Proceedings of the Board of Revenue

(Land Revenue),

Dated 13 July 1897.

Forest No. 275 Press ~~Miscellaneous~~

READ Government order, Revenue Department, No. 387, dated 26 May 1897.

Read Errata to the above from the Acting Secretary to Government, Revenue Department, dated 5th July 1897.

Resolution

Communicated to all Collectors and Conservators of Forests.

2. With reference to item (3) of the Government Errata, the Board beg leave to point out that "Iron ore" and the entries against it have to be omitted also in the notification relating to the Cuddapah District (vide page 25 of the GO).

3 Referring to para 1 (3) of the GO the Board direct that the rates charged for trees not in the classified list, and for bamboos and salt and horn required for other than domestic & agricultural

and
ed
rates
the
writ

agricultural purposes shall not exceed those prescribed for trees under Class II. When bamboos are sold by numbers as is usual in South Canara and Malabar the maximum charge shall be Rs. 1-8- per 100 or Rs 15 per thousand.

4. The Board takes this opportunity of repeating its instructions that, save in forest tracts where there is an abundant surplus supply, timber on unreserved land should be given on seigniorage for local use only, and not given out in large quantities to traders.

Read—again Proceedings of the Board of Revenue (Land Revenue), Forest No. 133, dated 5th March 1895.

ABSTRACT.—Informing all Collectors and Conservators of Forests that all the important trees under class III of the existing seigniorage lists should be specially named in the new lists of classified trees called for in Board's Proceedings, Forest No. 558, dated 24th August 1894, and directing that certain trees in the existing lists be treated as unclassified trees for the purposes of Rule 7 of the rules under section 26 of the Forest Act.

Read—again the following Proceedings of the Board of Revenue (Land Revenue), Forest No. 177, dated 8th April 1895 :—

Read—file of reports received from Collectors regarding the alterations to be made in the lists of classified trees.

Resolution—Forest No. 177, dated 8th April 1895.

The Collectors' reports read above relate to the revision of the lists of classified trees rendered necessary by the new rules under section 26 of the Forest Act—*vide* paragraph 2 of Government Order, No. 489, dated 9th July 1894, and paragraph 3 of Board's Proceedings, No. 558-F., dated 24th August 1894.

2. The reports have not been prepared on a uniform principle, and in some districts the effect of the provisions of the new Rule 7 does not seem to have been fully understood. In many cases also the necessity for changes proposed in the existing lists have not been fully explained.

3. The Board therefore resolves to return the lists to the Collectors concerned and request them to revise and resubmit them to the Conservators who should send them on to the Board after all have been received, accompanied by a tabular form

showing the proposals for each district as amended by them, and noting the grounds for any alterations in the lists prepared by the Collectors. A separate notification will issue for each district, but the tabular forms will also be printed for reference in the offices of control. In Board's Proceedings, No. 133-F., dated 5th March 1895, the Board has issued instructions which will obviate any material inconvenience to the public or risk to the Government revenue while the revised lists are under preparation.

4. In paragraph 4 of the rules under section 26, certain trees are shown as reserved, but power is given to the Collector with the concurrence of the Conservator to transfer any reserved tree to the lists of classified trees. The effect of the paragraph is merely to prescribe that no tree not shown in that list shall in any district be treated as a reserved tree, and it will be convenient therefore that the lists now called for should show the trees which it is proposed to treat as reserved in the district to which the list refers. From Board's Proceedings, No. 133-F., dated 5th March 1895, Collectors will have seen that the Board proposes as a general rule to treat as classified trees only those shown under class I or class II or specified by name in class III in the existing list; but on special cause being shown others may be added or species now included in classes I and II may be removed from the lists altogether. It is intended that the concession made in the new Rule 7 shall be of real benefit to the people in well wooded districts, and no attempt should be made to nullify it by drawing up a practically exhaustive list of all the trees in a district. No doubt there will be a risk of abuse, but the privileges which it has been decided to allow to the agricultural population must not be unduly trenched upon in an endeavour to obtain absolute security. There is no objection to the lists containing seigniorage rates for trees not included in the classified lists under the heading "The following rates refer only to trees on reserved lands."

(True Extract.)

(Signed) L. M. WYNCH,
Secretary.

To all Collectors, with lists returned.
" Conservators.

Read—also the following letter from E. P. POPERT, Esq., Conservator of Forests, Central Circle, to the Secretary to the Commissioners of Land Revenue, dated Kumbakónam, 2nd December 1895, No. 1040 :—

[*Reference.*—Board's Resolution, Forest No. 177, dated 8th April 1895.]

In accordance with the above, I have the honour to resubmit Collector's list together with three statements showing—

A. Reserved trees.
B. Classified trees.
C. Barks and leaves.

Any alterations proposed by me have been noted with reasons.

ENCLOSURE A.—Statement showing reserved trees.

ENCLOSURE B.—Statement showing classified trees.

ENCLOSURE C.—Statement showing the names of barks and leaves.

Resolution—Forest No. 256, dated 9th June 1896.

Submitted to Government.

2. In the penultimate sentence of paragraph 2 of its order, No. 489, Revenue, dated 9th July 1894, Government directed that the existing lists of classified trees should be carefully revised and submitted for its approval, but, pending the publication of the revised lists, the Board directed that all trees not specially named in class III in the existing notifications should be treated as unclassified for the purposes of Rule 7 of the General Rules under section 26 of the Forest Act.

3. The revised lists submitted by Collectors with reference to the Government Order quoted above, not having been prepared on a uniform principle, were returned to them with detailed instructions as to how they should be revised; and the Conservators were requested to submit tabular statements showing their amended proposals for each of the districts in their circles.

4. The Conservator of Forests, Central Circle, now forwards the lists submitted by the Collectors of the districts in his circle, together with three consolidated statements showing the names of the trees proposed to be treated (1) as *reserved trees* and (2) as *classified trees* and (3) the names of the barks and leaves to be classified in each district.

5. Since the submission of the Conservator's consolidated lists, the Board's Forest Member has discussed the subject with Mr. Popert and has found it necessary to strike out a number of trees from the Conservator's list of classified trees with a view to make the concession granted in Rule 7 of the Rules under section 26 of the Forest Act—one of real benefit to the people. It has also been found necessary to reduce the classification proposed in some cases in which no valid reasons have been assigned for raising the class. Thus *Acacia Arabica* was allowed to be removed free of charge in the Cuddapah district until the abuse of the concession led to its being notified as a II-class tree (*vide* G.O., No. 445, Revenue, dated 13th July 1895). The Board now considers it sufficient to put it in the III-class. A statement showing the trees, &c., proposed to be treated as classified, as amended by the Board, is herewith submitted, together with revised draft notifications for approval and publication in the *Fort St. George Gazette*.

6. Collectors will clearly understand that the rates proposed are only maximum rates and that it is open to them to reduce the classification according to necessity, but it is desirable that the Conservator of the Circle should be consulted before action is taken.

7. The high rate for rattan in the Chingleput district is proposed, with a view to check its excessive use, as it is a sparsely growing product.

8. The following alterations have been made in the rates proposed by the Collector of Chingleput:—

(1) For the date (*Phœnix Sylvestris*), the Collector proposes Rs. 1-4-0 per cart-load. In the absence of special reasons, the Board has fixed it at Re. 1 per tree, which is the rate proposed in other districts.

