Formation of a Reservoir on the Tungabhadra River

Letter from the Resident at Hyderabad intimating that the Nizam's Government have no objections to the Madras Government officers making the necessary surveys and contours, &c., in His Highness' territory in connection with the — near the village of Nadivi in the Bellary district, provided the actual work is not commenced without further notice, communicated to Superintending Engineer, III Circle.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.

Read—the following paper:—

From T. CHICHELE-PLOWDEN, Esq., c.s.i., Resident at Hyderabad, to the Joint Secretary to the Government of Madras, Public Works Department, Irrigation Branch, dated 23rd June 1897, No. 3466.

I have the honour to refer to your letter, No. 275 I., dated the 17th March 1897, regarding the formation of a reservoir on the Tungabhadra river near the village of Nadivi, 5 miles below Sugur, in the Bellary district.

2. In reply, I have now to forward a copy of a letter, No. 793, dated the 16th June 1897, received from His Highness the Nizam's Minister to the effect that His Highness' Government have no objections to the officers of the Madras Government making the necessary survey and contours, and to dig trial pits on the proposed line of bund in His Highness' territory, provided the actual work of construction is not commenced without further notice. This permission, you will observe, is granted without prejudice to any action His Highness' Government may deem it necessary to take in this matter hereafter.

3. The atlas sheet received with your letter under reply will be forwarded to you on receipt from His Highness' Minister.

ENCLOSURE.

From His Highness the Nizam's Minister, Hyderabad, to the Resident at Hyderabad, dated 16th June 1897, No. 793.

Will you kindly refer to Mr. Williams' letter, No. 748, dated 22nd April 1897, regarding the formation of a reservoir on the Tungabhadra river near the village of Nadivi, 5 miles below Sugur, in the Bellary district?

2. I now write to say that His Highness' Government have no objections to the officers of the Madras Government making the necessary survey and contours, and to dig the trial pits on the proposed line of bund in His Highness' territory, provided the actual work of construction is not commenced without further notice. This provision is necessary because the question of the submersion of about 2 square miles of land on which there is a small village, will have to be considered later on, when the report called for from the Subadar of Gulburgah is received, and further it is of importance to ascertain from the Madras Government what amount of land in the territory of His Highness under the reservoir they will allow to be irrigated free of charge and assessment.

3. Without prejudice, therefore, to any action His Highness' Government may deem it necessary to take in this matter hereafter, the survey of the site may be commenced and the local officers will be informed accordingly.

ORDER—No. 616 I., dated 5th July 1897.

Communicated to the Superintending Engineer, III Circle, for information, with reference to G.O., No. 274 I., dated 17th March 1897.

(True Extract.)
