FURTHER PAPERS.

G.O.	No.	Department.	Date.

Read the following letter from the
Collector of Vizagapatam, dated
22nd December 1896, Dis. No. 3498:

I have the honor to inform you
that the return called for in B. P.
No. 300, dated 30th October 1896 was
submitted on the 19th instant.
As directed in para 2 of B. P.
No. 6639 mis: dated 16th December
1896, I now append the following
remarks.

2. The paddy crop was an
failure in Savasidhi at District
Golugonda Taluk, the
yielding over to the Secretary
sub.

If the average harvested up to end of November, more than two-thirds in Golegonda and over 90 per cent in Sarvasidhi yielded nothing.

3. In Palaconda, the Tahsildar has been called on to correct his statement, as he seems to have given the estimated out-turn, instead of actual up to the end of November. About $\frac{1}{3}$ of the cultivated area in this taluk bore a satisfactory crop.

4. Cholum is not very largely grown and is still generally standing. It will outturn very poorly.

5. Cumber is reported to have yielded half crop or better. I suspect this is understated, as also is case with raji, which is on as yielding less than crop. From personal observation I should have said other crops of raji here

more quite average.

6. The yield of "all others including pulses" is shown as not better than a half crop. Here again I suspect understatement.

7. Horse-grain is not yet harvested but will yield very poorly. The area under Cotton is small and the outturn was indifferent. Indigo hardly comes within the statement for the current Hasli, and suga cane is still mostly standing, except in Palaconda, where the yield was fair.

Seeds are not yet harvested.

Resolution

Submitted for the information of Government, in continuation of Board's Proceedings, No. 466 dated 28th December 1896.
