GOVERNMENT OF MADRAS.
REVENUE DEPARTMENT.

READ—the following Proceedings of the Board of Revenue (Land Revenue), dated 9th August 1893, Mis. No. 4613 :—

Read—the following letter from C. H. MOUNSEY, Esq., Acting Collector of Cuddapah, to the Secretary to the Commissioners of Land Revenue, dated 17th July 1893, Ref. on C. No. 1988-Ver. :—

With reference to paragraph 9 of Board's Proceedings, No. 170, dated 11th April 1893, and in continuation of my letter, Reference on current No. 1988-Ver. of 1893, dated the 4th instant, furnishing further information called for by the Board in regard to the revision of village establishments, I have the honour to submit herewith a revised statement of the number of nirgantis required for the district.

2. In proposing the number of nirgantis originally the total wet ayacut of the village was taken into account. As ordered by the Board the average extent irrigated from each source irrigating 100 acres and above is taken into account for the purpose of the above revised statement. The number of nirgantis thus arrived at is 280 at a monthly cost of Rs. 1,120 against 524 at a monthly cost of Rs. 2,096 originally proposed.

3. In this connection I beg to state that it would be impossible to distribute the work of nirgantis when an irrigation source irrigates the fields of more than one village. For instance, Patha Cuddapah tank irrigates the fields of (1) Patha Cuddapah itself, (2) Cuddapah town, (3) Vukkayapallé, (4) Palampalle and (5) Gudur. The average extent irrigated by this tank in all the five villages is more than 1,000 acres and consequently two nirgantis for all the five villages are proposed. There are some more instances of this sort in several taluks.

4. At present the nirganti has to go to each and every field and see that it is properly irrigated especially when there is a dispute among ryots as to the distribution of water. This sort of work cannot be expected in case of sources enumerated in paragraph 3 above. I would therefore suggest that it would be better to provide a nirganti for each of such villages the fields of which are irrigated by one source. If this suggestion meets with the approval of the Board, I will submit a statement for such additional nirgantis as are required for the district.

Resolution—dated 9th August 1893, Mis. No. 4613.

Submitted to Government with reference to paragraph 9 of Board's Proceedings, dated 11th April 1893, No. 170, and in continuation of Board's Proceedings, dated 17th July 1893, Mis. No. 4182.

2. The Collector has furnished a statement showing the average extent of irrigation under each source for which he requires the services of 279 nirgantis (not 280 as given in the statement, the number for Pullampet being 67 instead of 68) against 524 provided in the scheme relating to the revision of village establishments in the district now before Government.

3. The Board supports the Collector's revised proposals which result in a saving of Rs. 980 per mensem.

4. With reference to paragraphs 3 and 4 of the letter, the Collector is requested to send a list of the additional nirgantis required, but his recommendations should be confined to cases of real necessity.
