To the Board of Revenue, with Proceedings Public Works Department, No. 3,724.

Exd. S. T. Augustin.

No. 683. Read the following Proceedings of the Government of India, in the Public Works Department, (Account—Irrigation,) dated Simla, 5th November 1867, No. 36 A. I. :—

Division of the Grant for Irrigation Works for 1867-68 into two classes.

Read again Public Works Department Circular No. 94 of 1867, laying down rules for allotting funds raised by loan for the construction of Irrigation Works, and for accounting for the same.

—

RESOLUTION.—His Excellency the Governor General in Council observes that, according to these rules, the grants and outlay on Irrigation Works are divided into the two following classes, viz. :—

A.—Works chargeable to the revenue of the year or ordinary outlay.

B.—Works chargeable to loan or extraordinary outlay, including the due proportion of charges for establishment and tools and plant.

2. This division of the grant into two classes having been brought into force from 1867-68, it is necessary that the budget arrangements of the current year, which have been made on a somewhat different basis, should be so modified as to admit of the outlay being adjusted in accordance with the rules that have been laid down for the purpose.

3. Those arrangements provide for the entire outlay for new Irrigation Works of all sorts being debited to the loan; but, on the other hand, the *entire* charge for establishment and tools and plant is provided from the ordinary grant.

4. The entire provision for new works of Irrigation from the loan is 70 lakhs. Of this sum, Rupees 13,11,000 is estimated to be the grant for works chargeable to revenue. As a set-off to this reduction, a sum of Rupees 10,00,000 should be added to the loan account from the ordinary grant for a reasonable proportion of the charges for establishment and tools and plant. *This brings up the loan grant to Rupees 66,89,000, that from revenue being Rupees 13,11,000.

5. In making up the accounts of expenditure incurred on Irrigation Works during 1867-68, the first charge against the grant from revenue will be the outlay against the sum of Rupees 13,11,000; if there be any residue after meeting all the outlay on the works provided for in that amount, it will be available to provide for the outlay on works included in the loan grant of Rupees 66,89,000, and will, as far as it goes, reduce the charge against that allotment.

6. The accompanying Statement exhibits the items comprising the grant for ordinary and extraordinary Irrigation Works for the current year; and, as laid down in Rule XIV. of Public Works Department Circular No. 94 of 1867, no transfer should be made from these grants to any other head of service without special reference to the Government of India. The Statement is, however, not considered absolutely correct, and the Governor General in Council therefore requests that, if any item therein brought forward as chargeable to loan is properly chargeable to revenue or *vice versa*, it may be pointed out by the Local Government concerned.

7. In order to avoid misconception, it should be understood that it is not contemplated by the addition made above to the extraordinary grant for charges for establishment and tools and plant that any change should be made in the manner at present in force of recording the expenditure on these two heads of service. The only effect of the addition is that, in the final annual accounts of expenditure, a reasonable proportion of this expenditure will be recorded as due to the construction of extraordinary Irrigation Works. The best manner of carrying out such an arrangement will be provided for by the Accountant General, Public Works Department.

1. ORDER.—Ordered that the foregoing Resolution be forwarded to the Local Governments of Madras, Bombay, Bengal, North-Western Provinces, and Punjab. Chief Commissioner, Central Provinces. Governments and Administrations noted in the margin, and to the Accountant General, Public Works Department, for information and guidance.

2. Ordered also, that a copy be forwarded to the Financial Department for information, and with a remark that the change now made in the Public Works Budget Estimate for Irrigation Works will be duly carried out in the Regular Budget Estimate for the current year.

(Signed) A. B. SAMPSON,
For Secretary to the Government of India.

To the Secretary to the Government of Madras, Public Works Department.

Statement showing the items comprising the grant for Irrigation Works for 1867-68, and the heads to which the expenditure on them is to be charged.
