From the Director of the Geological Survey of India, to the Secretary to the Government of India, Department of Revenue and Agriculture, Simla, No.835, dated Calcutta, the 10th September 1897.

In continuation of my No.730 of 3rd August, I have the honour to submit the following modified proposals as regards the employment of Messrs Walker and Kishen Sing.

2. Dr. Walker would I consider be more profitably attached to Mr. Holland for work in Coorg than to Mr. Middlemiss for work in Coimbatore, I would consequently recommend this modification.

3. For Sub-Assistant Kishen Sing I cannot find any profitable employment in Madras, I would consequently recommend that he be told off to map the boundary of the alluvium in Khandesh. This is simple work which he is quite capable of executing, it is not work on which it would be advisable to employ a more highly qualified man, the information is at the same time desirable and the want of it has been felt before now, while it happens to be of considerable importance to know the distribution and boundaries of the alluvium as a possible explanation of some curious anomalies in the distribution of the places at which the earthquake of 12th June was and was not felt.
