Proceedings of the Board of Revenue
(Revenue Settlement, Land Records and Agriculture),

Dated 9th June 1897.

No. 4175-Mis.

READ... the following letter from the Collector
of Vizagapatam dated 1st May 1897,
No. 19. C. 1774.

With reference to para 5 of
Board's Proceedings No. 298 dated -
9th April '94, I have the honor to
report that the Weavers at Pondur were
offered relief under rules which I pro-
posed to submit for approval, and -
which were a modification of the Salem
rules, and which rules have now been
referred again to the Principal Assist.
and Collector for modification with
reference

reference to Board's Proceedings No. 308 dated 22nd April '94. The proposed task table is enclosed for the Board's perusal.

2. It was distinctly explained to the weavers both by the Principal Assistant Collector and the Deputy Tahsildar that the scheme included the establishment of a Kitchen for the feeding of non-working children and dependents.

Read also ^{letter} from the Collector of Vizagapatam dated 13th May 1894 No. P. C. 1691.

With reference to para 2 of Board's Proceedings dated 23rd April 1894, No. 308, I have the honor to report that the task proposed in the Adoni table is somewhat lighter than that in the table prepared by me of which

which I forward a copy for the Board's consideration. The difference is that in the latter, for which I propose to ask sanction when or if relief becomes necessary, the woman has no place and to that extent the wages paid for each cloth are less than at Adoni.

Women in this District do not weave. I do not think that the adoption of the Adoni table can do away with the need for a central Kitchen or Kitchens for the children of the weavers, which would always be necessary wherever they exist in considerable numbers.

Resolution.

In order to fix the task of weavers with some degree of uniformity, it is desirable to reduce the

the factors that have to be considered
of as small a number as possible. It
may be taken for granted that the
subsidiary operations to be performed
in connexion with the weaving of
a piece of cloth of certain dimensions
are fairly invariable, and in fixing
tasks the subsidiary operations need
not be at first considered. It
will be sufficient to consider
only the main operation — actual
weaving. The amount of weaving
demanded should as far as possible
be the same at each centre. The
standard task is the Adoni task.

Taking Kothkal Panchattu cloth as
Adoni most nearly corresponding
in breadth and quality to the
cloths proposed to be manufactured
in Vizagapatam, it is found
that a man has to weave 9 feet
a

a day. The task-table proposed for
Vizagapatam only demands $6\frac{1}{2}$ and
6 feet respectively for each kind of cloth a
day. The ~~task~~^{table} should therefore be
revised.

2. The Subsidiary operations
are generally performed by the women
or children of the weaver's family.
Although not considered in fixing
the original task, it has to be
ascertained what amount of work
the subsidiary operation necessary
to the carrying out of the task.
fixed will give in order that
payment may be made for the
works turned out. The Vizagapa-
tam table should be corrected
so as to provide the proper
payment for the performance
of the Subsidiary operations necessary

& the completion of the man's daily
 task, it being borne in mind that
 if the man's task will necessitate
 the woman working for only half
 a day, she must nevertheless get
 a full day's wage at 6 rates for
 the particular day or days in
 which she was employed on
 subsidiary operations -
