from Chelubrole to Guntur & would have passed through a tract liable to very heavy floods, as the road in question has most disastrously experienced.

4 I presume however that the Guntur branch will not be constructed till the main line is completed & it would be well to wait while the development of events. If for instance the Southern Maharashtra Railway are not allowed to make the line from Bezwada to Chaulipatam, & if further, as has been suggested, the terminus of their system be moved back from Bezwada to Tadepalli, I have heard it hinted that they will wish to withdraw their terminus still further, to Guntur's. In that case the broad gauge could better have access to Guntur's along the present Southern Maharashtra alignment. Even if these hypotheses turn out to be groundless, it is still a question for consideration whether the Tondur-Guntur branch is the best alignment. This branch will cross the Kommamur Canal at Chelubrole, the only important village touched. From Chelubrole to Guntur's there is a first class metalled road & at Chelubrole are large warehouses and wharves on the Kommamur canal which accommodate the road & canal

traffic between Guntur & the Delta & between Guntur & Madras. The question arises whether the Railway by touching this place will win traffic to itself or will increase Canal traffic.

There is an alternative route from Tenali through Jagarlamudi to Guntur, and another shorter, & probably easier to make than any of the three already mentioned, from Kolakalur or Duggirala to Guntur. I think that the question should be very carefully considered before the alignment of the junction line is fixed.

5 The map sent to me is on too small a scale to show the exact location of stations. This is a matter of extreme importance & if possible I should like to have a chance of seeing the ground-plan of the various stations. In the case of the Villupuram-Guntakal line where it passes through the Cuddapah District I know from experience that stations were often most inconveniently situated. There may be all the difference between one side or one end of a town & another. Place a station in or adjoining a fairish hamlet & the case people will ostracise it and therefore where there is a possibility of competition with roads, canals and other means of communication it behoves the Railway administration

to study public convenience down to the
smallest detail.

SIR,

In reply to para 4 of Government Order, dated 18th ultimo, No. 25 R. calling for remarks on the proposed alignment of the Ennore-Puducherry section of the East coast railway, I have the honour to report that, of the two routes, that thro' Ponnai is in every respect preferable to that thro' Thattur and Pulicat.

2. It is not clear if any opinion regarding the salt branch from Vallur to Thattur is required but I am informed that the whole of the delta tract between the Arni or Vannaravaram river to the north and the Thoutelliar on the south is liable to submergence during the rains. If a more definite opinion is wanted regarding the branch, I shall have further and more detailed

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Railway.

Read the following papers:—

From the Acting Collector of Chingleput, to the Joint Secretary to Government,
Public Works Department, Railway Branch, dated Saidapet, 13th February
1895, Ref. on No. 57 G & B.

In reply to paragraph 4 of G.O., dated 18th ultimo, No. 25 R., calling for remarks
on the proposed alignment of the Ennore-Gudur section of the East Coast Railway,
I have the honour to report that of the two routes, that through Ponneri is in every
respect preferable to that through Kattur and Pulicat.

2. It is not clear if any opinion regarding the salt branch from Vallur to Kattur
is required, but I am informed that the whole of the delta tract between the Arni or
Narnavaram river on the north and the Kortelliar on the south is liable to submergence
during the rains. If a more definite opinion is wanted regarding this branch, I shall
have further and more detailed inquiry made.

3. The plans received with the Government order under reference have, as
directed, been forwarded to the Collector of Nellore.

From the Collector of Nellore, to the Joint Secretary to Government, Public Works
Department, Railway Branch, dated 23rd February 1895, No. 205-Comp.

With reference to G.O., No. 25 R., dated 18th January 1895, I have the honour
to state that I have no remarks on the alignment as now revised.

2. The map only reached me from the Collector of Chingleput a couple of days
ago, and hence the delay.

From the Collector of Kistna, to the Joint Secretary to Government, Public Works
Department, Railway Branch, dated Tumkurcode, 8th March 1895, Dis.
No. 131-Tour.

Referring to G.O., No. 25 R., dated 18th January 1895, I have the honour to
advise despatch of the map of the proposed alignment of the Bezwada-Madras Railway
which reached me in camp on 8th instant to your address by parcel post.

2. The proposed alignment according to the survey of 1894 has been well chosen
and accords with what I believe are the views of my predecessor, Mr. Arundel, who
had devoted much consideration to the subject. The following are the only remarks
I have to offer.

3. To make the junction of the Guntur branch at Tsundur is preferable to
placing it at Nidubrole as proposed in the Madras Railway Survey of 1890-91. The
latter would have been longer, would have been parallel to and in competition with a
metalled road the whole way from Nidubrole to Guntur, and would have passed
through a tract liable to very heavy floods as the road in question has most disas-
trously experienced.

4. I presume, however, that the Guntur branch will not be constructed till the main line is completed and it would be well to wait awhile the development of events. If, for instance, the Southern Mahratta Railway are not allowed to make the line from Bezwada to Masulipatam, and if further, as has been suggested, the terminus of their system be moved back from Bezwada to Tadepalli, I have heard it hinted that they will wish to withdraw their terminus still further to Guntur. In that case the broad gauge could better have access to Guntur along the present Southern Mahratta alignment. Even if these hypotheses turn out to be groundless, it is still a question for consideration whether the Tsundur-Guntur branch is the best alignment. This branch will cross the Kommamur canal at Chebrole, the only important village touched. From Chebrole to Guntur there is a first-class metalled road and at Chebrole are large warehouses and wharves on the Kommamur canal which accommodate the road and canal traffic between Guntur and the Delta and between Guntur and Madras. The question arises whether the railway by touching this place will win traffic to itself or will increase canal traffic. There is an alternative route from Tenali through Jagarlamudi to Guntur and another shorter, and probably easier to make than any of the three already mentioned, from Kolakalur or Duggirala to Guntur. I think that the question should be very carefully considered before the alignment of the junction line is fixed.

5. The map sent to me is on too small a scale to show the exact location of stations. This is a matter of extreme importance and, if possible, I should like to have a chance of seeing the ground plan of the various stations. In the case of the Villupuram-Guntakal line where it passes through the Cuddapah district I know from experience that stations were often most inconveniently situated. There may be all the difference between one side or one end of a town and another. Place a station in or adjoining a Pariah hamlet and the caste people will ostracise it and therefore where there is a possibility of competition with roads, canals and other means of communication it behoves the Railway administration to study public convenience down to the smallest detail.

ORDER—dated 28th March 1895, No. 218 R., Public Works.

Ordered that the above correspondence be forwarded to the Government of India in continuation of Proceedings No. 25 R., dated 18th January 1895.