(2) The Collector proposes to charge a grazing fee of Re. 1 per head on goats as they are browsers and destroyers of forests. The Board would retain the present rate of As. 1-6 per head; as the remedy for the evil lies, not in enhancing the rate, but in setting apart special areas for them, as suggested by the Conservator of Forests, Central Circle (*vide* Board's Proceedings, Forest No. 602, dated 11th October 1895). In the present notification, however, no reference is made to grazing fees in any district, as no such fees can be levied in unreserved areas to which the notification primarily applies. The same principle governs more or less, the case of leaves for manure for the removal of which from reserved areas special seigniorage rates have been prescribed in Government Order embodied in Board's Proceedings, Forest No. 624, dated 29th August 1893.

(3) For rough and chiselled stone, the Collector's rates are 2 and 8 annas per cart-load, respectively; while the existing rates are 1 and 2 annas, respectively. The increased rates are said to be commensurate with the sale rates. The Board has, however, retained the existing rates for the present. The Collector may submit a special report if he considers it necessary to adopt the enhanced rate in future.

9. In Nellore no reason has been assigned for the increased rates proposed for charcoal. The Board would retain the existing rates until good cause is shown for the change.

10. In South Arcot, the Collector proposes to charge Rs. 20 per cart-load for the bark of Ventilago Maderapatana (Vembadam). The Board would fix it at Rs. 10 which is the maximum rate now levied in other districts, unless special reason is shown for the proposed increase.

11. The Board has added the following general note under class III in the revised notifications now submitted:—

"Unclassified trees and forest produce in reserved lands and unclassified trees and forest produce on unreserved lands, except those removed free under Rule 7 of the rules under section 26 of the Forest Act are chargeable at such rates as may be decided upon from time to time by the local authorities."

12. Collectors will understand that, save in forest tracts, where there is an abundant surplus supply, timber on unreserved land should be given on seigniorage for local use only and not given out in large quantities to traders.

13. The lists for the Northern and Southern Circles will be submitted to Government separately, but the remarks in paragraphs 11 and 12 *supra* apply to the districts in those circles also.

ABSTRACT.—Informing all Collectors and Conservators of Forests that all the important trees under class III of the existing seigniorage lists should be specially named in the new lists of classified trees called for in Board's Proceedings, Forest No. 558, dated 24th August 1894, and directing that certain trees in the existing lists be treated as unclassified trees for the purposes of Rule 7 of the rules under section 26 of the Forest Act.

Read—again Proceedings of the Board of Revenue (Land Revenue), Forest No. 177, dated 8th April 1895.

ABSTRACT.—Passing orders on reports received from Collectors regarding the alterations to be made in the lists of classified trees and calling for revised lists prepared in accordance with the instructions now issued.

Read—also the following letter from E. D. M. HOOPER, Esq., Acting Conservator of Forests, Southern Circle, to the Secretary to the Commissioners of Land Revenue, dated Coimbatore, 3rd March 1896, Dis. No. 718 :—

I have the honour to forward the enclosed lists of classified and reserved trees as proposed by the Collectors of this circle.

I would remark as follows :—

The list of reserved trees in the Nilgiris should, I think, include *Sapindus emarginatus*, *Xylia dolabriformis and Mangifera Indica* since they are not even classified and therefore exposed to cutting and removal from all unreserved lands without permit.

The recommendations to include three additional species under class I and two under class II are supported.

In Madura it is proposed to add to class I no less than nine species, of which *Terminalia tomentosa*, *Lagerstræmia microcarpa* and *Strychnos nux-vomica* were hitherto unclassified; the remaining six, viz., *Cedrela Toona*, *Albizzia Lebbek*, *Albizzia odoratissima*, *Eugenia jambolana*, *Melia Indica* and *Vitex Altissima* have been transferred from the second class, their places being taken by *Schleichera trijuga*, *Acacia Arabica*, *Acrocarpus fraxinifolius*, *Chickrassia tabularis*, *Michelia champaca* hitherto unclassified.

The additions to class III comprise *Acacia leucophlœa* reduced from class II and *Bischoffia Javanica*, *Emlica officinalis*, *Melia azadirachta* hitherto unclassified.

It is to be noted that the rattan and bamboos are omitted probably by mistake.

In Tinnevelly the only change proposed is the addition of seventeen species to the third class, of which *Acacia sundra* has been a reserved tree and *Cyperus rotundus* is a simple sedge grass used for thatching, while *Cochlospermum* might be omitted altogether.

In Coimbatore North it is proposed to degrade *Chloroxylon swietenia* and *Acacia sundra* and *Acacia catechu* from being reserved trees to the second class. Six other ordinary reserved trees until lately included in the first class have been raised to be reserved trees. *Acacia leucophlœa* has been reduced to second class.

To the first class it is proposed to add nine species—*Terminalia tomentosa*, *Albizzia lebbek*, *Albizzia odoratissima*, *Cassia fistula*, *Adina cordifolia*, *Michelia champaca*, *Vitex altissima*, *Canarium strictum*, *Vateria Indica*—from the former second class and one unclassified tree, *Schleichera trijuga*.

Promotions to second class include *Feronia* and *Acacia planifrons* also on account of their barks *Cassia auriculata* and *Ventilago Maderaspatana*. Apparently by mistake palmyra, canes and bamboos have been omitted.

In South Coimbatore, viz., *Xylia dolabriformis*, *Pterocarpus marsupium*, *Artocarpus hirsuta* and *Artocarpus integrifolia*, have been raised from first class to their original position as reserved trees, as also *Mangifera Indica* from class II, while four other species, viz., *Hardwickia binata*, *Shorea laccifera*, *Shorea tumbuggaia* and *Chloroxylon swietenia*, have been excluded from the list of reserved trees and definitely put into the first class along with *Acacia catechu*, which although in the list of reserved trees was hitherto treated as a second class tree. New additions to the first class comprise *Terminalia tomentosa*, *Terminalia paniculata* and *Lagerstræmia microcarpa*, all raised from class II in which have been included *Stereospermum chelonoides* and *Stereospermum xylocarpa*, *Nauclea parvifolia*, *Albizzia amara*, *Bauhinia racemosa* hitherto unclassified, and *Acacia leucophlœa* formerly a first class tree.

Class III includes for the first time *Briedelia retusa*, *Wrightia tinctoria*, *Morinda citrifolia*, *Ulmus integrifolia*, *Cordia Rothii* and the bark-yielders—(i) *Cassia auriculata* (ii) *Ventilago Maderaspatana*; (iii) *Sanseviera zeylanica*.

In South Canara I have no means of comparing the changes proposed.

In Malabar the old list of the northern division is declared to hold good, but both District Forest-officers declare the reserved list to be incomplete and propose between them that Government include in it the following species which in the Malabar district are of especial value :—

Terminalia tomentosa.	Albizzia lebbek.
Lagerstræmia microcarpa.	Cynometra ramiflora.
Canarium strictum.	Briedelia retusa.
Mesua coromandeliana.	Caryota urens.

I am not prepared myself to confirm this proposal completely, and as the matter is one for separate consideration it need not be decided now beyond keeping them in the first class.

