Office of the Superintendent  
Geological Survey of India  
(Madras Presidency)

No 156 R

From

C. S. Biddlemiss Esq. B.A.,  
Superintendent, Geological Survey of  
India

To

The Secretary to the Govt of Madras Rev. Secy  
Madras

Dated Ottacamund 20 March 1897

Sir,

With reference to G.O. No 4864 of  
30 November 96 and in continuation of my letter  
No 62 S dated 15 December 1896, I have the honour  
to say that no opportunity offered during the  
past cold-weather field-season of visiting  
Kurnool for the purpose of collecting  
specimens of iron-ores for the Imperial  
Institute Furthermore I have the honour to  
observe that as Kurnool is outside the two  
districts of Cimbaboe and Salem with  
which

Opportunities  
often have to  
be made

which the Geological Survey is now particularly engaged, and as the Director has expressed himself as deprecating any investigation of those ores until the question of the Salem iron-ores is settled (see Annual Report of the Geological Survey for 1896 para 8.) I think such a proceeding would have been inadvisable.

During the regular work of the Survey this last cold weather I may mention that some considerable beds of magnetite have been found along the top of the Javadi hills (which resemble those of Kanjambalai Tirtambalai &c) and these have been collected from and specimens will be despatched in due course to the Imperial Institute.

I have the honor to be,  
Sir,  
Your most obedient servant

A. Middleton  
Superintendent
