G.O.	No.	Department.	Date.

Letter from the S. Centine Eng.
Nellore Division, to the Superintending
Engineer, 2nd Circle, No. 16488, 27th Sept 96.

Yours No. 121, 27.5.96.

I have the honor to submit
herewith the revised estimate for the
Kalanavur Tank and to report as follows.

2. The contractor agreed to take
up the work which was finally under-
taken by some tank diggers who
abandoned it after doing about
Rs 50 worth of work. The Sub Divisional
officer reports that the soil is
gravelly and the rate now entered
Rs 5-8-0 is that usually paid for this
class of work. The work is urgent and
time is now short. Early sanction is,
therefore requested.

3. The estimate was prepared
by Supervisor V. Rungarao Sain and
his low estimate is partly due to his
under estimating the lead and lift
and also to his not making sufficient

allowance for the hardness of the soil.
As the work is very urgent I have
ordered the work to be put in hand
in anticipation of sanction.

Recd. II
23. VL 9/1358

In returning the revised estimate amounting to Rupees 2950. for improvements to the Kalavankur tank received with letter N^o 69. M., dated 27 April 1896 from the Superf. Engineer, Second Circle, the undersigned has the honor to enquire how this work has hitherto been carried on — departmentally or by contract? If the latter, the Contractor must have known what he was about when he undertook the work, and the rate cannot now be raised for his profit.

2. The Supy. Engineer is requested to report the name of the subordinate who framed the original estimate.

Report

To accompany the Estimate for the

The rate for earthwork was put low in the original Estimate, the least depth being seven wroop. The correct ^{extra} least depth being 3030 & 87, and respectively. The rate will be Rs 5.8.0 two Shown in the Data Sheet attached. The soil has in most places to be obtained from behind the old pits and the work is a very difficult one. The increase in the rate makes the revision of the Estimate necessary.