The transfer between classes proposed by Mr. Hadfield in South Malabar are as follows :—

From reserved to class I—	From reserved to class II—
Artocarpus integrifolia.	Mangifera Indica.
Do. hirsuta.	Pongamia glabra.
Xylia dolabriformis.	

The proposed additions to class I from the unclassified trees are *Dysoxylum malabaricum*, *Nauclea cadamba*, and similarly to class II *Lagerstræmia Reginæ*.

It will be noted that nearly all officers include a very considerable number of species under the new class III. In this class I would certainly include bamboos, valuable grasses, canes, reeds and bark-yielding shrubs.

ENCLOSURES NOS. 1 TO 7.—Reports from Collectors submitting lists of classified trees.

ENCLOSURE No. 8.—List of reserved trees as proposed by the Collector.

ENCLOSURE No. 9.—List of trees classed under class I.

ENCLOSURE No. 10.—List of trees classed under class II.

ENCLOSURE No. 11.—List of trees classed under class III.

Resolution—Forest No. 321, dated 20th July 1896.

Submitted to Government in continuation of Board's Proceedings, Forest No. 256, dated 9th June 1896.

2. With the letter read above, the Conservator of Forests, Southern Circle, forwards with his remarks the revised lists of classified trees furnished by the Collectors of the districts in his circle.

3. The Collector of Malabar proposes to add certain new trees to the list of reserved trees already sanctioned by Government. The Board does not support this proposal as the list of reserved trees is already sufficiently large.

4. In the districts of Madura, Coimbatore and South Canara, certain trees which are treated as class II in the existing list are to be treated as class I in the proposed list. The Collector of Coimbatore states that certain species proposed to be transferred to class I are more valuable than the others in class II. No explanation is given for the transfers proposed in the other districts; but the classifications, which have the approval of the Conservator have doubtless been made with reference to local conditions. In the Nilgiris the rates for classified trees are given in the existing lists at so much per tree as well as so much per cubic foot. In the revised lists the rates are given at so much per cubic foot only and have been increased. The latter may be adopted. In Malabar and South Canara, on the other hand, the rates are given per tree both in the existing and in the revised lists. In the latter district the rate for class I has been slightly raised. With regard to the new trees proposed to be treated as "classified" in the several districts, the Board has struck out such as have not been retained in the Central Circle in the case of species which occur in that circle also and has further removed from the list any tree which is common throughout the Presidency, but is proposed, without special explanation, to be classified in one district only. The list as thus amended is printed as appendix A. The increase in number as compared with the list for the Central Circle is mainly due to species in the west coast districts and in Nilgiris. Any additions or alterations to this list which Collectors may consider necessary may be proposed hereafter, but only if very strong special grounds can be shown for them.

5. Bamboos, rattan and reeds which are included in the existing lists have been retained in the proposed lists also. But the terms "valuable grasses" and "bark-yielding shrubs" which the Conservator proposes to insert under class III are indefinite and have accordingly been omitted. Grasses required for fodder or thatch or mat-making should not be included in the list as villagers are allowed to take them free, and the surplus left after meeting their requirements may be sold at the will of the department. In South Coimbatore the Collector proposes to charge Rs. 25 per cart-load for the bark of *Ventilago Maderaspatana* (Vembadam), but the Board is not prepared to accept the increase unless special reason is shown for it.

6. As pointed out in dealing with lists for the Central Circle, Collectors will understand that except in forest tracts where there is an abundant surplus stock, timber on unreserved land should be given on seigniorage for local use only, and not given out in large quantities to traders.

7. Revised notification drawn up in accordance with the foregoing remarks are submitted for approval and publication in the *Fort St. George Gazette*.

8. Collectors will also be requested to notify throughout the villages in a simple form, free from all details of seigniorage rates, &c, a list of all trees and produce which for any reason cannot be removed for local use under section 7 without special permission.

ABSTRACT.—Informing all Collectors and Conservators of Forests that all the important trees under class III of the existing seigniorage lists should be specially named in the new lists of classified trees called for in Board's Proceedings, Forest No. 558, dated 24th August 1894, and directing that certain trees in the existing lists be treated as unclassified trees for the purposes of rule 7 of the rules under section 26 of the Forest Act.

Read—again Proceedings of the Board of Revenue (Land Revenue), Forest No. 177, dated 8th April 1895.

ABSTRACT.—Passing orders on reports received from Collectors regarding the alterations to be made in the lists of classified trees and calling for revised lists prepared in accordance with the instructions now issued.

Read—also the following letter from A. W. PEET, Esq., Conservator of Forests, Northern Circle, to the Secretary to the Commissioners of Land Revenue, dated Waltair, 24th March 1896, No. 1744-C. :—

Subject : Classification of trees for the Northern Circle.

[*Reference.*—Board's Proceedings, Forest No. 177, dated 8th April 1895.]

I have the honour to say, in answer to the above reference, that the proposals from the various districts were sent in somewhat irregularly ; and in many instances they are destitute of all semblance of order. Even now the question is rather complicated, because it seems advisable to enter some trees on the list which are either not native or doubtfully so : but in many cases introduced trees are found in the forests as now constituted, because the limits of the forests have changed at various times and sites of old villages, old topes and abandoned avenues are now in some cases parts of the forests.

2. There is a further difficulty, viz., in separating the range of vegetation, because the vegetation of many districts overlaps border districts and after attempts at making separate lists for the various districts it seems to me advisable to suggest one list for the circle ; so that if the tree named is found in any district it will be found classified. The lists are by no means exhaustive, for the District Forest-officer, Kistna, mentions having come across 301 species of trees and I would refer to the remarks on this subject in the letter (in original to be kindly returned) accompanying the Kurnool proposals. Most of the trees named will be found to be worth classifying either for timber or fruit or other useful product. It may very likely happen that additions to the lists will be necessary, for I note that no proposals are made for classification of any of the Dilleniaceæ or Sterculiaceæ, for example, and more practical attention will be paid to a study of timbers when the press of settlement and demarcation is no longer felt.

3. In the file sent herewith is enclosed a list (appendix A) of the proposals sent in district by district from which it will be seen that there is no arrangement on any fixed principle. I have therefore re-arranged the district proposals according to the natural orders of the trees and shown the proposed classification in a tabular (appendix B) form. Some of the proposals will have possibly to be varied by special order in some districts ; for instance, Acacia Arabica is entered in the first class, because it is important to have it in that class for Kistna, Bellary and possibly Anantapur ; but it may be relegated to the second class, if necessary, for other districts, and so on. A list of my proposals is herewith submitted. In the remark column the word "timber" is used in the sense of the definition in the Forest Act, irrespective of size.

4. Cassia auriculata, the tangedu shrub, has been entered in the list of proposed reserved trees on account of its great value, but it may be held to be sufficiently guarded under special rules.

ENCLOSURE No. 1.—Conservator's list of proposed classification of trees in the Circle.

ENCLOSURE No. 2.—Appendix A—Classification of trees as proposed by District Forest-officers.

ENCLOSURE No. 3.—Appendix B—Classification of trees proposed by District Forest-officers arranged in natural orders.

