Proceedings of the Madras Government, Public Works Department,
18th October 1876. No. 2,795.

Read the following:—

No. 2,795.

No. 283. Note by the Chief Engineer for Irrigation.

THE Officiating District Engineer, Salem, forwards, with his letter marginally noted, an estimate in connection with the Tripatore large tank situated in the Tripatore taluq, No. 3 or Tripatore range.

2. The nature of the work proposed for execution and the heads of account to which it is chargeable are as follow:—

ORDINARY AGRICULTURAL.

Original Works.

Constructing a training bank for surplus channel	...	...	...	Rs.
				1,145
			Total	1,145

3. The following particulars of this tank are recorded:—

Ayacut area	...	...	...	...	Acres	435
Assessment	...	...	...	...	Rupees	3,882
Average revenue	...	...	...	...	"	3,759
Highest do.	...	...	...	...	"	3,875
Expenditure during the previous four years	...	...	...	...	"	9,387

The estimate provides for constructing a training bank to keep the surplus water from inundating the fields. The work was undertaken as emergent in anticipation of sanction by the Government, and has been no doubt completed.

The District Engineer should, however, have prepared and sanctioned himself an estimate for the bund, and he should subsequently have included it in the estimate for the tank sanctioned in G.O., No. 1,947 dated 1st August 1876, the sanction to which would have superseded the District sanction.

The foregoing remarks have reference to the fact that, in the absence of the arrangements described, the outlay was for some time reported as objectionable by the Examiner of Public Works Accounts.
