PROCEEDINGS OF THE BOARD OF REVENUE
(Revenue Settlement, Land Records and Agriculture).

Read—the following letter from S. H. WYNNE, Esq., Collector and District Magistrate, North Arcot, to the Secretary to the Commissioner of Revenue Settlement, Land Records and Agriculture, dated Chittoor, 12th February 1897, Ref. on Cur. No. 3234-Ver. :—

Ambúr is a large station in Vellore taluk growing daily in importance. It is the seat of the Stationary Sub-Magistrate of Vellore taluk and forms the centre of a portion of this district comprising part of Gudiyáttam and part of Vellore taluk, as to which I often find myself in want of knowledge connected with the season. There is no rain-gauge nor are prices recorded. I have the honour therefore to recommend that Ambúr be appointed a station for registering these statistics. The Stationary Sub-Magistrate there can look after the work.

2. On receipt of Board's sanction steps will be taken for the establishment of the rain-gauge in accordance with the rainfall circular No. 1 of 1891 and with the plan and estimate approved of in B.P., dated 4th March 1893, Mis. No. 1424, Settlement.

3. The measures now in use at Ambúr are all stamped according to the standard measure in the taluk office at Vellore by the stamping establishment, the measure being one of 160 tolas (rice).

Resolution—dated 1st May 1897, No. 329.

The proposal of the Collector to make Ambúr a rain-registering and price-recording station is approved and sanctioned.

2. The Collector should apply in the prescribed form to the Meteorological Reporter to the Government of Madras for the supply of a Symon's rain-gauge, the erection of which in a suitable place selected by him will be carried out by the Public Works Department as directed in Government Order communicated in B.P., dated 10th October 1893, Mis. No. 5831.

3. The conversion table that should be used for converting the prices at Ambúr from local measures into Imperial seers will be that used for Vellore, the measure in use being the same in both places.