ENCLOSURE No. 4.—Collector's list of classified trees proposed for the Kurnool district.

Endorsement of the Collector of Tanjore, dated 21st June 1896, No. 5.

Submitted to the Board of Revenue (through the Conservator of Forests, Central Circle) for orders. I concur with the District Forest-officer and would recommend that casan may be included in the list of classified trees of this district.

Endorsement by E. P. POPERT, Esq., Conservator of Forests, Central Circle, dated 28th June 1896, No. 2296.

Forwarded.

Resolution—Forest Mis. No. 1011, dated 20th July 1896.

The Board is not disposed to make any additions to the lists of classified trees submitted to Government in Board's Proceedings, No. 256, dated 9th June 1896.

2. As pointed out in paragraph 3 of Board's Proceedings, No. 39, dated 28th January 1896, the forest growth on unreserved lands in thickly populated localities will certainly disappear unless the village populations themselves take steps to arrange for its conservancy, and the present seems to afford a fair opportunity of testing whether the hope that they may do so is purely utopian. When notifying the disafforestation of the reserves in question, the Collector should at the same time take pains to make it widely known in the villages concerned that the growth is left for the use of the villagers under the conditions laid down in rule 7 of the rules under section 26, and that any one who appropriates any portion of it in excess of his legitimate requirements or for sale beyond the limits of the villages will be liable to prosecution.

Acting Secretary.

To the Collector of Tanjore, through the Conservator of Forests, Central Circle.
Copy to the Secretary to Government, Revenue Department.

Order—Mis. No. 4990 Revenue, dated 7th December 1896.

The Board's proposed alterations in the list of classified trees have been carefully considered by Government which desires, before issuing final orders on the matter, to be in possession of more detailed reasons for the proposals. The Board will accordingly be requested to state the grounds upon which it has recommended either (i) enhancement of rates, or (ii) the transfer of trees from the classified to the reserved list, in cases which have not been dealt with in detail in the Proceedings already submitted. The issue of the Forest Manual need not be deferred, pending the passing of final orders on this question. The classified lists, as finally revised, may be published as an addendum thereto.

(True Extract.)

(Signed) G. STOKES,
Ag. Secretary to Government.

To the Board of Revenue (Land Revenue), with enclosures.

Read—also the following Proceedings of the Board of Revenue (Land Revenue), Forest No. 76, dated 22nd February 1897 :—

Read—Government Order, Mis. No. 4990, Revenue, dated 7th December 1896.

Resolution—Forest No. 76, dated 22nd February 1897.

In reply to the Government Order read above calling for more detailed reasons for the proposed alterations in the lists of classified trees for the several districts in the Presidency, the Board resolves to submit to Government the accompanying statement A containing full particulars of the proposed changes together with the reasons therefor. It will be observed from the abstract statement B appended that, except in a few districts of the Northern and Southern Circles, the proposed revision will, if approved by Government, materially reduce the total number of trees at present entered in classes I and II. The details of classification of course vary in several instances, as they have been arranged "in accordance with the local requirements of the several districts" as required by rule 4 of the general rules under section 26 of the Forest Act.

2. All trees which do not find a place either in class I or class II in the existing lists were regarded as belonging to class III and charged for accordingly (*vide* entry "all other descriptions of trees" under class III in the sanctioned lists), until the issue of the revised rules under section 26 of the Act, after which, as a temporary arrangement pending a systematic revision of the classified lists, the Board directed in Proceedings, No. 133, dated 5th March 1895, that all trees not specifically named in class III should be treated as "unclassified trees." In the revised lists now submitted, a number of trees have been reduced from class I or class II to class III and only a few important trees not coming either under class I or class II have been entered under class III, while many other species have been left out as "unclassified trees" for the free use of the villagers for agricultural or domestic purposes. Thus everything has been done to simplify the lists of classified trees and to render the concession granted in rule 7 of the rules under section 26 practically valuable to the people.

3. The sanctioned rates for a cart-load of classified wood in the rough are Rs. 5, Rs. 2–8–0 and Rs. 1–4–0, respectively, for the three classes; but, in the districts of Malabar, South Canara and Nilgiris, the rates are given at so much per tree as already explained in paragraph 4 of Board's Proceedings, Forest No. 321, dated 20th July 1896. No change is contemplated in the sanctioned rates except in the last named two districts, where a slight enhancement is found necessary with reference to the general rise in the local market rates.

4. The sanctioned list of reserved trees is embodied in rule 4 of the rules under section 26. Such of the reserved trees as are included in the existing lists of classified trees, but which it is deemed desirable to restore to the list of reserved trees, are shown separately in statement A now submitted.

(Signed) R. C. C. CARR,
Secretary.

To the Secretary to Government, Revenue Department,
with two statements and with three original files returned.

APPENDICES.

A.—STATEMENT showing the alterations proposed in the existing lists of classified trees for the several districts in the Presidency.

Note.—The Roman figures against the names of trees in columns 2 and 3 represent respectively the class in the existing and proposed lists.

Names of districts.	Names of "reserved trees" under rule 4 of the rules under section 26 included in the existing list of classified trees but proposed to be omitted therefrom.	Names of reserved trees now proposed to be newly included in the list of classified trees.	Transfers from a lower to a higher class.			Transfers from a higher to a lower class.	Omitted from the classified list in addition to all trees falling in the existing list under the general head "all other descriptions of trees."	Remarks.
			Class II to class I.	Class III to class I.	Class III to class II.			
1	2	3	4	5	6	7	8	9
Ganjám ..	....	..	....	....	1. Caryota urens .. 2. Eugenia jambolana. 3. Lagerstrœmia parviflora. 4. Strychnos nux-vomica. 5. Stephegyne parvifolia.	1. Terminalia tomentosa, I to II. 2. Anogeissus latifolia, I to II.	1. Melia composita, I. 2. Aegle marmelos, II. 3. Limonia acidissima, II. 4. Morinda tinctoria and bracteata, II 5. Pterospermum heyneanum and suberifolium, II.	It will be observed that the names of trees entered in this statement as having been transferred from class III to class II are not specified in the existing seigniorage list for the district—*vide* Government notification, dated 23rd August 1886, at page 777, part I, of the *Fort St. George Gazette*, dated 3rd September 1886. The transfer of the trees in question to class II has, however, been recommended both by the Collector and the Conservator
Vizagapatam.	Dalbergia latifolia (class I.) Diospyros melanoxylon and tomentosa (class I).	..	....	1. Lagerstrœmia parviflora.	1. Acacia leucophlœa. 2. Anogeissus acuminata. 3. Mimusops elengi.	....	....	doubtless on account of their importance and value and with reference to local condition. The Board has approved of the transfer. The addition of the five trees to class II is indeed more than compensated for by the omission of the same number of trees from classes I and II and by the reduction of two others from a higher to a lower class. Thus, on the whole, the proposed revision will, if approved, be more advantageous to the public. Now that forest business in the northern districts is in better order than it was in 1886 when the existing seigniorage lists were sanctioned, there seems to be no reason why reserved trees such as Dalbergia latifolia, &c., should not be removed from the list of classified trees and afforded the protection which they deserve. Their sale, however, is not absolutely prohibited under the rules, but will be arranged for at the discretion of the Forest Department. Thus their removal under special arrangements to meet actual local demands only would prevent indiscriminate felling of the trees by ordinary permit holders. It is proposed to transfer Lagerstrœmia parviflora to class I as in Gódávari—*vide* G.O., No. 168, Revenne, dated 25th February 1890. *Acacia leucophlœa* has been entered under class II as it is as valuable as Acacia Arabica which is already in that class. Anogeissus acuminata is already in class I in Ganjám. Its entry under class II in Vizagapatam has therefore been permitted. Similarly "Mimusops elengi" is already in class II in the Kurnool, &c., districts.
Gódávari ..	Acacia sundra (class II.) Dalbergia latifolia (class I). Diospyros melanoxylon and tomentosa (class I).	..	....	Vitex altissima ..	Strychnos nux-vomica.	....	....	Vitex altissima has been entered in class I on account of the value of its timber. It is a large tree and deserves attention. Strychnos nux-vomica was originally proposed by the Collector under class I as the fruit is collected largely and sold. The Conservator has reduced it to class II.

