No. 469/97

Yimmeelly District Collector's Office,
Dated 13th September 1897

From

A. W. B. Higgens Esq.,
Collector of the
Yimmeelly District,

To

The Secretary to Government,
Revenue Department,
Madras.

Sir,

I have the honor to request that you will be good enough to forward the Muchilka obtained from the Chokkampatti Zamindar at the time of the permanent Settlement and any records which may show whether the wet lands were treated as Single Crop or double crop. The records may be available in the Government office. They are required

urgently

urgently in connection with a Suit against the imposition of fasaljasti in the Kunnakudi mittah which formed part of the Chockampatti Zamindari.

A very early reply is requested.

I have the honor to be,
Sir,
Your most obedient Servant,

Collector

Note for Mr Narasimha Aiyangar

The Muchilika and the paper in which the peishcush was originally fixed are put up. A lot of papers were looked up to see how the wet lands were treated, as single crop or double crop. The papers connected with the fixing of the peishcush do not throw light on the point. The Muchilika contains a clause which provides for the levy of water rate for a second crop raised on single crop land. This might lead to the conclusions that there were single crop lands. Whether there were double crop lands also is not apparent.

KEEP-WITH.

No. , dated 189 .

With reference to G.O. No 4134. Revs d/9th August 1897 I have the honour to offer the following remarks.

It will be observed from indications on the plan of the Cahiguelah and from the face of the Channel bed being for some distance below, above natural ground level, that the Cahiguelah has already been raised & over and the channel bed has naturally and necessarily risen with it and will rise further if the Cahiguelah is again raised

the channel bed has necessitated the closing of the natural escape for flood water by a bund along the line C.D. It appears true that the treatment of the channel has been faulty and the work proposed to be done would make matters worse and lead to continually increasing expenditure. The proper treatment so far as I can judge from the plans, is similar to that proposed by the Executive Engineer, Tumkur Division. I would recommend that a weir be built at D if the expense is not very great, that the channel from D to C. be cleared to a sufficient extent to make it carry whatever proved the supply required, that the bund from C to D, be removed as here the ground has not been much scoured and that the supply channel from the Caliguelah dower be cleared to carry full supply with water a little above the present crest of Caliguelah. It will always be impossible to keep sand out of the channel below the weir but the quantity entering could be reduced by a head sluice. The entrance

2. If my recommendations are accepted, the cause of complaint by the Mysore Government will be removed.

W. Hughes.
Chief Engineer and
Secy to Govt P.W.D.
Irrign Branch.

Cur. No. 7346 of 97.

To Hon'ble Cur. G.O. No. 5078 d/28 Sept. 97

ordered that the following letter be despatched to the Resident in Mysore.

Ulle 15/10/97

Letter No. 5079 d/28 Sept. 97

To

The Resident in Mysore.

Sir,

With reference to your letter No 2967, of 17th July 1897, forwarding with enclosure copy of a letter from the Secy to the Govt of Mysore, communicating the views of the Mysore Durbar on the subject of the repair of the Gowdanakunte feeder channel, I am directed to inform you that in the opinion of the Chief Engineer for Irrigation, Madras, the treatment of the channel was faulty, and the work

Rec. 6-10-97

"Vide please opposite last telegram".

proposed to be done by the Executive Engineer, Anantapur Divn. is putting up embankments on the banks of the ~~the~~ channel, and raising the crest of the anicut by 1½ ft. will make matters worse, and lead to continually increasing expenditure. He agrees with the proposals of the Executive Engineer, Tumkur Divn. Mysore, and recommends that instead of raising the crest of the anicut by 1½ ft, a weir be built at D, the place of breach, that the channel be cleared out to a sufficient depth from D downwards, in order to make the fall to the bank greater, and that the bund from C to D be removed in places where the ground has not been much scoured. To keep out sand from the bed of the channel is impossible, and occasional clearances must be effected. It is, however, suggested that the entry entering might

vide the Survey plans.

be minimised by a head sluice. I am to state that this Govt accepts the proposals of the Chief Engineer, and request that in view to a permanent settlement of these difficulties, you will be pleased to communicate the decision to the Mysore Durbar and take such steps as are necessary to facilitate the carrying out of the works.

The tracings made by the Executive Engineer, Tumkur Divn, and the other papers received with your letter are herewith returned. [illegible] office Note No 1217 D. dy 24th Aug. 1897 from the Chief Engineer for Irrigation, Madras (which should be returned herewith).

15/9/97

R. 10,000—22-6-95.

get their permission to carry out the works and the cost of the compensation to be paid to the owners of the land you will have to pay for it.

A The request of the Dewan Bahadur is under consideration.

× 5 in number.

1. Letter from the Secy to the Govt of Mysore.
2. Extract from the Executive Engineer's Report with enclosure (Estimate).
3. Extract from the Chief Engineer's Note.

Rec'd by the Secy to the Govt
Singapore in his letter No 10775
R 3567
of 9th June 1899, it is
requested that the question
of making out a suitable
establishment to the Annaldan
Jahaildan) of Penang &
may be dropped.
from the Hon Member
who dropped it is evident from
the Hon Member considers
that the accounts or rather the
by Covenant contracts entered into
the Govt of the British Companies
and the Govt of the Straits Settlements
made by the said Govt.
