No. 52 I.

Note by the Chief Engineer for Irrigation.

The statements showing the irrigation revenue derived from all irrigation works during the fasli year 1305 (1895-96) received from the Board of Revenue (Revenue Settlement, Land Records and Agriculture), with the Proceedings noted in the margin are submitted to Government.

No. 197, dated 15th August 1896.	
" 221 " 9th September 1896.	
" 267 " 8th October 1896.	
" 5992, Mis., dated 25th November 1896.	

2. In the accompanying statement compiled in this office, the areas irrigated under the revenue derived from, and the working expenses incurred on all irrigation works in the Presidency are contrasted with the corresponding figures of the previous year. The total area irrigated was 6.33 millions of acres, the irrigation revenue was Rs. 205.57 lakhs and the working expenses amounted to Rs. 37.91 lakhs against 6.21 millions of acres, Rs. 191.91 and Rs. 37.27 lakhs in the previous year, respectively. Compared with the previous year there was an improvement in the areas irrigated under and the revenue derived from class II, III and IV works, while their working expenses were proportionately less than in the previous year. The area irrigated under class I works was less, the revenue derived therefrom and the working expenses incurred thereon being more than in the previous year.

CLASS I MAJOR (PRODUCTIVE) WORKS SYSTEMS.

3. *Gōldāvari Delta system.*—The areas irrigated under first crop in all the three sections of the delta, except those under the Cocanada and Kovur-Munjair junction canals in the eastern section, were less than in the previous year, the net total decrease being 97,134 acres, which is attributed to the relinquishment of irrigation in consequence of the enhancement of the water-rate. There was an improvement in the area irrigated under second crop of 20,747 acres. The increase occurred in the central and western sections. In spite of the large remissions aggregating Rs. 1,49,523 granted during the year against Rs. 37,731 in the previous year, the revenue derived was Rs. 1,01,443 better than in the preceding year, the increase being chiefly due to the enhancement of the water-rate from Rs. 4 to Rs. 5.

4. *Kistna Delta system.*—Under all canals the area irrigated under first crop was less than in the previous year. Though there was a decrease of 38,601 acres in the total area irrigated, the revenue derived was Rs. 2,28,228 more than in the previous year on account of the enhancement of the water-rate from Rs. 4 to Rs. 5. The remissions granted amounted to Rs. 1,58,923 or Rs. 1,49,408 more than in the previous year, owing to damages caused to the crops by the heavy floods in September 1895. The large increase of Rs. 1,69,446 in the working expenses was chiefly due to the heavy expenditure incurred in closing the breaches caused by the cyclonic storm in September 1895.

5. *Pennér and Sangam Anicut systems.*—There was a small decrease of 431 acres in the area irrigated under the former, while that irrigated under the latter was 669 acres more than in the previous year. The revenue derived was Rs. 1,002 under the former and Rs. 5,084 under the latter, better than in the preceding year. The remissions granted amounted to Rs. 3,568 and Rs. 8,646 against Rs. 5,233 and Rs. 14,295, respectively, in the previous year.

6. *Kurnool-Cuddapah canal.*—The area irrigated under this canal was 32,903 acres or 637 acres less than in the previous year, the decrease is ascribed to—
(1) Seasonable rains in consequence of which canal water was taken for dry crops to a smaller extent; and

(2) Combination among the ryots of some of the canal villages in the Kurnool district who raised unirrigated dry crops instead of paddy under the mistaken impression that the lands would be converted into wet at the resettlement.

The unrealized demand at the beginning of the year was Rs. 59,010; at the close of the year Rs. 28,831 remained to be collected.

7. *Barur Tank system.*—The area irrigated under both first and second crops amounted to 4,229 acres, or 251 acres below the extent irrigated in the preceding year. The decrease resulted in a loss of Rs. 818 in the revenue derived.

8. *Cauvery Delta system.*—The areas irrigated under first and second crops were 131 acres and 2,657 acres, respectively, less, and the revenue derived was Rs. 1,64,968 more than in the previous year. The increase in revenue represents chiefly the annual increment of the settlement assessment falling due in the year. Remissions to the extent of Rs. 9,375 were granted during the year against Rs. 11,572 in the previous year.

9. *Srivaikuntam Anicut system.*—Compared with the figures of the previous year, there was a decrease in the area irrigated of 4,611 acres and in the revenue derived therefrom of Rs. 18,817, owing to heavy rains in December 1895 and consequent floods which necessitated the grant of large remissions amounting to Rs. 34,048 against Rs. 15,671 in the previous year.

MAJOR (PROTECTIVE) WORK.

10. *Rushikulya project.*—The area irrigated under this project was extended from 27,389 acres in 1894-95 to 35,917 acres in 1895-96, the increase in revenue resulting from the extension being Rs. 16,381.

