The Under Secretary of State for India,
India Office,
Whitehall,
London, S.W.

E. S. 1664.

India Office,

Whitehall,

London, S.W.

19 November 1896.

Dear Sir,

The Secretary of State's attention has been drawn to the recent growth of Manganese exports from India. At page 47 of the recent "Review of Mineral Production in India" by Dr. George Watt, 1896, it is stated (page 47) that 15,816 tons of Manganese were produced in 1885 in the Madras Presidency, that 22,758 tons were exported from Madras during the year, and that no other province of India exports this mineral.

It is believed that most of the Madras Manganese comes from Vizagapatam. Lord George Hamilton directs me to enquire (1) if this is the case; (2) if the account given in the Vizagapatam Gazetteer of the Manganese sources, cost of extraction &c. are still, in the main correct; and (3) what is the distance of the Manganese from the seaport, what are the means of transit for Manganese to the sea port and what is the approximate cost of carriage per ton from the pit to the port?

Yours faithfully,

C. E. Bernard

Secretary,

Revenue and Statistics Department.

The Chief Secretary to Government,
Madras.

To the Colls of Vizagapatnam

" Board of Revenue (L.R.) 16.1.97

Note

A very careful search has
been made both in the Revenue
and Public Deptt Libraries for
the book called Vizagapatnam
Gazetteer but it is not forthcoming.
The St. manual of Vizag does not
give any information and the
Dictionary of Economic Products
gives a very meagre account
of the mineral.

Have you looked at
the heading "Vizagapatnam"
in Sir W. Hunter's
Imperial Gazetteer. New.

11.1.97

I see there is nothing
here. W. Willock probably
knows the book.
