Res. 2114 dated 6th May 1897...

Resolution

In continuation of its Proceedings Min No. 1841 dated 6th May 1897, the Board begs to report that Dr King after partially investigating the causes of the epidemic of fever now prevailing at Ennore, near, owing to the outbreak of cholera at the boat house jail, was able to complete his inquiries at present. He has, however, suggested the adoption of certain remedial measures in the meanwhile, the chief and most practical of which is to sink a hand tank with wells in each of the stations affected so as to furnish water sufficient for all domestic purposes. Inquiries were accordingly made of the General Superintendent, Presidency Public Works Workshops, and of the Commissioner of the Corporation, Madras, whether the tanks could be supplied by them. On their replying in the negative, Messrs Baker and Co were requested to supply a drinking apparatus, brass jacket tank with pump. 1 1/4" pipes and

and a revolving top colonial ^{light} pump to suit. The Board begs that its action may be approved and that sanction may be accorded for the local purchase of the articles in question at a cost of Rs 135. Should a good water-bearing stratum be tapped, an application for a sufficient number of additional tubes will be made.