11. *Class II Works—Minor Works for which Capital and Revenue Accounts are kept.*—There was an increase of 11,670 acres in the total area irrigated under these systems and of Rs. 35,586 in the revenue derived therefrom. The Nandyar channel in the Trichinopoly district, under which the area irrigated and the revenue derived were

Pálár anicut system.
Pelandorai anicut system.
Valluru do.
Cheyaru do.
Lower Coleroon do.
Shatiatope do.
Mehmattur do.
Ganjám minor rivers system.

5,434 acres and Rs. 15,529, respectively, was included in the category of class II works during the year. In the systems marginally-noted there was an improvement in the revenue derived. On all other systems there was a falling off, the largest decrease occurring under the Maradur anicut system in which the area irrigated and revenue derived during the year were 32,572 acres and Rs. 1,79,063 against 33,600 acres and Rs. 1,85,653, respectively, in the previous year. The decrease of Rs. 6,160 in the revenue was chiefly due to unusually heavy rains in December 1895 and consequent floods which silted up large areas of wet lands and necessitated remissions aggregating Rs. 9,177 against Rs. 3,017 in the previous year.

12. *Class III Minor Works systems for which a continuous record of expenditure is kept.*—Under this class there was an increase of 5,446 acres in the total area irrigated and Rs. 14,512 in the total revenue derived. The bulk of the increase, viz., 2,732 acres and Rs. 9,979 occurred in the Coimbatore district, where the season was favourable and where only Rs. 506 were remitted against Rs. 9,724 in the previous year.

13. *Class IV Minor Works—Public Works and Revenue Departments.*—Under this class there was an increase of 211,579 acres in the area irrigated and Rs. 8,28,140 in the revenue derived. The increase occurred in all the districts except Ganjám, Nellore, Kurnool and Trichinopoly. The decrease in these districts are shown below:—

								Revenue.	
								ACS.	RS.
Ganjám	...	...	...	...	...	...	...	3,233	3,649
Nellore	...	...	...	...	...	...	...	6,809	10,779
Kurnool	...	...	...	...	...	...	...	2,643	12,410
Trichinopoly	...	...	...	...	...	...	...	7,276	21,178

The decrease in the Trichinopoly district is only apparent, being chiefly due to the transfer of irrigation under the Nandyar channel from class IV to class II works. The decrease in revenue in the Ganjám district was small; that in the Nellore and Kurnool districts is attributed to the unfavourable character of the season. The remissions granted during the year aggregated Rs. 3,49,835 or Rs. 5,47,012 less than in the previous year.

6th March 1897.

(Signed) W. HUGHES,
Chief Engineer for Irrigation.

ENCLOSURES.

STATEMENT comparing the areas irrigated under the revenue derived from and the working expenses incurred on Irrigation Works during 1895-96 with those of the previous year.

(Signed) W. HUGHES,
Chief Engineer for Irrigation.

Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture, dated 15th August 1896, No. 197.

Resolution—dated 15th August 1896, No. 197.

The Board resolves to forward to the Examiner of Public Works Accounts a statement showing the financial results of irrigation for fasli 1305 (1895-96) for all the works under Classes I & II. Irrigation under the Nandyar Channel, in the Trichinopoly and Udaiyarpalayam taluks of the Trichinopoly district, was charged for the first time in the year under review.

2. The following statement compares the actuals of revenue (both direct and indirect) for 1895-96 due to productive works (class I) with the revised estimates for the year and the actuals of 1894-95. The figures are exclusive of the usual 5 per cent. deduction made for collection charges:—

Names of works.		Actuals, 1894-95.	Revised estimate, 1895-96.	Actuals, 1895-96.
		RS.	RS.	RS.
1. Godavari anicut		22,61,013	22,91,000	23,48,473
2. Kistna do.		18,66,896	22,35,000	20,59,705
3. Cauvery do.		9,70,910	8,88,000	9,04,066
4. Pennér do.		1,57,812	1,58,000	1,59,511
5. Sangam do.		1,76,215	2,59,000	1,82,007
6. Srivaikuntam do.		93,464	1,03,000	75,566
7. Barúr tank project		9,350	9,000	8,599
8. Rushikulya do.		24,994	60,000	35,864

3. The actuals of 1895-96 show, as compared with the previous year, an increase under all the works except the Srivaikuntam anicut and the Barúr tank project. The increase under the Godavari and Kistna anicuts was chiefly due to the enhancement of water-rate from Rs. 4 to Rs. 5. In the former district there was an increase also under second-crop charge. The increase of over Rs. 30,000 under the Cauvery anicut was due as explained in the review of the statement for the previous fasli to the increment of the settlement assessment charged during the year. The increase under the Rushikulya project was due to the extension of irrigation during the year under review. The increase under the Pennér and Sangam anicuts was small and calls for no remarks. The decrease under the Srivaikuntam anicut was due to heavy rains in December last, and consequent floods which necessitated the grant of large remissions amounting to about Rs. 35,000 against Rs. 15,000 in the previous year.

