57.97.

Circular No. 11.

FROM

B. RIBBENTROP, ESQ., C.I.E.,

Inspector General of Forests to the Government of India,

TO *The Secretary to the Govt. of Madras,
Revenue Department.*

Simla, the 16th June 1897.

SIR,

I have the honour to invite attention to the book noted in the margin and to suggest, for consideration, that it might be advisable if two copies of it were purchased for the use of each Forest Circle in *the Madras Presidency.*

"Diseases of plants, induced by cryptogamic parasites." By Dr. K. Von Tubeuf; English edition by William G. Smith, B. Sc., Ph. D., Lecturer on Plant Physiology, University of Edinburgh.

It is obtainable from Messrs. Thacker and Company, Bombay.

2. The book, of which I have bought a copy, is the only one of its kind which has as yet appeared in the English language; it is a store of the most useful information, and its study may, it is hoped, lead to more scientific enquiries as regards the appearance of cryptogamic parasites, which have been noticed in teak, sissu, exotics, fruit trees and others, but which as yet have never been systematically studied.

3. A perusal of the book will show that it is not merely of importance for the forester, but of equal and perhaps greater interest for the agriculturist.

I have the honour to be,

SIR,

Your most obedient Servant,

B. Ribbentrop
Inspector General of Forests.
