The first of these is the fact that the
 majority of the population of the United States
 is now living in cities and towns of 50,000
 or more people. This is a very important
 fact, because it means that the majority
 of the population is now living in a
 very different environment from that of
 the past. This has a great influence on
 the way of life, and on the way of
 thought. It has also a great influence
 on the way of government.