Statement showing the alterations proposed in the existing lists of classified trees for the several districts in the Presidency—*cont.*

Note.—The Roman figures against the names of trees in columns 2 and 3 represent respectively the class in the existing and proposed lists.

Names of districts.	Names of "reserved trees" under rule 4 of the rules under section 26 included in the existing list of classified trees but proposed to be omitted therefrom.	Names of reserved trees now proposed to be newly included in the list of classified trees.	Transfers from a lower to a higher class.			Transfers from a higher to a lower class.	Omitted from the classified list in addition to all trees falling in the existing list under the general head "all other descriptions of trees."	Remarks.
			Class II to class I.	Class III to class I.	Class III to class II.			
1	2	3	4	5	6	7	8	9
Kistna ..	Acacia sundra (class II).	....	1. Adina cordifolia. 2. Stephegyne parvifolia. 3. Acacia Arabica .. 4. Eugenia jambolana.	1. Acacia leucophlœa. 2. Mimusops elengi. 3. Do. Indica.	1. Albizzia procera. 2. Avicennia officinalis. 3. Cassia fistula. 4. Grewia Asiatica. 5. Do. tiliæfolia. 6. Strychnos potatorum.	....	1. Terminalia arjuna, I.	In this and the Kurnool district, Adina cordifolia and Stephegyne parvifolia have been transferred from class II to class I on account of their comparative scarcity and the value of their timber. They are already in class I in almost all the other districts of the circle. The remaining five trees proposed under class I in Kistna are reported to be just as useful as the existing first-class trees. Of the six trees proposed to be transferred from class III to class II, "Albizzia procera" is as valuable as "Albizzia lebbek" which comes already under class II in the existing list and the remaining five trees are reported to require better protection. Hence their transfer to a higher class.
Kurnool ..	....	....	1. Adina cordifolia. 2. Stephegyne parvifolia. 3. Vitex altissima ..	1. Lagerstrœmia parviflora. 2. Melia Indica .. 3. Schrebera swietonioides.	1. Acacia leucophlœa. 2. Albizzia procera. 3. Cassia fistula .. 4. Diospyros embryopteris. 5. Eugenia alternifolia. 6. Grewia lævigata. 7. Do. oppositifolia. 8. Do. tiliæfolia. 9. Strychnos nux-vomica. 10. Strychnos potatorum.	....	1. Dolichandrone crispa, II. 2. Careya Arborea, II.	As regards Nos. 1, 2 and 3 shown under "transfers from class II to class I," please see remarks already entered against the same species of trees in Kistna and Gódávari. The necessity for including "Lagerstrœmia parviflora" in class I has already been explained in the remark against Vizagapatam. Schrebera swietonioides has been added on account of the value of its timber. Of the trees transferred from class III to class II, No. 1, is valuable for its bark and Nos. 9 and 10 for their fruits and the remaining species have been proposed in a higher class on account of their comparative scarcity and the increased value of their timber.
Bellary ..	1. Pterocarpus marsupium. 2. Bassia latifolia.	....	....	....	....	....	1. Dolichandrone, crispa, II.	
Anantapur ..	....	....	....	1. Melia Indica ..	1. Cassia fistula ..	....	....	The addition of Melia Indica to class I is recommended on account of its being one of the very few valuable species to be found in the district. The tree proposed to be added to class II is very useful and is by no means plentiful. Its protection is necessary. Besides, there is much demand for the bark of Cassia fistula for dyeing and tanning purposes.

Statement showing the alterations proposed in the existing lists of classified trees for the several districts in the Presidency—*cont.*

Note.—The Roman figures against the names of trees in columns 2 and 3 represent respectively the class in the existing and proposed lists.

Names of districts.	Names of "reserved trees" under rule 4 of the rules under section 26 included in the existing list of classified trees but proposed to be omitted therefrom.	Names of reserved trees now proposed to be newly included in the list of classified trees.	Transfers from a lower to a higher class.			Transfers from a higher to a lower class.	Omitted from the classified list in addition to all trees falling in the existing list under the general head "all other descriptions of trees."	Remarks.
			Class II to class I.	Class III to class I.	Class III to class II.			
1	2	3	4	5	6	7	8	9
Cuddapah ..	....	....	....	....	1. Eugenia jambolana.	....	1. Soymida febrifuga, I.	Eugenia jambolana is an important tree and yields timber suitable for building purposes. It is already under class II in the existing lists of many other districts. The proposed list for the district shows only four species in class I and eight in class II against five and ten respectively in the existing list. Similarly only two species under class I and six under class II are proposed for the Nellore district against four and nine respectively in the existing list.
						2. Vitex altissima, II. 3. Vitex pubescens, II. 4. Stephegyne parvifolia, II.		
Nellore ..	....	....	....	....	....	1. Strychnos nux-vomica, I to III. 2. Acacia arabica, II to III.	1. Eugenia alternifolia, I. 2. Mimusops elengi, II. 3. Vitex altissima, II.	
Chingleput ..	1. Artocarpus integrifolia, I. 2. Hardwickia binata, I. 3. Chloroxylon swietenia, I.	....	....	....	....	....	1. Vitex pubescens, I.	Now that it is proposed to omit eleven species under classes I and II from the existing list in order to render the concession granted under rule 7 of section 26 rules one of real benefit to the ryots, there is no reason why any of the reserved trees named in rule 4 of the rules under section 26 should be retained in the list of classified trees.
						2. Phyllanthus emblica, I. 3. Thespesia populnea, I. 4. Morinda citrifolia, I. 5. Dillenia bracteata, II. 6. Buchanania angustifolia, II. 7. Gardenia latifolia, II. 8. Stereospermum chelonoides, II. 9. Pterospermum suberifolium, II. 10. Cassia siamea, II. 11. Diospyros chloroxylon, II.		
North Arcot.	1. Diospyros ebenum. 2. Hardwickia binata. 3. Shorea laccifera. 4. Chloroxylon swietenia.	1. Pongamia glabra, I.	....	....	1. Eugenia jambolana. 2. Terminalia arjuna.	1. Cassia fistula, I to II. 2. Melia indica, I to II. 3. Terminalia paniculata, II to III. 4. Acacia leucophlæa, II to III.	1. Gmelina arborea, I. 2. Soymida febrifuga, II. 3. Stephegyne parvifolia, II. 4. Anthocephalus cadamba, II. 5. Vitex pubescens, II. 6. Albizzia stipulata, II. 7. Terminalia glabra, II	The remarks against the Chingleput trees apply with equal force to North Arcot also as regards the entries in column 2. Only two valuable species are proposed to be removed from class III to class II. These are already either under class I or class II in several other districts. Against this trifling increase, four species are put down for removal from a higher to a lower class and it is proposed to omit seven others altogether from the classified list.

