 1887 stating that it is impossible to assign to cinchona cultivation a separate area since it is grown at intervals among coffee.

Resolution

With reference to para 3 of G. O. dated

dated 5th May 1887 No 2544, the Board beg to submit a statement showing the statistics of Cinchona cultivation in the districts of Salem Malabar and Nilgiris for the year 1886-87. Similar information for the Madura District will be submitted when the Collector's reply is received.

2. The necessary alterations have been made in the statistical table No 4, with reference to the revised figures now furnished by the Collector of Nilgiris for the year 1885-86 as directed in para 2 of the letter from the Government of India read in the G O quoted above. He has been requested to report the cause of the variation in the estimated outturn in some cases.

3. The estimated outturn for 1885-86 in the Nilgiri District of Specie 'C. Calisaya var Ledgeriana' is printed in the statistical tables

tables as lbs 3500, which is an error for lbs 3300. The total outturn for the district also requires alteration from lbs 230992 to lbs 230792 with reference to the above correction.
