READ—the following papers :—

From Major W. L. C. BADDELEY, R.E., Superintending Engineer, II Circle, to the Collector of Kistna, dated Bezvada, 12th December 1896, No. 2580 K.N.

With reference to G.O., No. 1756 W., dated 16th July 1896, I have the honour to forward, herewith, plans and estimates amounting to Rs. 26,500 for constructing Deputy Tahsildar's office at Macherla in Dáchépalle taluk, and to request that you will be so good as to countersign and forward them to Government for sanction.

Submitted, with the plans and estimates duly countersigned, to the Chief Secretary to Government, Public Works Department, with reference to G.O., No. 1756 W., dated 16th July 1896, for sanction.

MASULIPATAM,
9th January 1897.

(Signed) N. S. SOMASUNDARA SASTRI,
for Collector.

Memorandum to the Suptg. Engineer, II Circle, dated 1st March 1897, No. 1191 C.

From Captain W. M. ELLIS, R.E., Executive Engineer, Kistna Northern Division, to the Superintending Engineer, II Circle, dated 14th May 1897, No. 141 S.E.

With reference to your endorsement, No. 3514 K.N., dated 6th March 1897, on memorandum by Chief Engineer, No. 1191 C. of 1st March 1897, I have to report—

(1) That the site at Macherla was selected after personal inspection and a good deal of discussion, and I believe it to be decidedly the best.

(2) That the trial pit originally dug was probably near the south-west corner of the site where the black cotton soil runs deep.

The further excavations now made disclose the fact that a kunker knoll crops up to within 3 feet of the ground surface near the centre of the site, whereas along the front line the kunker is more than 7 feet below the black cotton. The sketch herewith and sections showing the pits excavated and section of the well may lead one to suppose that—

- (a) Sound kunker will be met with at an average depth of not more than 5' 6".
- (b) The nature of the sub-soil now disclosed will enable not only the depth but the spread of the foundations as originally designed to be reduced. The spread of the widest foundation might, probably, be reduced from 6' 6" to 5', and the others in proportion.
- (c) The depths of the foundations will probably not be uniform, the kunker being at various depths below ground surface.

(3) There is a fairly good site at Tummercecode. The foundations would be red soil of uniform quality down to 12 feet deep, but in view of the facts now disclosed and the decision that Macherla was a better place for the Deputy Tahsildar's office, a detailed report about this seems now unnecessary.

No. 537 K.N.

Forwarded to the Chief Engineer, Public Works Department, with reference to his No. 1191 C., dated 1st March 1897.

- 2. The original papers received from the Chief Engineer are herewith returned.
- 3. The undersigned inspected the site at Macherla some months ago and it is certainly the best available in that village.

(Signed) W. M. ELLIS,
for Superintending Engineer, II Circle.

21st May 1897.

ORDER—No. 1665 W., dated 17th June 1897.

The estimate, amounting to Rs. 26,000, for constructing a Deputy Tahsildar's office at Macherla in the Kistna district, is sanctioned for execution when funds are available.

2. This sanction has been registered as Provincial No. 16 W. of 1897-98, and classified as Civil Buildings—Original Works.

(True Extract.)

C. M. M. M.
Under Secretary to Government.

To the Superintending Engineer, II Circle.
