Consequence insufficient to pro-
cure the other items, it is necessary
that the value of these items should
be calculated separately. There
will still be a deficiency on
the grain portion which cannot
be made good unless local
prices are taken. This, how-
ever, is not possible under
the strict letter of Section
121 of the Code, as Hatti-
balagal is only a few miles
(about 5 according to the map)
from Alur.

READ the following letter from the Sanitary Commissioner for Madras, dated 11th January 1897 No 85/S to the Collector of Bellary :-

I have the honor to state that on my inspecting the condition of relief workers on the Alur - Guntakal road, I found certain gangs in an unsatisfactory condition of vigour. On making enquiries, I ascertained that certain of these were residents of Hattibalagal. The distances of works from this village vary from

from 3 to 5 miles. Some of the relief workers get over the difficulty by residing in the village of Nagera-
donna under very unfavourable hygienic conditions; but the majority have, I believe, to contemplate a march of from eight to ten miles daily in addition to their work.

2. My enquiries showed that the food grain in this and neighbouring villages was above cusbah rate - even allowing for the difference between the respective country and official seers; this has been sufficient to make a diminution in the total nourishment available from a wage which ^{even} under favourable circumstances permits a mere fraction of a pie for fluctuation of prices of 'other items.'

3. Under the above circumstances, I would advise your causing the erection of sheds to ~~some~~

the distant villages as early as possible. Sections 55 and 120 (para 2) of the Famine Code should also, I consider, be put in force with as little delay as possible.

✓ 4. The relief workers declared their willingness to reside in sheds on the works if they be erected for them.

5. In the case of the Mattibala-gal Village, I would advise you to ascertain whether work nearer the village site might not be obtained; for example, the madiga and mala wells require deepening and improving - also the village well and the Fortwell
