*Proceedings of the Madras Government, Revenue Department,
 30th April 1877.*

Famine Relief.

No. 712-A. Read the following Proceedings of the Board of Revenue, dated 12th April 1877 :—

Read the following letter from J. H. MASTER, Esq., Collector of Bellary, to H. E. STOKES, Esq., Secretary to the Board of Revenue, dated Sivaram, 26th March 1877, No. 226.

REFERRING to paragraph 6 of G.O., No. 329, dated 31st January, and in continuation of my letter, No. 201, dated the 19th instant, I have the honor to state that the report of the Sub-Collector is again to the effect that "no change for the worse in the condition of the relief coolies, apparently attributable to the reduction of wages, has yet been observed."

2. The Deputy Collector of the Anantapore Division reports that there has been no change either.

3. I beg, however, to forward copy of a letter, No. 30, dated the 20th instant, from Mr. Macartney, Agent to the Rajah of Sundoor, who takes a different view of the subject. He says he cannot help being convinced that the reduction of wages has been productive of evil consequences.

4. The other reports due are not yet come to hand, but as the last quoted letter is important, I send it on without delay.

From J. MACARTNEY, Esq., Agent to the Rajah of Sundoor, to J. H. MASTER, Esq., Collector of Bellary, dated Beederhally, 20th March 1877, No. 30.

WITH reference to G.O., No. 757, dated 1st instant, copy of which was forwarded to me with your endorsement of the 8th idem, I have the honor to inform you that my attention has been directed, both last week and this, to the points indicated therein, and that I have now no hesitation in expressing my conviction that the reduced scale of wages is slowly but surely deteriorating the power and physical condition generally of many of the laborers under my charge.

2. The late somewhat fatal outbreak of sickness attributed to Asiatic cholera, and so registered, I am strongly inclined to think, was not wholly nor even mainly such, and that the following causes are sufficient to account for most of the cases and the symptoms observed, to wit, general debility, enfeebled digestive powers, incapable of assimilating food, the drinking profusely of water after eating in order to give a feeling of satiety, and exposure under such conditions to chills during the night. Sickness has largely diminished since the nights have become higher in temperature. What rather confirms me in the above view of the case is, the fact that though several, who consequently died, were carried to their respective villages, yet there was no spread of illness there, as usually happens when cholera is introduced. This sickness was almost, if not wholly, confined to the laborers on the relief-works. Of course, I may be mistaken in the inference which I have drawn, but I feel it to be my duty to express exactly what I think, so long as I am conscious that my opinions are not negligently formed.

3. I do not believe that one pound of inferior grain is sufficient to preserve a working man in vigour, nor that it amounts to anything like what he consumes daily in ordinary times. I know that it is quite common in this part of the country for a strong healthy man in full work to eat within 24 hours one full seer of cholum, and in not a few instances even a Rajah's seer, which is equal to one and a quarter of the Bellary measure, and that, too, of much better quality than can be now procured. Nor need this be wondered at on the ground of cost, when it is remembered that in average years grain is 300 per cent. cheaper, and wages exactly a half more than

*Proceedings of the Madras Government, Revenue Department,
30th April 1877.*

at present. The wages under the old scale during the whole of December last were only a fraction over those of the existing one, when the then ruling prices of grain in Sundoor are considered. I mean the general wage, not that of skilled labor, which was considerably more.

4. It is, however, evident that in the case of a man and wife with, say, four children, all under seven years of age, or in that of a woman with two or three, the present scale of wages with an allowance of a quarter of an anna to each of the children, is somewhat better pay than two annas for a man and one anna six pies for a woman with no allowance for the children.

SUBMITTED for the information of Government.

2. Mr. Macartney possesses great opportunities for forming a correct opinion of the state of the people, and states that he thinks they are rapidly deteriorating. The Sub-Collector and Deputy Collector seem to think otherwise.

3. Mr. Macartney, however, says that present wages, allowing for the 3 pies to children, are better than the old scale.

To, J. H. Master Esqre,
Collector of Bellary

Sir, With reference to G.O. N^o 757, dated, at Instant copy of which was forwarded to me with your endorsement of the 8th idem, I have the honor to inform you that my attention has been directed, both last week and this, to the points indicated therein, and that I have now no hesitation in expressing my conviction that the reduced scale of wages is slowly but surely deteriorating the power and physical condition generally, of many of the laborers under my charge.

2. The late somewhat fatal outbreak of sickness attributed to Asiatic Cholera and

BP
and so registered, I am strongly inclined
to think, was not wholly nor even mainly
such, and that the following causes are
sufficient to account for most of the
cases and the symptoms observed, to wit,
General debility enfeebled digestive
powers incapable of assimilating food,
the drinking profusely of water after eating
in order to give a feeling of satiety, and
exposure under such conditions to chills
during the night sickness has largely
diminished since the nights have
become higher in temperature -

What rather confirms me in the
above view of the case, is the fact,
that though several, who consequently died,
were

3

were carried to their respective villages
yet there was no spread of illness
there, as usually happens when cholera
is introduced. This sickness was
almost, if not wholly, confined to the
labours on the relief works. Of course
I may be mistaken in the inference
which I have drawn, but, I feel
it to be my duty to express exactly
what I think, so long as I am
conscious that my opinions were
not negligently formed.

3. I do not believe that one
pound of inferior grain is sufficient
to preserve a working man in vigour,
nor that it amounts to any thing
like what he consumes daily in
ordinary times. I know that it is
quite

quite common in this part of the
country for a strong healthy man
in full work to eat within 24 hours
one full secr. of Cholam, and in not
a few instances even a Rajah's secr,
which is equal to one and a quarter
of the Bellary measure, and that too
of much better quality than can be
now procured. Nor need this be
wondered at on the ground of cost
when it is remembered that in average
years grain is 300 per cent cheaper,
and wages exactly a half more than
at present. The wages under the old
scale, during the whole of December last,
were only a fraction over those of the
existing one, when the then ruling prices
of

X 1595 1/2
of grain in Sundoor are considered.

I mean the general wage, not that
of skilled labor, which was consi-
derably more.

4. It is however evident that in
the case of a man and wife, with
say, four children all under 7 years
of age or in that of a woman with
two or three, the present scale of wages
with an allowance of a quarter of
an anna to each of the children, is
somewhat better pay than 2 Annas for
a man and 1 anna 6 pie for a
woman with no allowance for the children.
