PROCEEDINGS OF THE BOARD OF REVENUE

(SEPARATE REVENUE).

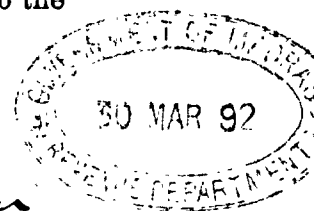

RESOLUTION—dated 15th March 1892, No. 152.

In complying with periodical indents for salt from the French Government the following precautions should be observed in order to prevent the possibility of suspicious favouring of any particular factory.

On receipt of an indent from the French Government samples of salt in triplicate from all the factories or other sources, from which the French Government is entitled to select the salt, should be obtained by the Assistant Commissioner in sealed glass bottles (with slips pasted thereon containing the names of the factory and any other information required) and should be consecutively numbered *personally* by that officer. One set of these samples will then be transmitted to the French Government and the other two sets will be kept in the *personal* custody of the Assistant Commissioner. The samples sent to the French Government should only bear the numbers given by the Assistant Commissioner, *the slips containing information as to the name of the factory, &c., being removed.* When a particular number has been accepted by that Government the Assistant Commissioner will take the usual steps to comply with the indent. The whole matter should be treated as *strictly confidential* until the intimation of the acceptance of one of the samples transmitted to the French Government. Of the remaining two sets of samples, one set will be kept by the Assistant Commissioner for future reference and the other set will be returned to the Inspectors concerned.