4. Compared with the revised estimate, the actuals of 1895-96 exhibit a large decrease under the Kistna and Srivaikuntam anicuts and the Rushikulya project. The decrease under the Kistna anicut was chiefly due to grant of remissions amounting to Rs. 1,59,000 against only Rs. 9,000 in the previous year, in consequence of damages caused to the crops by heavy floods in September 1895. The decrease under the Srivaikuntam anicut was due to the cause mentioned in paragraph 3. The decrease under the Rushikulya project was due to the fact that the area brought under irrigation was not as large as had been expected by the Collector.

5. The following statement shows the actuals of indirect revenue for 1894-95 and 1895-96 and the revised estimate for 1895-96:—

Names of works.				Actuals, 1894-95.	Revised estimate, 1895-96.	Actuals, 1895-96.
				RS.	RS.	RS.
1. Gódavari	anicut	..	..	1,58,000	1,61,000	1,48,620
2. Kistna	do.	..	..	1,72,087	1,73,000	1,46,816
3. Cauvery	do.	..	..	1,10,274	1,16,000	1,09,650
4. Pennér	do.	..	..	20,272	20,000	21,058

Resolution—dated 9th September 1896, No. 221.

The following errata will be issued to Board's Proceedings, dated 15th August 1896, No. 197 :—

(1) For Rs. 20,59,401 in column 3 against the Kistna anicut in the statement in paragraph 2, read Rs. 20,59,705.

(2) For Rs. 1,46,496 in column 3 against the Kistna anicut in the statement in paragraph 5, read Rs. 1,46,816.

(3) For the figures in columns 22 to 24 against the Kistna anicut in the statement in page 4, substitute the following: Rs. 5,928, 1,46,816 and 21,68,111.

(True Extract.)

(Signed) R. V. SRINIVASIAH,
Secretary.

Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 8th October 1896, No. 267.

Read—the following papers :—

"	"	of	"	24th "	"	"	No. 1489-Ver.
"	"	of	"	26th "	"	"	1503-Ver.

Resolution—dated 8th October 1896, No. 267.

The Board resolves to submit to Government its review of the results of irrigation under the different classes of works—I to IV—during fasli 1305 (1895-96) together with the usual statements.

2. The following comparative statement shows the area occupied for irrigation, the area actually irrigated or charged as irrigated and the revenue derived under the different classes of works during 1894-95 and 1895-96 :—

Items.	Area occupied.		Area actually irrigated or charged as such.		Total land and irrigation revenue.	Share due to irrigation.	Deduct remissions.	Net revenue due to irrigation.
	First crop.	Second crop.	First crop.	Second crop.

* Includes figures for Trichinopoly reported in Board's Proceedings, dated 16th and 21st December 1895, respectively, Nos. 394 and 405.

Taking all classes of works together, there was a decrease compared with 1894-95 of 52,133 acres in the area occupied under first crop, being the net result of a decrease of 79,141 acres under class I works, and an increase of 27,008 acres under other classes. Under second crop there was an increase of 93,209 acres under all classes of works as shown in the margin. The area charged as irrigated under first and second crop was greater than in the previous year by 5,591 acres and 109,232 acres, respectively. The increase under works, under the Godáviri and Kistna anikats *, owing to relinquishment of irrigation in consequence of enhancement of water-rate. The total revenue on irrigated lands amounted to Rs. 274.82 lakhs, Rs. 7.51 lakhs remitted during the year against Rs. 10.45 lakhs in 1894-95, the net revenue to be credited to the works amounted to Rs. 204.54 against Rs. 190.78 lakhs in the previous year.

3. As compared with the previous year (1894-95), there was an increase of Rs. 4,97,471 under class I works, which is the net result of a gross increase of Rs. 5,17,106 in the revenue due to irrigation under the systems noted in the margin†, and a gross decrease of Rs. 19,635 under the Srivaikuntam anikat and the Barur tank project. The variations have already been explained in paragraph 3 of Board's Proceedings, dated 15th August 1896, No. 197. Under class II works there was an increase of Rs. 35,586 in the revenue due to irrigation, which is the net result of a gross increase of Rs. 56,493 under the marginally-noted‡ systems and a gross decrease of Rs. 20,907 under the other works. The large decrease of Rs. 6,590 under the Marudur anikat was chiefly due to unusually heavy rains in December last and consequent floods which silted up large areas of wet lands and necessitated the grant of remissions amounting to Rs. 6,160. Under class III works there was an increase of Rs. 15,542 in the net revenue due to irrigation in Vizagapatam, Chingleput, Tinnevely and Coimbatore. The bulk of the increase (Rs. 9,979) occurred in Coimbatore, where the season was favourable and where only Rs. 506 were remitted against Rs. 9,724 in the previous year. Under class IV works there was

Class of works	Acres
I	16,868
II	6,296
III	242
IV	69,803
Total	93,209

	Acres

Total	20,907

an increase as shown in the margin * in all the districts except Ganjām, Nellore, Kurnool and Trichinopoly. The decrease in these districts amounted to Rs. 48,016, of which no less than Rs. 21,178 appertain to Trichinopoly. The large decrease in this district is only apparent, being due chiefly to the transfer of irrigation under Nandiyar channel from class IV to class II works in the year under review—vide G.O., No. 1-I, dated 7th January 1895. The decrease in Nellore and Kurnool was due to the unfavourable character of the season.

