No. 182. Read the following letter from the Superintending Engineer, 6th Division, to the Secretary to Government, Public Works Department, dated Tanjore, 18th December 1868, No. 1,006 :—

1. With reference to G. O. No. 3,754, dated 2nd instant, I have the honour to enclose statements drawn up in the Form given in Memorandum No. 59, dated 26th October, showing the probable amount which may be expended on the Sub-Jails, &c., up to the 31st March.

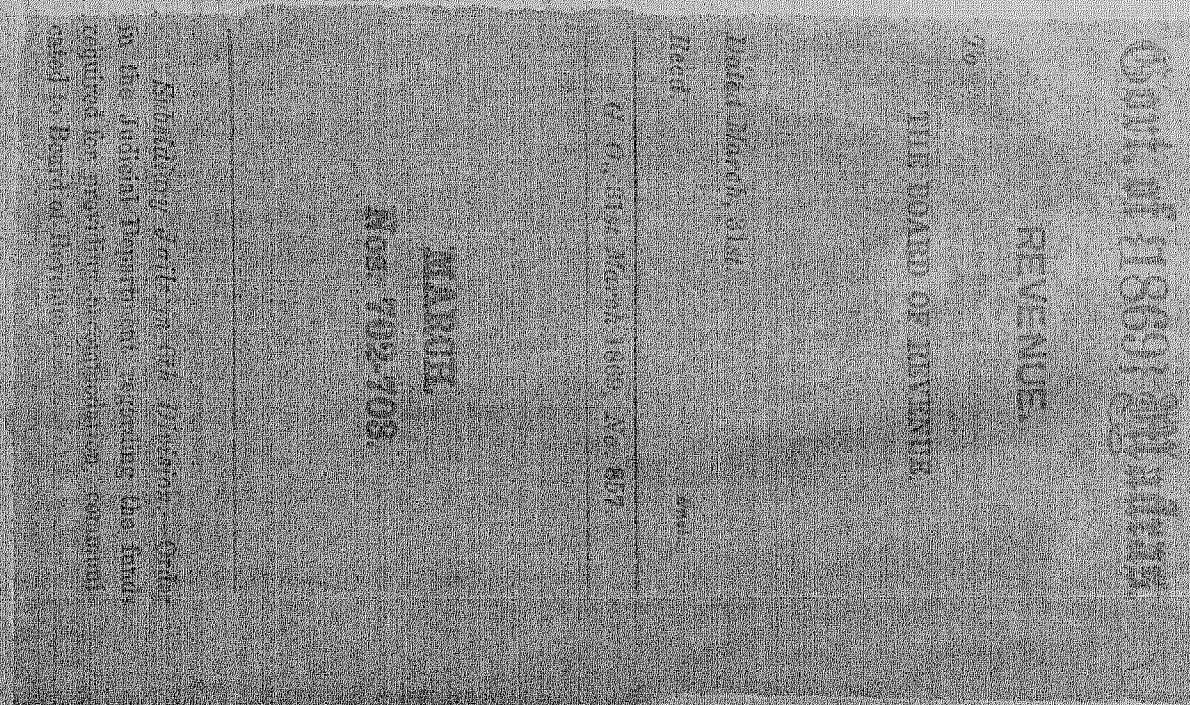

2. Under the head Estimate, the probable amount only is given, because, in many instances, the land has not been taken up and its value has not been included in the estimate, and in such cases it is not possible to determine what shall be the depth of foundations, and height of basement. In other cases in which new cutcherries have to be provided, information is required relative

to the formation of approaches from the main road, the probable cost of levelling the compound, of providing enclosing walls and lodges, &c., &c. I hope to be able to send in all the estimates early next year; but, in the meantime, I have informed the Range Officers of the number of bricks which will be required in each locality, and I hope that the sums entered, as likely to be expended, will be expended by the 31st March, but if funds are required in other divisions I would not object to 25 per cent. being taken off the sums applied for, as it is easy towards the close of the year to postpone payments for materials, &c., till the commencement of the new year.

3. I am not aware whether any portion of the 5 lacs allotted for Sub-Jails may be devoted to Central Jails; but, if so, I beg to remind you that $\frac{1}{2}$ a lac, in excess of the allotment for the current year, may be expended on the Central Jail at Trichinopoly.
