*Proceedings of the Madras Government, Revenue Department,
16th September 1867.*

No. 298. Read the following Proceedings of the Madras Government in the
Public Works Department:—

Sanctioning estimate for Rupees 1,050 for plac-
ing teak-wood shutters and posts to a bridge } (Here enter 12th September 1867, No. 2,803.)
by which the Venkatagerry river passes the
Trunk Road No. VI in the 86th mile.

No. 299. ORDER THEREON, 16th September 1867, No. 2,185.

Irrigation, No. 14.

Communicated to the Board of Revenue.

(True Extract.)

(Signed) F. H. WILKINSON,
Acting Under Secretary to Government.

To the Board of Revenue, with Proceedings Public Works Department, No. 2,803.

E-1 S. T. Augustin.

*Proceedings of the Madras Government, Public Works Department,
12th September 1867.*

No. 261. Read the following letter from the Superintending Engineer, 2nd Division, to the Secretary to Government, Department Public Works, dated Camp at Guntoor, 26th August 1867, No. 77:—

1. I have the honor to forward plans and estimates, as per margin, for placing teak-wood shutters and posts to a bridge by which the Venkatagerry
- 1 Plan.
 - 1 Survey.
 - 1 Detailed Estimate.
 - 1 Abstract Estimate, Rupees 1,050.

river passes the Trunk Road No. VI in the 86th mile.

2. You will notice, by the survey that accompanies, that the Pumbali channel takes off from the Venkatagerry river, at a short distance from the Trunk Road. To draw the water into it, a bund has been thrown across the river, which has a very dangerous effect during freshes, as it throws the whole water down the Pumbali channel, causing breaches in many places, and seriously hazarding the safety of the road. A considerable yearly expenditure occurs in filling these breaches.

3. The Venkatagerry river is the one which is so liable to heavy floods near Gudur, and for the escape of the spill of which enormous road-dams were lately constructed. By the present arrangement, one of the chief bridges at A, by which it passes the road, becomes comparatively useless.

4. As the Pumbali cultivation is only carried on in December, January, and February, after the heavy freshes have passed, I propose that movable iron posts and planks be placed under the bridge, which will be put into position in the month of December. They will be yearly removed before the river rises.

5. If Government sanction the work, I would suggest that the money required be taken from the Reserve allotment of Rupees 25,260, granted in G. O. No. 1,185, dated 17th April 1867, for the Dondapaud tank, &c.

No. 262. ORDER THEREON, 12th September 1867, No. 2,805.

IRRIGATION, No. 10.

The estimate of Rupees 1,050 submitted with this letter is sanctioned. Funds for the execution of the work

will be provided by transfer from the allotment for the Dondapaud tank, as proposed by the Superintending Engineer.

(True Extract.)

Colonel, R. E.,

Secretary to Government.

To the Superintending Engineer, 2nd Division, with Detailed Estimate.
