Proceedings of the Madras Government, Revenue Department,
22nd March 1877.

No. 693. Read the following Proceedings of the Board of Revenue, dated 17th March 1877:—

Read the following letter from R. W. BARLOW, Esq., Collector of the Chingleput District, to H. E. STOKES, Esq., Secretary to the Board of Revenue, dated Sadras, 10th March 1877, No. 167.

With reference to Board's Miscellaneous Proceedings, No. 2,048, dated 12th February last, calling upon me to furnish a report on certain points referred to in G.O., No. 604, in connection with the irrigation under the Red Hills Tank, I have the honor to state that, according to the enclosed statements submitted to me by the General Deputy Collector Mr. Jones, it appears that the acreage under the usual wet crop amounts to 827·85, and the cultivation approaching maturity extends only to 19·24 acres, which requires irrigation till the end of the current month.

2. Of the remainder, some 763·42 acres were recently planted, the coming to maturity of which depends upon the possibility of future irrigation, varying from one to four months as shown in the statements referred to above, besides the extent (45·19) under betel cultivation requiring water throughout the year.

3. The figures given above are supplied by the General Deputy Collector on the information procured by the Tahsildar of Saidapet after personally inspecting the locality.

Submitted to Government with reference to G.O., dated 10th February 1877, No. 604, Revenue Department.

2. The bulk of the cultivation is late crop, and the usual wet crop which there was reasonable prospect of bringing to maturity is only 19¼ acres. It is observed that by G.O., Public Works Department, 1st March 1877, No. 703, the irrigation sluices were ordered to be closed.

From.

B.R. No 2641. R. W. Barlow Esqre

Collector of the Chingleput Dt.

To

H. L. Stokes Esqre.

Secretary to the Board of Revenue

Madras

Sir,

With reference to Board's Miscella-
neous Proceedings No 2048, dated
12th Feb. last, calling upon me to
furnish a report on certain points
referred to in G.O. No 604, in connection
with the irrigation under the Red
Hills Tank, I have the honor to state
that according to the enclosed state-
ment submitted to me by the General
Deputy Collector Mr. Jones, it appears
that the average under the usual

wet

wet crop amounts to 827·85, and the cultivation approaching maturity extends only to 19·24 acres, which requires irrigation till the end of the current month.

2. Of the remainder, some 763·42 acres were recently planted, the coming to maturity of which, depends upon the possibility of future irrigation varying from 1 to 4 months. as shown in the Statement referred to above, besides the extent (45·49) under betel cultivation requiring water throughout the year.

3. The figures given above are supplied by the General Dy Collector, on the information procured by the Tahsildar of Saidapet, after personally inspecting the locality.
