Relief works at Daigam and Atagadu.
Superintendent Sub Conductor.
E. Huson

At Daigam and Atagadu further arrangements had not been made for water supply to the sheds at works though strict orders on the subject had previously been issued.

the Executive Engineer & Mr Lacey made on 29-5-97. Vide Inspection Notes.

Daigam Relief work. — At the Executive Engineer's inspection on 24.5.97 it was noticed that wells had been constructed near the work ~~when~~ since first commenced and that other wells were being dug - water was being distributed in the usual way.

The wells had been dug but no steps had been made to protect them. The workers were even allowed to bathe in them, and the Special Hospital Assistant stated that the water had formerly been full of worms and unfit for consumption: the defect has since been remedied. The work of Mr Huson both at Daigam and Chinchona was very slack. He is now doing better now at Kirigili.

Atagadu Relief work. At the Executive Engineers Inspection on 25.5.97 it was noticed that water was being brought from a well at Atagadu less than half a mile distant and distributed in the usual way through trough of split bamboo. A well was also being sunk in the neighbourhood of the work. 4 Coolies were engaged in carrying water.

Neither the Overseer or the Deputy

it is quite possible that he told a
falsehood to avoid accompanying
me. He is now reverting.

(4) No arrangement had been made for payment of dependants

Yes. The overseer was not clear — about the payment and management of dependants and this was explained to him at the time of the joint inspection of the work by

Arrangements regarding — dependants have throughout been defective on most works owing to the inability of overseers to grasp the rules on the point.
