READ the following letter from the Collector
of Cuddapah, dated 27th May 1897, re-
ference on Current No. $\frac{312}{7}$ of '97:-

I have the honour to correct an
error in the fortnightly-narrative for
the 1st fortnight of May '97 regarding
the supply in the Kurnool-Cuddapah
Canal. The Deputy-Collector, Cud-
dapah Division reported in his for-
-nightly narrative that "the Kurnool
-Cuddapah Canal is flowing and
water is being supplied to tanks".
When my narrative was compiled
I doubted the accuracy of the
statement.

Statement as the Canal had been closed for repairs, but as the Dy. Collector made the statement I did not think it right to omit it from mine.

2. Upon enquiring after my return to Head quarters, I have learnt that no supply was let into the Canal. That about the beginning of May, there were slight freshes in the Pennair. The Pennair river water appears to have gone down the Canal towards Cuddalore for a short time and the 2nd Crop paddy in Machipalli which was beginning to wither was benefited, but the supply in the Canal was short-lived and there was no re-opening of the Canal or letting in of regular supply into the tanks from the Tungabhadra. I have called on the Dy. Collector for an explanation.
