Proceedings of the Madras Government, Revenue Department, 24th April 1867.

No. 319. Read the following Proceedings of the Board of Revenue, dated 13th April 1867.

Read the following :—

Report on the state of the season in the Cuddapah District during the second fortnight in March 1867.

There was a good downpour of rain in the Kadiri talook at the close of the fortnight, but with this exception there was no rain which could have any effect on the cultivation or on the sanitary condition of the district. The crops that were still on the ground were in general in good condition, but there were indications of the water-supply failing in several tanks. Sowing and harvesting were carried on to a certain extent. The prices of grain varied in the Madanapalli and Cuddapah talooks in which there was a slight improvement. The general health of the people was fair. Fever existed in several localities, but cholera was present in a very slight degree in only one talook.

(Signed) T. G. WARD,
Deputy Collector.
