Re: the expediency of splitting up some of the taluks in the Godavari & Kistna Districts

1,000—1.

REVENUE DEPARTMENT.

No.

From

Dated 189 .

FOR ORDERS.

"I quite agree, but feel inclined to go further and to ask whether it is not pretty well time to split up some of the taluks. It seems to me that it must be almost impossible for a Tahsildar to effectively supervise the collection of such large amounts of revenue as fall to most of the Godavari (and probably also Kistna) Tahsildars. The Secretary knows more about this than I do and will perhaps consider this suggestion."

with reference to the Hon: Mr. Bliss' note on page flagged A in C.G. 3821 of 24. P. 96, extracted on the margin. The accompanying statement exhibits in one view particulars as to:-

(1) Population
(2) Total extent
(3) Extent excluding Zemindari, inam and forests
(4) Extent of occupied area
(5) Number of ryotwari villages
(6) Number of pattas issued
(7) Beriz and
(8) The rank held under each head ~~xxxx xxxxxxxx xxxxxxxxx~~ by the average taluk in each district of the Presidency.

The figures have been compiled from the talukwar details furnished in the statement printed at pages .

...pp 70 to 73 in G.O. 711 dy 31. Oct. 95.

2. It will be seen from these details that some of the taluks in Tanjore are as ~~load~~ heavy as those in Godavari and Kistna.

The following draft is submitted:-

G.O. No.

The amount of revenue that has to be collected in some of the taluks in Godavari, Kistna and Tanjore districts, appears to the Govt. to be so large that it must be very difficult for the Tahsildars concerned to effectively supervise its collection. The Board of Revenue will accordingly be requested to consult the Collectors concerned on the point and report in what manner relief may best be afforded to the Tahsildars.

To the Board of Rev: L.R.

Note. One of the ways of affording relief to the Tahsildars concerned is to split up the taluks as indicated by the Hon: Mr. Bliss C. 9. 2 But it seems unnecessary, if not undesirable, to suggest this in the order, as there are also other ways - such as redistribution of villages &c.

C.P.
20/10/96.

Statement showing certain particulars re: the average ... in the several districts.

	Districts	Population according to the Census, 1891	Total Extent	Extent excluding Zemindaris and forest area	Average occupied area, based on the figures of 5 fasalis ending 1310	number of ryotwari villages	Number of pattas issued in fasli 1300	Basis, based on the average of 5 years ending fasli 1300. Note

With reference to the Secretary's instructions of the 8th November last, three statements are submitted, showing how the taluks in the Godavari, Kistna, and Tanjore Districts and the first and second grade taluks in the remaining districts, stand, if arranged

A — according to Land Revenue alone;

B - according to Land, Abkari, and Income tax revenue; and

C. according to their weight as determined by (1) Population,
(2) occupied area,
(3) Number of Pattas,
(4) Land Revenue,
(5) Abkari revenue
+(6) Income tax revenue

2. The items taken into consideration when the grading of the taluks was last revised, were

(1) Population,
(2) Total area,
(3) occupied area,
(4) Number of Ryotwari villages,
(5) Number of pattas
(6) Land Revenue (~~Ryotwari~~)
(7) Number of revenue papers disposed of.

revenue

s

× The Hon. mr G. stokes

and

I doubt agree – Total Area is certainly a factor in determining the amount of work & it seems to me clear that the more villages there are, & therefore the more separately Karnams each with their separate sets of accounts, the more work the Talk. must have

BS

1. Population I doubt if equal
2. occupied area weight should be
3. Number of Pattas attached to each
4. Land Revenue of these factors. In
5. Precmeter revenue system, a taluk
6. Abkari revenue. Only Zemindari with a large Zemindari in it (e.g. Salem), which adds to population but does not give much work. Again, it is not so much the amt. of the Abkari revenue as the way in which it is raised that affects work. Ryotwari system & the T. T. system must have greatly increased the work of Talks. However, in this respect they are only at this time mostly on a par, as these systems have now been introduced into almost the whole Presidency. Not necessary, however, to consider the matter in detail at present. It is clear to me that many Talks must be overworked, for I incline to think that as a rule a Land Rev. of 5 lakhs is as much as a Talk. can reasonably be required to deal with – many think it 4 to 6

I do not give Talks more to do than they can possibly do properly. I believe that with smaller Taluks they will collect more revenue. Indeed, I believe I have often said that it would pay & have a covenanted officer in charge of every Taluk. The rupees & the Rs. should contain between 1 & 2 lakhs. I would put it so that it may be apparent that we are not struggling with the classes of Talukdars or contemplating the appt. of more Dt Talks, but think that we want more Taluks.

G O Mis No. 2233 8/3rd May 97.

The amount of revenue that has to be collected in some of the taluks in the Godavari, Kistna, Tanjore and a few other districts is so large, that it must be very difficult for the Tahsildars concerned to effectively supervise its collection and the Govt consider that it would be advisable to split up some of the taluks, creating additional ones, if necessary, so that no taluk charge may be heavier than can be efficiently managed by a single officer of the Tahsildar's grade.

The Board will be requested to consider the point and Submit

Mr thinks that what is wanted that the Tran: charge should be such that he can himself ~~x~~ after it & that the collection this position will not be

creation of new Tr Pans

in consultation with the collectors concerned.
