Fort Saint George, Revenue Consultation of 2d February 1858.

No. 23. Read the following Extract from the Proceedings of the Board of Revenue; dated 5th January 1858, No. 57.

Read letter from the Collector of Rajahmundry dated 8th December 1857.*

*In Consultation 5th January 1858.

(Here enter No. 152.)

Resolved that the above letter be submitted for the information of Government, with reference to Extract Minutes Consultation 7th February 1858, N. D., No. 128.

2. Mr. Parris in the above letter reports the result of the measures adopted by him for the improvement of the salt manufactured in Rajahmundry. In the past season the Nellore system of manufacture was generally followed and although the salt does not equal that made at some of the Nellore Pans, there has been very considerable improvement in its quality. The new system has not been altogether fairly tested for owing to the abolition of the Mogulloor Pans it was necessary to make as much salt as possible and the same attention could not be paid to quality as would have been if the manufacture had been less hurried. Some of the Pans moreover had not been worked for a long time.

3. The great difficulty is still the admission of fresh water from the Canals into the creeks from whence the brine for the Pans is drawn. The district Engineer has to a certain extent remedied this evil, and the subject is still under his consideration.

4. The full rate of Coodevaram sanctioned in the Extract Minutes Consultation under reply was allowed, even for salt of comparatively inferior description. This was done because the partial inferiority of the salt was owing to circumstances beyond the control of the manufactures and also in consideration of the great rise in the value of labor. In the present season all bad salt will be rejected.

5. The samples of salt forwarded by the Collector are herewith submitted for the inspection of Government. There is evidently much room still for improvement and the salt is manifestly inferior to that of Madras specimens of which accompany these Proceedings.

(A true Extract.)

(Signed) J. D. SIM, Acting Secretary.

No. 24. ORDER THEREON, No. 122; dated 29th January 1858.

1. With these Proceedings, the Board of Revenue submit the Report of the Collector of Rajahmundry on the result of his efforts for the improvement of the Salt manufactured in his District, and forward specimens of that produced last year.

2. The Nellore system of manufacture has now been introduced throughout the District, and a decided improvement is said to have been effected, although in consequence of the exceptional circumstances of last year, it was found necessary to attend more to quantity than quality. The full rate of Coodevaram was paid for all the salt taken, which however will not in future be the case, when the quality will be considered in determining the price.

3. The Government approve of the Collector's proceedings and trust that his exertions, together with those of the District Engineer for the more complete exclusion of fresh water from the salt creeks, will result in still further improvement in the article produced, for which, judging from the specimens forwarded, there is still very great room.

4. The Government wish to learn from the Board of Revenue, what improvement has been effected in the quality of the Masulipatam salt, to which, equally with that of Rajahmundry, their attention was drawn in Extract Minutes Consultation, dated 24th October 1855.

(Signed) H. FORBES,

Acting Secretary to Government.

Extract from the Proceedings of the
Board of Revenue dated 5 January 1858

Read letter from the Collector
of Rajahmundry dated 5th December 1857.

[Here enter N^o 152.]

Resolved that the above letter
be submitted for the information of go.
government with reference to Extract Minute
Consultation of February 1856 R.D. N^o 128.

2. Mr Purvis in the above letter
reports the result of the measures adopt-
ed by him for the improvement of
the Salt Manufactured in Rajahmun-
dry. In the past season the Nellore
System of manufacture was generally
followed, and although the Salt does
not equal that made at some of the
Nellore Pans, there has been very con-
siderable improvement in its quality.
The new system has not been altoget-
her fairly tested for owing to the
abolition

N^o 20 Jan 1858.
1858.

abolition of the Moguldar Pans it was necessary to make as much salt as possible and the same attention could not be paid to quality as would have been if the manufacture had been left to itself. Some of the Pans however had not been worked for a long time.

The great difficulty is still the admission of fresh water from the Guals into the creeks from whence the saline for the Pans is drawn. The District Engineer has to a certain extent remedied this evil and the subject is still under his consideration.

The full rate of food was sanctioned in the Extract Minutes. Consultation under reply was allowed; even for salt of comparatively inferior description. This was done because the partial inferiority of the salt was owing to circumstances beyond the control of the Manufacturers and also in consideration of the great rise in the value of labor. In the present season

Season salt bad salt will be rejected.

3. 10. 1870

5

The samples of salt forwarded by the Collector are herewith submitted for the inspection of Government. There is evidently much room still for improvement and the salt is manifestly inferior to that of Madras specimens of which accompany these Proceedings.
