Submitting to Government, for approval and publication in the *Fort St. George Gazette*, the draft notification under section 4 of the Madras Forest Act for the proposed constitution of Kalanjimale block, in the Uppinangadi and Kasaragod taluks, South Canara district, as a reserved forest.

RESOLUTION—Forest No. 158, dated 14th April 1897.

The draft notification under section 4 in respect of the Kalanjimale block, the selection of which was approved by Government in its Order No. 108, Revenue, dated 11th March 1896, will be submitted to Government for approval and publication in the *Fort St. George Gazette*.

2. The block lies in the two taluks of Uppinangadi and Kasaragod, but the statement of area and condition submitted by the Collector gives particulars for only one taluk. Moreover, the figures given for the Kasaragod taluk do not appear to have been revised with reference to Government Order, No. 831, dated 20th December 1895, directing the transfer of certain villages from one taluk to another in the district. A revised statement should therefore be submitted for the information of the Board and Government.

3. The block, though estimated to be 15 square miles at the time of selection, is now reported to be only 3,049 acres or less than 5 square miles in extent. It is presumed that the figure now given represents the correct area of the block.

Resolution—Forest No. 158, dated 14th April 1897.

The draft notification under section 4 in respect of the Kalanjimale block, the selection of which was approved by Government in its Order, No. 108, Revenue, dated 11th March 1896, will be submitted to Government for approval and publication in the *Fort St. George Gazette*.

2. The block lies in the two taluks of Uppinangadi and Kasaragod, but the statement of area and condition submitted by the Collector gives particulars for only one taluk. Moreover, the figures given for the Kasaragod taluk do not appear to have been revised with reference to G.O., No. 831, dated 20th December 1895, directing the transfer of certain villages from one taluk to another in the district. A revised statement should therefore be submitted for the information of the Board and Government.

3. The block, though estimated to be 15 square miles at the time of selection, is now reported to be only 3,049 acres or less than 5 square miles in extent. It is presumed that the figure now given represents the correct area of the block.
