READ—again the following paper :—

G.O., dated 19th July 1887, Mis. No. 4190, Revenue.

READ—also the following papers :—

G.O., dated 21st June 1888, No. 3605, Revenue.

Read—the following letter from J. W. RUNDALL, Esq., M.I.C.E., Superintending Engineer, VI Circle, to the Chief Engineer, Public Works Department, dated Tanjore, 4th May 1888, No. 148 M.D.

I have the honor, with reference to G.O., No. 578 W. of the 25th February 1887, to forward, herewith, a report by the Executive Engineer, Madura District, regarding the proposed roads in Kodaikánal, together with an estimate of Rs. 15,790 for constructing the same, together with the surveys and other papers connected therewith.

2. As I have not been at Kodaikánal for several years, I am not able to speak from personal knowledge as to whether the proposals are the best which can be made, but there can be no doubt that a general scheme of roads, as now laid out, is essential in the case of a station which is rapidly extending and growing in importance.

3. The Executive Engineer's report, as to the considerations which have guided him in laying out the roads and fixing the site of the bridge, is clear.

4. The Executive Engineer advises the abandonment of any idea to construct the lake on the Parappar, and in my opinion his arguments are conclusive against its formation.

5. Mr. Hughes states that if the construction of the lake be abandoned considerable improvement can be effected in laying out the roads now estimated for.

6. I beg to send on the papers as received for orders : (1) regarding the lake and (2) the general question of the construction of the roads and the amount which the Government are willing to spend for this service.

7. Considering that all properties on these hills will be improved by the construction of a general system of roads, but more particularly those through which the roads will be carried, it is to be hoped that the extravagant [illegible] mpensation will not be made.