Statement showing the alterations proposed in the existing lists of classified trees for the several districts in the Presidency—*cont.*

Note.—The Roman figures against the names of trees in columns 2 and 3 represent respectively the class in the existing and proposed lists.

Names of districts.	Names of "reserved trees" under rule 4 of the rules under section 26 included in the existing list of classified trees but proposed to be omitted therefrom.	Names of reserved trees now proposed to be newly included in the list of classified trees.	Transfers from a lower to a higher class.			Transfers from a higher to a lower class.	Omitted from the classified list in addition to all trees falling in the existing list under the general head "all other descriptions of trees."	Remarks.
			Class II to class I.	Class III to class I.	Class III to class II.			
1	2	3	4	5	6	7	8	9
South Arcot ..	1. Shorea laccifera, I. 2. Chloroxylon swietenia, I. 3. Diospyros melanoxylon, I. 4. Hardwickia binata, I.	..	....	....	....	1. Albizzia odoratissima, I to II. 2. Acacia sundra or catechu, I to II. 3. Acacia Arabica, II to III.	1. Acacia ferruginea, I. 2. Albizzia stipulata, I. 3. Stereospermum xylocarpum, I. 4. Vitex pubescens, I	The transfer of two species from a higher to a lower class and the omission of fifteen others from the classified list fully justify the proposed removal of four of the reserved trees from the classified list.
					5. Feronia elephantum, II. 6. Boswellia thurifera, II. 7. Sapindus emarginatus, II. 8. Buchanania latifolia, II. 9. Bauhinia racemosa, II. 10. Alangium Lamarckii, II.		11. Anthocephalus cadamba, II. 12. Wrightia tinctoria, II. 13. Mallotus philippinensis, II. 14. Lebedieropsis orbicularis, II. 15. Ulmus integrifolia, II.	
Tanjore ..	....	1. Acacia sundra, I. 2. Chloroxylon swietenia, I.	....	1. Albizzia odoratissima.	1. Adina cordifolia. 2. Cassia fistula.	1. Acacia Arabica, I to II. 2. Acacia leucophlæa, I to II. 3. Eugenia jambolana, I to II. 4. Strychnos nux-vomica, I to III.	1. Albizzia stipulata, II. 2. Zizyphus jujuba, II. 3. Ficus bengalensis, II. 4. Ficus glomerata, II. 5. Odina wodier, II.	Nos. 1 and 2 in column 3 have been transferred to the classified list as in Trichinopoly. Albizzia odoratissima has been entered under class I as in the existing list for the Trichinopoly district. The wood of the other two trees transferred from class III to class II is valuable and, as it is not common, requires to be afforded better protection. The changes proposed in the other direction are the transfer of two trees from the reserved to the classified list, the transfer of four others from a higher to a lower class and the omission of five species altogether from the latter list.
Trichinopoly ..	1. Pterocarpus marsupium, I. 2. Diospyros ebenum and melanoxylon, I. 3. Dalbergia latifolia, I. 4. Hardwickia binata, I. 5. Shorea laccifera, I. 6. Bassia longifolia, I. 7. Bassia latifolia, II.	..	....	....	1. Acacia Arabica..	1. Acacia sundra, I to II. 2. Adina cordifolia, I to II. 3. Anogeissus latifolia, I to II.	1. Prosopis spicigera, I. 2. Thespesia populnea, II. 3. Erythroxylon monogynum, II. 4. Butea frondosa, II.	Nos. 1 to 5 in column 2 are scarcely found on unreserved or reserved lands in the district. If they are found anywhere, they should be reserved on account of their value as timber trees. Nos. 6 and 7 in the same column are valuable for their flowers and fruit and the felling of the trees should therefore be prohibited. It will be noted that against this nominal prohibition, three trees are to be transferred from a higher to a lower class and seven others are to be removed altogether from the classified list. "Acacia Arabica" is found almost exclusively on tank-beds, and it is necessary that the tree should be protected as otherwise it will soon disappear from the district. It comes under class I in Tanjore and class III in Trichinopoly in the existing lists. It is now proposed to bring it under class II in both the districts.
						5. Zizyphus jujuba, II. 6. Vitex pubescens, II. 7. Stereospermum chelonoides, II.		

Statement showing the alterations proposed in the existing lists of classified trees for the several districts in the Presidency—*cont.*

Note.—The Roman figures against the names of trees in columns 2 and 3 represent respectively the class in the existing and proposed lists.

Names of districts.	Names of "reserved trees" under rule 4 of the rules under section 26 included in the existing list of classified trees but proposed to be omitted therefrom.	Names of reserved trees now proposed to be newly included in the list of classified trees.	Transfers from a lower to a higher class.			Transfers from a higher to a lower class.	Omitted from the classified list in addition to all trees falling in the existing list under the general head "all other descriptions of trees."	Remarks.
			Class II to class I.	Class III to class I.	Class III to class II.			
1	2	3	4	5	6	7	8	9
Salem ..	....	....	....	....	....	1. Melia Indica, I to II.	1. Vitex pubescens, I. 2. Gmelina arborea, I.	It will be noted that the number of trees in classes I and II of the existing list has been materially reduced in the proposed list, thus rendering the revision wholly beneficial to the people.
					3. Michelia champaca, I. 4. Melia azedarach, II. 5. Prosopis spicigera, II. 6. Zizyphus jujuba, II.	7. Morinda exserta, II. 8. Stephegyne parvifolia, II. 9. Zizyphus glabrata, II.		
Madura ..	1. Pterocarpus marsupium, I. 2. Hardwickia binata, I. 3. Chloroxylon swietenia, I.	....	1. Cedrela toona. 2. Terminalia tomentosa. 3. Albizzia Lebbek. 4. Do. odoratissima. 5. Eugenia jambolana. 6. Melia Indica or azadirachta.	1. Lagerstroemia microcarpa. 2. Strychnos nux-vomica.	1. Acacia Arabica. 2. Acrocarpus fraxinifolius. 3. Terminalia belerica.	1. Acacia leucophloea, II to III. 3. Vateria Indica, II. 4. Vitex altissima, II.	1. Bischoffia Javanica, II. 2. Prosopis spicigera, II.	Nos. 1 to 3 in column 2 are now scarcely found in unreserved lands. It is therefore unnecessary to retain them in the classified list. No. 1 in column 4 comes under class I in the existing list in almost all the other districts. Nos. 2 and 6 are also first-class trees in most of the other districts of the Presidency. Nos. 3, 4 and 5 are likewise important species. In short, all the proposed transfers from a lower to a higher class are necessary for the sake of better protection of the remaining growth. The interests of the ryots have however been safe-guarded by the removal of four species (now under class II) from the classified list.
Tinnevelly ..	Bassia latifolia ..	....	....	....	1. Chickrassia tabularis.	....	1. Filicium decipiens, I. 2. Pœciloneuron pauciflorum, I. 3. Bischoffia Javanica, I. 4. Litsæa zeylanica, I. 5. Careya arborea, I. 6. Thespesia populnea, I. 7. Buchanania angustifolia, II. 8. Cedrela toona, II. 9. Hemicyclia elata, II. 10. Stereospermum chelonoides, II. 11. Nephelium longana, II. 12. Pterospermum suberifolium, II. 13. Cullenia excelsa, II.	"Chickrassia tabularis" comes under either class I or class II in several other districts of the circle. The concessions made to the people by the proposed revision are apparent in the omission of 13 species of trees from the classified list.

