*Proceedings of the Madras Government, Public Works Department,  
27th May 1867.*

No. 625. Read the following letter from the Acting Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 16th May 1867, No. 772 :—

1. I have the honour to submit, for the sanction of Government, a sketch and an estimate amounting to Rupees 8,240, for cutting a channel from the north end of the Kaveripak tank to the Mahindravaddy channel and an aqueduct for the same, in the Wallajah Range, North Arcot District.

1. Sketch.  
1. Abstract Estimate.

dravaddy channel and an aqueduct for the same, in the Wallajah Range, North Arcot District.

2. The project appears to have originated in 1862 with Mr. Dopping, formerly District Engineer of North Arcot. It contemplates providing an additional feeder to the Mahindravaddy, a large store tank in the Wallajah Range. The tank in question is at present supplied by a channel of that name from the Palar river; but the course of this channel being very circuitous, six miles, and the fall being small, there being also several tanks along its course which must first receive a supply, the volume of water which enters the Mahindravaddy tank is small, and far short of the quantity it is able to contain. It is a portion only of the surplus of the Kaveripak tank which at present runs waste fully into the Corveliar river, which it is proposed to utilize. Another advantage of the project is, that the cultivation under the Ponnappentangle, which is situated in the watershed of the Kaverypak tank, can be more fully carried on.

3. The Collector of North Arcot, after full consideration of the project and correspondence with this department, has countersigned the estimate in token of approval, which he gave on learning that the Kaverypak tank would not be deprived of its supply.

4. The work appears to be a very desirable one, and I beg to submit it for sanction and for execution out of the funds, Rupees 8,300, allotted for it in the Budget of 1867-68, item No. 157.

No. 626. ORDER THEREON, 27th May 1867, No. 1,596.

IRRIGATION, No. 38.

His Excellency the Governor in Council sanctions the estimate of Rupees 8,240 submitted with this letter, and directs that the works be put in hand at once and completed as speedily as possible from the funds allotted for them in the Budget of the current official year.

(True Extract.)
