*Proceedings of the Madras Government, Revenue Department,*
*9th March* 1867.

No. 169. Read the following Proceedings of the Board of Revenue, dated 2nd March 1867.

Read the following:—

*Season Report for the first fortnight of February* 1867.

No rain, except within a radius of ten miles from Bellary town, the crops are generally throughout the district in a flourishing condition, and a good harvest is expected. Raggy and cholum are one-third of the price they were quoted at five months ago. Whenever there is a demand for labor (employment?) at the subsistence rates, famine works are continued. There is, in general, full occupation for the people in their ordinary agricultural avocations, and in the Railway, and other works. There is still fever, to alleviate which, medicine is distributed. The district is otherwise healthy, and cattle are free from disease. Importation of grain from some quarters continues, but the rates are falling. Collections improving.