Statement showing the alterations proposed in the existing lists of classified trees for the several districts in the Presidency—*cont.*

Note.—The Roman figures against the names of trees in columns 2 and 3 represent respectively the class in the existing and proposed lists.

Names of districts.	Names of "reserved trees" under rule 4 of the rules under section 26 included in the existing list of classified trees but proposed to be omitted therefrom.	Names of reserved trees now proposed to be newly included in the list of classified trees.	Transfers from a lower to a higher class.			Transfers from a higher to a lower class.	Omitted from the classified list in addition to all trees falling in the existing list under the general head "all other descriptions of trees."	Remarks.
			Class II to class I.	Class III to class I.	Class III to class II.			
1	2	3	4	5	6	7	8	9
South Coimbatore.	1. Shorea laccifera, I. 2. Xylia dolabriformis, I. 3. Pterocarpus marsupium, I. 4. Artocarpus integrifolia and hirsuta, I. 5. Mangifera Indica, II.	..	1. Terminalia tomentosa. 2. Terminalia paniculata. 3. Lagerstrœmia microcarpa.	....	1. Nauclea parvifolia. 2. Albizzia amara ..	1. Acacia leucophlæa, (I to II).	1. Soymida febrifuga, I. 2. Gmelina arborea, I.	The conservation of the trees named in column 2 is reported to be necessary. Hence they have been restored to the list of reserved trees. The trees named in column 4 are more valuable than the others in class II. Hence their transfer to a higher class. The transfer of two trees (column 6) from class III to class II is due to their importance and the consequent necessity for better protection. Against the transfer of five trees from the classified to the reserved list and the transfer of five others from a lower to a higher class, nine trees have been expunged altogether from the classified list and one tree transferred to a lower class. Thus the revision is not, on the whole, unfavourable to the public.
					3. Prosopis spicigera, II. 4. Anthocephalus cadamba, II. 5. Michelia champaca, II. 6. Vitex altissima, II.	7. Zizyphus jujuba, II. 8. Zizyphus xylopyra, II. 9. Vateria Indica, II.		
North Coimbatore.	1. Shorea tumbuggaia, I. 2. Shorea laccifera, I. 3. Xylia dolabriformis, I. 4. Pterocarpus marsupium, I. 5. Artocarpus integrifolia and hirsuta, I. 6. Mangifera Indica, II.	..	1. Terminalia tomentosa. 2. Albizzia Lebbek. 3. Albizzia odoratissima. 4. Cassia fistula .. 5. Adina cordifolia. 6. Canarium strictum.	....	1. Acacia planifrons.	1. Acacia leucophlæa, I to II. 2. Chloroxylon swietenia, I to II.	1. Soymida febrifuga, I. 2. Gmelia arboria, I. 3. Prosopis spicigera, II.	The changes proposed are more or less due to the same reasons as those adduced for South Coimbatore.
					4. Anthocephalus cadamba, II. 5. Michelia champaca, II. 6. Vitex altissima, II.	7. Zizyphus jujuba, II. 8. Zizyphus xylopyra, II. 9. Vateria Indica, II.		
Nilgiris ..	....	..	....	1. Grewia tiliæfolia. 2. Acrocarpus fraxinifolius. 3. Rhodomyrtus tomentosa.	1. Cathartocarpus fistula. 2. Anogeissus latifolia.	....	1. Anthocephalus cadamba, II.	The trees entered in columns 5 and 6 require better protection. No. 1 in column 5 is a valuable tree. No. 2 is an extremely handsome tree and the timber is used for building and furniture. No. 3 is valuable for its abundant supply of fruits on which the hill tribes largely depend for food in times of scarcity. No. 1 in column 6 is a very durable wood and the bark is used for dyeing and tanning and the gum is an astringent. It is also a very handsome tree. No. 2 is well known and highly valued for its strength and toughness.

Statement showing the alterations proposed in the existing lists of classified trees for the several districts in the Presidency—*cont.*

Note.—The Roman figures against the name of trees in columns 2 and 3 represent respectively the class in the existing and proposed lists.

Names of districts.	Names of "reserved trees" under rule 4 of the rules under section 26 included in the existing list of classified trees but proposed to be omitted therefrom.	Names of reserved trees now proposed to be newly included in the list of classified trees.	Transfers from a lower to a higher class.		Transfers from a higher to a lower class.	Omitted from the classified list in addition to all trees falling in the existing list under the general head "all other discriptions of trees."	Remarks.
			Class II to class I.	Class III to class II.			
1	2	3	4	5	6	7	8	9
South Malabar.	....	1. Pongamia glabra, II. 2. Artocarpus hirsuta, I.	....	1. Canarium strictum.	....	1. Vitex altissima or pubescens, I. 2. Bignonia xylocarpa, I. 3. Pyrus lanata, II. 4. Bignonia chelonoides, II. 5. Schleichera trijuga, II. 6. Soymida febrifuga, II.	Canarium strictum produces bleech dammer. Lagerstroemia Regina is a useful tree.
North Malabar	1. Hopea parviflora, I. 2. Artocarpus integrifolia, I. 3. Xylia dolabriformis, I. 4. Mangifera Indica, II. 5. Calophyllum elatum, II.	....	1. Albizzia Lebbek.	1. Caryota urens.	....	1. Michelia champaca, I. 2. Bignonia xylocarpa, I. 3. Vitex altissima or pubescens, I. 4. Briedelia speciosa, I. 5. Pyrus lanata, II. 6. Bignonia chelonoides, II. 7. Schleichera trijuga, II. 8. Soymida febrifuga, II.	Eight species have been removed from the classified list against the proposed restoration of only five species to the list of reserved trees. The value of the trees named in columns 4 and 5 is reported to be increasing annually.
South Canara.	1. Hopea parviflora. 2. Pterocarpus marsupium. 3. Xylia dolabriformis. 4. Terminalia chebula.	....	1. Albizzia odoratissima. 2. Albizzia Lebbek. 3. Vitex altissima. 4. Adenanthera pavonina.	1. Lagerstroemia Flos-Reginæ. 2. Cedrela toona.	....	1. Artocarpus lakoocha.	Nos. 1 to 4 in column 2 are important trees and require proper protection. The trees named in columns 4 and 5 are proposed in higher classes either on account of their scarcity or increasing value.

ERRATA.

