SEASON REPORT

for the week ending
28th August 1897.

Rainfall.

This week has been very good in every district of the Presidency and has everywhere exceeded the average very considerably. It has been especially good in the affected parts of the Presidency. It is unnecessary to examine the rainfall in detail for each district, as it has been generally so good.

Public Health.

Public health is generally fair except for the prevalence of cholera. Cholera, however, is decreasing everywhere except in North Arcot; Cuddalore, Trichinopoly, Madura, the Nilgiris and South Canara are this week reported free of it. The number of deaths from the disease ^{shows} is a very considerable decrease in Malabar.

Prices.

Prices show a very strong tendency to fall this week. Rice has fallen in 9 districts, stationary in 10 and is rising only in 4. Ragi has fallen in 14, stationary in 2 and is rising only in 4. Chola has fallen in 6, stationary in 2 and is rising in 6. Cumbu has fallen in 8, stationary in 3 and is rising in 3. Rice is above the scarcity rate or touching it in all the districts of the Circars and

Deccan. Ragi is similarly above the scarcity rate in these districts. Cholan is above the scarcity rate in the Circars, ~~the~~ Deccan, and Nellore; it is touching it in North Arcot. Umbu is above the scarcity rate in the Circars ~~the~~ Deccan, Nellore and North Arcot.

Numbers on Relief.

Details of numbers on relief will be found in the statement flagged A. It shows a decrease of 37,311 on works; of 1,286 on test works; and 27,077 on gratuitous relief. There is again this week an increase in the numbers of weavers employed amounting to 1,725. The total decrease according to the Board's figures is 63,949.

Prospects.

The material parts of the telegrams have been underlined.

I think Mr. Taylor said in a.d.o. to the A.C. that he had stopped advance to weavers owing more than one loan, regarding them, I suppose, as small capitalists - A similar plan might be tried elsewhere, where the use of weavers still is on the rise
