Resolution

Submitted to the Government with reference to para 12 of Government Order, No. 735 Rev., dated 21st December 1896.

2. The Collector reports that the ^{staff} ~~supply~~ of 69 nirkantis already sanctioned by Government will meet the requirements of the canal villages in his district. The annual cost of this establishment will be Rs. 5512 and not Rs. 5712 as stated in the Government Order.

3. In working out the requirements of the ^{district} on the figures of fasli 1305, a single nirkanti is provided in several instances where the scale allows two ^{man} ~~man~~. But as both the Special Deputy Collector and the Collector agree that a single nirkanti is sufficient in each of ^{these} ~~these~~ cases, the Board considers that the deviation from the scale may be permitted.

To

The Secretary to Govt. L. D.
with a letter & 2 Encls.,
The Collector of Cuddapah.

C. No. 5143 of 97.

N O T E.

In connection with the revision of Village establishments of the Kurnool District, the Special Deputy Collector, Kurnool-Cuddapah Canal, who was consulted by the collector at the instance of the Board, strongly recommended the appointment of special nirgantis for the villages commanded by the Canal, for distribution of Canal water within village limits and proposed the following scale :-

Extent in acres.	No. of men.	Permanent or temporary.
100 to 200	1	Temporary.
200 to 400	2	Temporary.
400 to 600	2	Permanent
600 to 1000	3	Permanent.
over 1000	4	Permanent.

The Deputy Collector of Cuddapah Division, who was also consulted on the point, urged the necessity for the employment

The Hon. Mr. G. V. C. R.

*9/12/97
12/17/97*

employment of special nirgantis but suggested a modified scale according to which all the nirgantis would be permanent men. The Special Deputy Collector and the Collector of Kurnool having agreed that it would be advantageous to have permanent men, the Board recommended a permanent staff of 64 nirgantis for Kurnool and a similar staff of 69 men for Cuddapah at a cost of Rs. 3,072 and 3,312 respectively. The Government accepted the Special Deputy Collector's scale with the modification that all the men should be permanent and approved the Board's recommendation as to numbers and cost. But as irrigation under the Kurnool-Cuddapah Canal has been increasing and as the number of nirgantis to be employed has to be calculated with reference to the extent under cultivation, the Collectors of Kurnool and Cuddapah were directed to work out the actual requirements with

with reference to the most reliable figures available and to report if any modifications were needed. The Collector of Cuddapah accordingly submits a list of the villages commanded by the Kurnool-Cuddapah Canal, shewing the number of nirgantis proposed for each by the Special Deputy Collector, his calculations being based on the cultivation statistics of Fasli 1305 (1895-96) which is the latest normal year. It will be seen from the Collector's letter and the lists which accompany it that the 69 nirgantis already sanctioned by Govt. for Cuddapah meet the requirements of the Canal villages of the Dt.

The Board, in para 3 of its Proceedings read above, observes that in working out the requirements of the district, a single nirganti is provided in several instances where the scale allows two men, but, as both the Special Deputy Collector and the Collector agree that a single

nirganti

nirganti is sufficient in such cases,
it considers that the deviation from
the scale may be permitted. It is
submitted that this may be approved,
especially as in the instances referred
to, the extent of irrigation ranges
from 200 to 400 acres for which the
Special Deputy Collector originally
proposed only two temporary men.

The following draft is submitted.

G. O. Mds. No. 3374 of 5th July 1917

The Collector's proposals
which are supported by the Board of
Revenue are approved and sanctioned.