(1) In the Board's lists of classified trees forming appendix to its Proceedings, Forest Nos. 256 and 321, dated 9th June and 20th July 1896, respectively, delete the following names and the entries against them for the several districts :—

"Bambusa arundinacea."
"Calamus rotang."
"Dendrocalamus strictus."

(2) In line 4 of paragraph 3 of Board's Proceedings, Forest No. 426, dated 12th September 1896, insert the word "about" before the words "the same number."

BOARD OF REVENUE (LAND REVENUE), 9th April 1897. (Signed) R. C. C. CARR, Ag. Secretary.

To the Secretary to Government, Revenue Department.

Order—No. 387, Revenue, dated 26th May 1897.

Forest No. 82.

In the circumstances now reported, the draft notifications submitted by the Board of Revenue embodying the revised lists of classified trees, the seigniorage rates fixed for each and the rules connected

therewith, as amended with reference to the errata last read above, are approved subject to the following remarks and modifications :—

(1) *Rule* 1.—It will be noted that the rates now fixed being maxima, it rests with the Collector to modify them if he should deem it expedient to do so. The Government desires in this connexion to impress on all District officers the necessity and importance of reducing the rates wherever the public interests require it and with this remark would leave it to the Collectors to work the rules to the best advantage of the people.

(2) *Rule* 3.—It is observed that the general rules framed under section 26 of the Madras Forest Act V of 1882 vests in District Collectors rather than Conservators the power to regulate the method of issue, registration and check of permits. The word "Collector" will accordingly be substituted in this rule for the expression "Conservator of Forests." The existing practice need not, however, be disturbed if the Board requires Collectors formally to promulgate such directions as have been drawn up or approved by the Conservators under the Board's authority.

(3) *Rule* 5.—The expressions "local authorities" and "unclassified trees and forest produce" are rather vague and the Government also considers it desirable that the Board should exercise control over the rates fixed by the District officers. This rule will accordingly be altered as shown below :—

"Trees and other forest produce not shown in the foregoing list when removed from reserved land or, except in the case of free removals under rule 7 of the general rules under section 26 of the Madras Forest Act (V of 1882), from unreserved land are chargeable at such rates as may be decided upon from time to time by the Collector subject to the control of the Board of Revenue."

(4) The seigniorage now proposed to be levied on iron-ore, viz., 2 annas per maund of 25 lb., is very much in excess of the royalty of 2 annas per ton of iron stone removed under a prospecting or mining license taken out in accordance with the provisions of Board's Standing Order No. 15. In any case the Government considers that no useful purpose will be served by retaining in the notifications the item in question which will accordingly be omitted.

(5) *Notification relating to the Nilgiris.*—The Government observes that the list attached to the draft notification is defective, in that it omits to specify in two cases the quantity in respect of which the fee mentioned is leviable, viz., under fuel (i) branch wood, &c., and (ii) bark, twigs, &c. The words "per head-load" will now be inserted after the two items above mentioned. The word "kind" after the word "eucalyptus" in the last column of the list is unnecessary and will be omitted and the more common designation "Cassia fistula," made use of in all other notifications, will be substituted for the expression "Cathartocarpus fistula" in the first column.

2. The draft notifications, revised with reference to the foregoing remarks, are printed as appendices to the present Proceedings and will be published in the Fort St. George and all District Gazettes for general information.

(True Extract.)

(Signed) G. STOKES,
Ag. Secretary to Government.

To the Board of Revenue (Land Revenue), with enclosures returned.
" Superintendent, Government Press.

NOTIFICATIONS.

DISTRICT OF CUDDAPAH.

In supersession of all previous notifications on the subject, His Excellency the Governor of Fort St. George in Council is pleased to direct that the following shall be the rates at which permits for the removal of timbers of unreserved trees and other forest produce on seigniorage will, until further orders, be issued under the rules, under section 26 of the Forest Act (V of 1882), published in the *Fort St. George Gazette* of 21st August 1894 :—

Earth and turf	....	....	Do. 0 0 6

The above rates are the maxima which may be reduced, but not raised by the Collector without the sanction of Government.

2. The seigniorage prescribed by these rules does not refer to reserved trees, and the Collector may, by district order, prohibit the grant of any tree or produce on seigniorage, either for a time, or in certain localities, or altogether.

Reserved trees and those trees or produce for which the issue of seigniorage permit is prohibited by district order will be sold or otherwise disposed of at the discretion of the Forest Department.

3. The form of permit and method of issue, registration, check and recovery will be prescribed by the Collector on behalf and under the authority of the Board of Revenue in accordance with the general rules framed under the Forest Act.

4. The term "cart-load" refers to a country cart drawn by two bullocks and is equivalent to 20 cubic feet or half a ton. The head-load is equivalent to one cubic foot or 56 lb.

20 head-loads equal one cart-load.
4 do. do. bullock-load.
2 do. do. ass-load.
Seigniorage for a horse-load same as that for a bullock-load.
Do. yoke-load (in the case of bullocks)—half the rates for a cart-load.
Do. do. (do. of buffaloes)—three-fourths of the rates for a cart-load.

5. Trees and other forest produce not shown in the foregoing list when removed from reserved land or, except in the case of free removals under rule 7 of the general rules under section 26 of the Madras Forest Act (V of 1882), from unreserved land are chargeable at such rates as may be decided upon from time to time by the Collector subject to the control of the Board of Revenue.

DISTRICT OF BELLARY.

In supersession of all previous notifications on the subject, His Excellency the Governor of Fort St. George in Council is pleased to direct that the following shall be the rates at which permits for the removal of timbers of unreserved trees and other forest produce on seigniorage will, until further orders, be issued under the rules under section 26 of the Forest Act (V of 1882), published in the *Fort St. George Gazette* of 21st August 1894.

READ—the following:—

ERRATA.

In Government Order, No. 387, Revenue, dated 26th May 1897—

(1) *insert* a comma before the expression from "unreserved land" in the passage under quotation in paragraph 1 (3) of the Government Order, and in rule 5 of the notifications appended thereto;

(2) *delete* the item "calamus rotang" and the entries against it in the schedules on pages 33 and 44 of the Government Order; and

(3) *delete* also the item "iron-ore" and the entries against it in the schedule on the last page of the Government Order.

(True Extract.)

OOTACAMUND,
5th July 1897.

(Signed) C. H. B. BURLTON,
for Ag. Secy. to Government.

To the Board of Revenue (Land Revenue).
,, Superintendent, Government Press.

RESOLUTION—Forest No. 275, dated 13th July 1897.

Communicated to all Collectors and Conservators of Forests.

2. With reference to item (3) of the Government errata, the Board begs leave to point out that "iron-ore" and the entries against it have to be omitted also in the notification relating to the Cuddapah district (*vide* page 25 of the Government Order).

3. Referring to paragraph (3) of the Government Order, the Board directs that the rates charged for trees not on the classified list, and for bamboos and rattans, when required for other than domestic or agricultural purposes, shall not exceed those prescribed for trees under class III. When bamboos are sold by number as is usual in South Canara and Malabar, the maximum charge shall be Rs. 1-8-0 per 100 or Rs. 15 per thousand.

4. The Board takes the opportunity of repeating its instructions that, save in forest tracts where there is an abundant surplus supply, timber on unreserved land should be given on seigniorage for local use only, and not given out in large quantities to traders.
