Simla, the 22nd May 1896.

Sir,

In continuation of Public Works Department telegram No.1249 G., dated 19th. instant, I am directed to state that while Mr. Hodson is in the service of the Ceylon Government he will receive the pay of a Superintending Engineer 1st. class, namely Rs.1,600 together with the exchange compensation allowance due under the rules, and deputation allowance under Article 98, Civil Service Regulations.

He may draw advances of salary, as required by him, within those amounts. His pay will be finally audited in this country on his return, the Colonial Government being debited with the balance due after deducting advances received.

2. Mr. Hodson will also be entitled to travelling allowances for the journey by steamer and rail. and for necessary halts while on duty, such travelling allowances will be dealt with finally by the Colonial Government.

I have the honour to be,

Sir,

Your most obedient servant,

THE CEYLON GOVERNMENT RAILWAYS.

All previous issues of the Working Time Tables and Addenda are hereby cancelled.

The line between Nawalapitiya and Bandarawela inclusive is herein referred to as the Bandarawela line.

Each Member of the Staff connected with the working of the Railway is required to make himself thoroughly acquainted with the subjoined Rules and Regulations.

Particular attention is directed to the arrangements for working the line by Pilotman in cases of obstruction.

The attention of all concerned is specially directed to the changes made in the formation of the Trains, and to the altered methods of working.

SPECIAL INSTRUCTIONS FOR WORKING TRAINS DOWN INCLINES.

The greatest caution and vigilance must be observed by the Engine Drivers and Guards in working down Inclines, and under no circumstance may lost time be made up on a descending gradient. The prescribed speed must be uniformly maintained throughout.

IMPORTANT NOTICE.

It is the duty of Station Masters to give the order to admit Trains into their Stations and to see that the points and lines are right before giving such order to admit Trains. They are also responsible for the correct working of the Signals, and will be held accountable for any accident arising from a neglect of these duties.

The Officer in charge of the Station for the time being shall be considered to be the Station Master.

1896.

FIXED SIGNALS.

In connection with rules 48 to 56, pages 10 and 11 of the Rules and Regulations issued in 1893, it is hereby notified for the information of all concerned that—

1. Except for Down Trains approaching Hatton there are no "Distant" Signals upon this Railway within the meaning of rule 55.
2. The Signals placed outside Station limits and now frequently miscalled "Distant" Signals are "Home" Signals to which rule 50 applies.
3. The Signals on Station platforms are not Home Signals; they are merely indicators for the guidance of the pointsmen, but (except for shunting purposes) these Signals must never be passed when at Danger.
4. Where Station Signals (as in clause 3 hereof) are not supplemented by Home Signals outside the Station limits, as at Mahara for Up Trains and Alagalla for Down Trains, approaching trains must be brought to a stand not less than 200 yards outside the most distant points in that direction, unless the Signal is lowered to admit them.
5. At stations where there is only a Home Signal in one direction and no Station Signal, as at New Péráleniya, trains approaching the unprotected side must stop 200 yards outside the platform, unless signalled forward by proper Hand Signal.
6. The only Starting Signals on the line are at Maradána Junction for Down Trains leaving that Station.

I.—REGULATIONS FOR WORKING KANDY, PERADENIYA, POLGAHAWELA, MAHARA, MARADANA, FORT, AND MATARA JUNCTIONS.

JUNCTION SIGNALS.

SIGNALS at all Junctions, and the Distant Signals connected with them, must always be kept at **Danger**, except when taken off to allow a Train to pass. When a Train approaches a Junction the Signalman must ascertain whether the line on which the Train has to run is clear, and if so he must then exhibit the proper Signals for it to proceed. Immediately the Train has passed the Signals must be again put to **Danger**.

Kandy Station.

1 **Home Signals** only are placed at this Station.

Up Trains approaching Kandy Station must **whistle** as follows:—

Passenger Lines—**One long whistle.**
Goods Lines—**Two long whistles.**
Mátalé Line—**Three long whistles.**

Peradeniya Junction.

2 The Junction approached from Colombo is called the **West Junction.** The Junction approached from Kandy is called the **East Junction.** The Junction approached from Náwalapitiya is called the **South Junction.**

3 Each Junction is protected by a Semaphore Home Signal, which must not be passed when at danger. (See paragraphs 6 and 7.)

4 Each Junction is also provided with a Semaphore Signal in the opposite direction, situated as nearly as possible midway between the Junctions. These Signals are supplemented by fixed auxiliary Signals, placed 50 yards in advance of them, and Trains and Engines passing between Junctions must stop **Dead** at the Auxiliary Signals, unless the proper Semaphore Signal is lowered for them to proceed.

5 **Whistles** approaching the West and South Junctions:—

For Loop Line—**One long whistle.**
For Kandy Line—**Two long whistles.**

Whistles approaching the East Junction:—

For Colombo Line—**One long whistle.**
For Nánu-oya Line—**Two long whistles.**

6 All Trains must approach and pass through the Junctions cautiously, and the Drivers must be prepared to act promptly in accordance with such Signals as may be exhibited.

7 The Drivers of Trains passing through the Loop must bring their Trains to a stand 50 yards from the Junction Points, unless ordered forward by the **Station Master personally.** After dark the Drivers will comply with Hand Signals shown from the Junction Points.

Polgahawela Junction.

8 Trains to and from the Kurunégala Branch—**Two whistles.** Main Line Trains—**One whistle.**

Mahara Junction.

9 The Junction points must be kept locked, and only be opened to allow Trains to pass to or from the Quarry Branch.

Main Line Trains.—**Up Trains** will give **One long whistle** when approaching the Junction.

Mahara Quarry Trains.—Up Trains approaching Mahara Junction must give **Two long whistles,** and on receiving the **All right** Signal must draw on to the Branch Line. Down Trains must stop **Dead** at the Signal on the Quarry Branch, and must not pass on to the Main Line until the Driver has received the Main Line Train Staff or Staff Ticket, and the signal is lowered.

Trains will run with Train Staff only between the Junction and Quarry.

Maradana Junction.

10. The Signals placed at this junction are Stop Signals, which must not be passed when at danger.

Down Trains leaving the Junction from Lines on the left-hand side of the Station platform are controlled by the Starting Signal placed upon the left-hand side of the Coast Line—the top arm for the Coast Line; the lower arm for the Engine Shed.