	Rs.	Percentage to gross increase.
* Vizagapatam	9,103	1.0

5. The following statement compares the area irrigated under the Kurnool-Cuddapah canal and the revenue derived therefrom during the year under report with the corresponding figures for the preceding year :—

Districts.	Area irrigated.				Demand.	Remissions.	Net demand.
	First crop.		Second crop.				
	Wet.	Dry.	Wet.	Dry.			
Kurnool .. { 1304	ACS. 10,579	ACS. 3,604	ACS. 1,294	ACS. 1,606	RS. 57,685	RS. 301	RS. 57,384
.. { 1305	10,632	2,801	994	1,136	46,740	43	46,697
Difference ..	+ 53	- 803	- 300	- 470	- 10,945	- 258	- 10,687
Cuddapah .. { 1304	9,822	2,589	2,279	1,767	57,434	1,712	55,722
.. { 1305	9,638	3,545	2,830	1,327	57,850	1,613	56,237
Difference ..	- 184	+ 956	+ 551	- 440	+ 416	- 99	+ 515
Total .. { 1304	20,401	6,193	3,573	3,373	1,15,119	2,013	1,13,106
.. { 1305	20,270	6,346	3,824	2,463	1,04,590	1,656	1,02,934
Difference ..	- 131	+ 153	+ 251	- 910	- 10,529	- 357	- 10,172

The total area irrigated under the canal, including dry crops, was 32,903 acres against 33,540 acres in the previous year. The decrease is the net result of a decrease of 1,520 acres in Kurnool and an increase of 883 acres in Cuddapah. The variations have not been accounted for by the Collectors concerned. They will now be requested to explain them.

(True Extract.)

20. Sugarcane, betel, coconuts, plantains, &c., on dry land requiring water longer than an ordinary wet crop ..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..
21. Dry crop watered, whether first or second ..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..

Note.—The increase compared with the previous year in the figures shown against Gódvári and Kistna anikats is due to enhancement of water-rate sanctioned in G.O., No. 562, Revenue, dated 2nd August 1894.

APPENDIX VII.

ABSTRACT statement showing the demand, collection and balance under the Kurnool-Cuddapah canal for the official year 1895-96.

Items.	Cuddapah district.	Kurnool district.	Total.
Uncollected balance on 1st April 1895	Rs. 35,401	Rs. 23,609	Rs. 59,010
Net demand for the fasli year 1305 (1895-96) exclusive of remissions	56,237	† 51,770	1,08,007
Total	91,638	75,379	1,67,017
Collections including collection charges at 5 per cent. during the official year 1895-96	72,225	65,961	1,38,186
Sums written off as irrecoverable during the official year 1895-96	..	..	..
Total	72,225	65,961	1,38,186
Uncollected balance on 1st April 1896	19,413	9,418	28,831

* Difference between this and the balance shown in the last year's return is due to the adoption of revised figures.
† Exclusive of Rs. 3,500, value of water supplied to Kurnool Municipality.

Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 25th November 1896, Mis. No. 5992.

Read—the following letter from the Collector of Kurnool, dated 9th November 1896, Dis. No. 1741/Ver.:—

With reference to the last sentence of paragraph 5 of Board's Proceedings, No. 267, dated 8th October 1896, I have the honour to report that the decrease in the cultivated area under canal during fasli 1305 was due to (1) seasonable rains, in consequence of which canal water was taken for dry crops to a smaller extent, and,

(2) Combination among the ryots of some of the canal villages in the Nandikotkur, Nandyal and Koilkuntla taluks who raised unirrigated dry crops instead of paddy under the mistaken impression that the lands would be converted into wet at the resettlement (vide paragraph 18 of Jamabandi report, No. 1570/Ver. of 1896, dated 5th October 1896.

Resolution—dated 25th November 1896, Mis. No. 5992.

Submitted to Government, Public Works Department, in continuation of the Board's Proceedings quoted by the Collector.

(True Copy and Extract.)

(Signed) R. V. SRINIVASIAR,
Secretary.

ORDER—No. 303 I., dated 22nd March 1897.

Communicated to the officers concerned for information.
