The Government resolves to invite tenders for the utilization of the water-power to be derived from the Periyár lake situated in the hills to the west of the Madura district of this Presidency. For this purpose, the following notice will be published in the marginally-noted English and Indian scientific papers and journals.

NOTICE.

WATER-POWER.

Periyár Lake—Madras Presidency.

Tenders are invited for the utilization of water flowing from the Periyár lake for purposes other than irrigation and not incompatible with the use of the water for drinking.

2. The irrigating season extends over nine to ten months, during which time the discharge is likely to be from 1,100 to about 500 cubic feet a second according to the demands for irrigation and the available quantity in the lake. Subject to the risk of interruption by accidents or drought, a supply can be given throughout the irrigation season. No supply can be guaranteed at other times, but, so long as water is available, the Government will be prepared to issue it in such daily quantities as may seem to it advisable with reference to the time which is likely to elapse before the supply is replenished by the setting in of the rains.

3. The fall from the tunnel to the foot of the hills is approximately 900 feet, and the distance measured along the course of the stream, about 6,800 feet. One cubic foot per second falling 900 feet is estimated to produce over 60 effective horse power.

4. Intending lessees should state the quantity of water required in cubic feet per second and the annual rent offered for each cubic foot per second. No rent will be charged for the first year from the date of the concession; for the second year the charge will be one-fifth, and an additional charge of one-fifth will be made every year until the full rent is reached. The whole or part of the concession may be surrendered on a year's notice being given.

5. Lessees will construct at their own expense, on plans to be approved by Government, all the weirs and other works required to divert the water from the river below the tunnel.

6. For further information, application may be made to the Chief Engineer for Irrigation, Madras, by whom tenders will be received up to 31st October 1897.

2. The following despatch will be forwarded to the Right Honourable the Secretary of State for India.

(True Extract.)
