Dated 28-10 1897.

*Not to be folded or roughly handled*

No 2203.

Government Medical Store

Madras 29th November 1859.

From The Principal

Medical Storekeeper

To

The Secy: to the Surgeon General

With the Government of Madras

Reference

Memo No 6430 dated 25th November

1859, endorsed on GO No 854 dated 18 th

October 1859, Revenue calling for report

with reference to para 3.

Sir, I have the honor, in answer to the

above, to state that Quinine is at present

being sold to the Public by the Chemists

in Madras at prices varying from 12 annas

to one rupee, four annas per quarter ounce.

The proposal, therefore, to sell Quinine at

six annas per ounce, phial included, is

offering it to the public at very advantageous

rates; even at this rate, I think it probable

Lowers

however, that the sale would be limited and mostly confined to outlying places at long distances from Local Fund, Municipal and Civil Dispensaries.

2. I have at present in stock 500 quarter ounce and 400 half ounce phials of English made Quinine put up in three small quantities for Revenue and Forest parties, these could be issued as soon as vernacular labels were printed, and it would be unnecessary to indent on Mr. Lawson for further supply of Quinine until the result of this experiment was known, as this issue would not materially affect the stock at present in hand. Of these 900 phials, 100 might be issued to 9 different Revenue Officers and a further issue of 1000 quarter ounce phials could be put up if required, anything beyond this would necessitate the purchase of empty phials.

I have &c.

Memo

I have the honor to state that the English Quinine in stock has been got for specific purposes and had better be kept for these. The Government wish to try the locally made Quinine and the Principal Medical Storekeeper will be good enough to get from Mr. Lawson enough Quinine for the 1000 quarter ounce bottles and have them sent on to Collectors.

2. Labels should be got ready and when the phials are ready for issue, they might be sent to Ganjam, Godaveri, Kurnool and Cuddapah as an experiment.
