REVENUE BOARD OFFICE MADRAS.

Proceedings of the Board of Revenue

(Revenue Settlement, Land Records and Agriculture.)

Dated 18th June 1897.

No. 4435 Mis.

READ the following letter from the Collector of Madura dated 20th April 1897 Reference on Circular No. 761 / General of '97.

The North East Monsoon threatened to be a failure in September and October last. The ryots of Sennagaram-patty and some other villages in the Melur Taluk to which the Periyar channel had not

not been extended, applied for permission to dig channels themselves and take the Periyar Valer from the end of the 12th reach of the Periyar main channel at Pulipatty, five miles from Melur. The permission was accordingly granted and the fact was brought to the notice of the Board in the Special Deputy Collector's Quarterly Progress report submitted with this Office Disposal No. 311 dated 9th February 1894. As already reported, though the ryots incurred much trouble and expense in this matter, they did not derive much benefit

Receipt letter passed in BP 400 25-5-97

and were not much better off than villages not supplied with Periyar Valer at all. The Divisional Officer and the Special Deputy Collector are of opinion that some concession should be shown to them, as the Valer was taken to these villages by the ryots at their own cost and suggest that remission of the enhanced rates may be granted according to the following Scale -

Under rules of the rules appended to Govt. Lr. Passed Bills and assessments on all wet lands in the Madura and Tinnevelly Talukas were raised on the introduction of the Periyar Valer.

If the additional rate is

	Rs 3	Rs 2½	Rs 2
Remission for irrigation supplied in September	1	¾	½
Do in October	1½	1⅛	¾
Do in November	2	1½	1

2. The proposal is — reasonable and the Scale of remission, as fair a scale as can be devised - I have therefore the honor to request that the Board will be pleased to accord its sanction for granting these remissions -

3. It is proposed not to charge enhanced assessment at all for 1st crop in case of lands first supplied with Periyar Water in December or Subsequent months, as there was an ample rain supply.

4 - A Statement showing the extent irrigated with Periyar Water in September and Subsequent months by means of the private channels excavated at the ryots' cost and a rough memo of the calculation showing how the Scale of remissions now proposed to be granted was arrived at, are herein enclosed for the Board's information - The ryots Spent Rupees 1,030 - 0 - 0 on excavation and the general result of the above proposals is that Rupees 3,250 are remitted and Rupees 2400 charged -

Read also letter from the Collector of Madura - dated 5th June 1897 — Reference on Current No. 761/Guard of

of 97 requesting favour of early orders on this Office letter Reference on Current No. 761 dated 20th April 1897 — recommending the remission of portion of the enhanced Periyar assessment for certain lands in the Melur Taluk -

Resolution.

On the letter first read above, the Collector of Madura reports that - owing to the threatened failure of the North East Monsoon rains in September and October last, the ryots of certain villages in the Melur Taluk, Silligalai near Pulipatti where the Periyar main channel ends, carried water to their lands after obtaining the necessary permission by channels dug at their own cost, but that - owing to subsequent heavy rainfall, their lands did not derive any special benefit from the irrigation and were not much better off than lands in villages not supplied with Periyar water. He therefore recommends that a portion of the increase in assessment, to which the lands are liable in consequence of the supply of Periyar -

Rules in B.P. revised No. 4817 2543

5

Perigar Valei may be remitted according to the following Scale:-

For irrigation
Supplied in

September	30 per cent of the increase in assessment on the average
... October	45 %
... November ...	60 %
... December and Subsequent months ...	100 %

2. The Collector has forwarded ~~the~~ two Statements, one showing the area irrigated in each month and the other the amount of remission according to his proposals. The latter Statement shows that about Rupees 3250 will have to be remitted, out of a total increase of Rupees 5944 in the assessment.

3. It is not stated whether at the time permission was granted to the ryots to dig their own channels any concession was asked for or promised regarding the payment of enhanced assessment, considering however that the channels were dug at the ryots' own expense and that Perigar Valei appears to have been taken for a short time only and not for the entire period during which the crops were on the ground, the Board concurs in the Collector's view that the full increase in assessment should not be levied and approves the

the scale of remission proposed by him
~~by him~~ 4. The expenditure incurred
by the ryots in digging channels
is stated in the Collector's letter
@ Rupees 1030 last accord-
ing to the entries in the last
column of the first of the
two Statements referred to
in para 2 above, this amount
represents the expenditure in
only five out of the eight
Villages. It is presumed that
the total expenditure, including
that incurred in the three
remaining Villages was
Rupees 1350 as —
entered at ~~the~~ bottom
in
in the column referred to.
