JUNE.

Fortnightly Narrative.—Submitting to Government, with remarks, — of the Anantapur district for the period ending 15th June 1897.

PROCEEDINGS OF THE BOARD OF REVENUE
(REVENUE SETTLEMENT, LAND RECORDS AND AGRICULTURE).

READ—the following Fortnightly Narrative for the Anantapur district during the period ending 15th of June 1897:—

STATE OF THE COUNTRY.

Rainfall and water-supply.—There has been rain in all stations of the district during the fortnight, the lowest fall 0·56 having been registered in Yadiki and the largest in Uravakonda (2·87).

	INCHES.
Average district rainfall during the fortnight	1·76
Do. up to the fortnight	3·43
Average expected in the period	1·34
Do. up to the period	4·11

The rainfall was general throughout and was moderately heavy in the Kanaganupalli firka of Dharmavaram taluk and Uravakonda division of the Gooty taluk. In the former a few tanks have received full and several others partial supplies ranging from one to two months. In the remaining taluks also, kuntas and tanks are reported to have received from ten days to one month-and-a-half supplies. Several of the large tanks in the district have received a fair supply also, notably Anantapur (kasba) and Pattakottucheruvu. In Dharmavaram taluk one tank breached and another is in a dangerous condition. The drinking water trouble is not at an end. The rains have improved the available supplies, but the difficulty is still considerable in parts which further showers alone can remedy. Water is still to be found at a very low depth in wells and springs, and steps are being taken in parts of Gooty, Tadpatri, Anantapur, Dharmavaram and Madakasira, where want is felt, to deepen the existing wells at Provincial cost for the benefit of the Panchamas and other lower orders.

There is some water in tanks and kuntas in several parts of the district available for irrigation but the supplies are too short to induce wet cultivation to any appreciable extent. In Dharmavaram, the full supply to some of the tanks will give a start to the mungari wet cultivation. The Hagari and the Penner brought down slight freshes which have augmented the supply in the river-fed nalas.

Agricultural operations and condition of the standing crops.—Ploughing has been general in the district and sowing has begun in many tracts, mostly of gingelly and castor, and occasionally cholam and sajja (cumbu) in Gooty and Kalyandrug. Ragi and korra are also being sown and transplanted under wells and nalas. Agricultural operations are not yet brisk however, more rain and more money are urgently needed ere they will be in full swing.

Standing crops, ragi, cholam, korra and sugarcane, under wells and springs, though not extensive, are in a thriving condition.

All harvest operations are over except in an occasional tank-bed, but the outturn of late cholam in these is reported to be bad.

Supply of fodder and pasture and condition of cattle.—Pasture nil. It is just beginning to sprout. Its growth will be hastened by the rain of last night and the drizzle and shower that have fallen this morning as I am writing this narrative. Fodder is, as usual, dear and scarce. The import of fodder into Tadpatri has saved many valuable cattle. The local demand for fodder is daily increasing. I have bought a second weighing machine to enable the sales to proceed more rapidly. The price of fodder has been raised to Rs. 17-3-0, and this unexpected rise has proved too much for the means of some intending purchasers who went home again with empty carts. Similar depôts have been opened in Guntakal and Dharmavaram. I have extended the period during which free grazing in the reserves is permitted to the

1st August 1897. There need be no anxiety about cattle thereafter if the rains continue. The condition of cattle is still critical. They are still deteriorating in many places, especially in the black cotton-soil tracts. Prospects, however, are not so gloomy. If the showers continue—and there is every indication of the coming monsoon—the hills will ere long be clothed with verdure, and grass and pasture in the plains will soon spring up.

FOOD SUPPLIES AND THE STATE OF THE MARKETS.

1 RICES of principal food-grains at principal markets in the affected tracts, in seers of 80 tolahe per rupee, for the period ending 15th of June 1897.

Stations.	Rice.		Ragi.		White cholam.		Yellow cholam.		Remarks.

Madakasira	10 80	10 80	19 40	19 40	..	..	..	..	
Average	9 14	9 15	16 53	16 63	12 84	12 64	13 28	13 08	

Activity of trade.—Private trade is brisk in Tadpatri and Hindupur and fairly brisk in Penukonda and Dharmavaram. Cholam is being exported from the two latter taluks to Bellary and other places. Ragi is being imported into Dharmavaram from the Mysore province and rice into Tadpatri from Guntur, Salem, Coimbatore, &c., and cholam from Nellore and Venkatagiri.

CONDITION OF THE PEOPLE.

(1) *On works.*—Generally fair in the Gooty division and good in other places. There are still many cases of guineaworm on the Gudur work (Tadpatri). There are weakly workers still on every work in this taluk, especially among the children. This is due probably to the trying heat of May, but the change in the weather will probably bring on improvement.

(2) *In villages.*—Generally good. About 6,200 men are employed on loan works in the district. The Deputy Collector, Gooty, mentions in his report that some needy weavers of Uravakonda have come on the relief works, and I am making further inquiries as to why the weavers here have chosen this less congenial field for their livelihood. My visit to Damaketepalli work showed me that there were none on the work who could support themselves otherwise. Many of them had husbands who were doing odd jobs, but did not earn enough to keep their wives and children as well as themselves. Further a field in Budali firka, good rains have fallen and the people can get work for the present at least.

Sickness and mortality.—Fever and small-pox in Penukonda and Hindupur. About 83 attacks and 5 deaths in the latter taluk. A case of suspected cholera was reported by the overseer of Pennér relief work in Tadpatri which on investigation proved to be a severe attack of indigestion consequent upon an unexplained and unnecessary meal of raw ragi. Necessary arrangements for keeping the water-supply free from pollution have also been effected. The District Surgeon has informed me that he has received notice of the posting of one or two medical subordinates to this district some ten days or more ago. They have not yet arrived. I would submit that it might be suggested to the Surgeon-General that it does not seem sufficient to post men to this district; it is also necessary to send them. It was because of these repeated delays that I addressed Government above his head in the

matter of the Plague Hospital Assistants. One thing appears certain, which is, that the rate of pay offered is not high enough. The services of medical officers with 3 or 4 works under them would be cheap at Rs. 100.

Remarks.—Nil.

General remarks.—Prospects are more hopeful. There are indications of a favourable turn in the weather which is just now monsoonish. But unless a good deal more rain falls soon, what has already fallen will not do much good. There is a decrease of 7,647 coolies on the works as compared with the attendance during the previous week and 665 as compared with the previous fortnight. This is attributable partly to the rains and partly to the "Mohurram" which is a feast with the Hindus as well as the Muhammadans. Two additional works were started during the fortnight—one in Dharmavaram and the other in Anantapur. This makes a total of 37 works in progress. Arrangements have been made to open more works in Gooty, Tadpatri, Dharmavaram and Penukonda taluks, but I am waiting to see the result of the monsoon. In *re* the condition of the Budili firka of the Hindupur taluk there has been good rain in those parts, and my enquiries show that no works need be opened as yet.

The Surgeon-General to the Government of Madras is apparently somewhat wroth at what he calls "direct intercommunication" with the executive officers of the department. I am quite in accord with him as to the unusual course I took in addressing Government direct for the transfer of the Plague hospital assistants, but the delay in the arrival of men posted to this district by the Surgeon-General left me no option in the matter. Of the two hospital assistants ordered to this district on 27th April 1897—one joined on 22nd May 1897 and was then taken away and posted to Bellary. The other has not joined at all. A third posted on the 3rd May, joined on the 28th idem. A fourth deputed on 18th May has not yet turned up. Under these circumstances I think, perhaps, even the Surgeon-General would admit that I have some excuse for my action. The Honourable Mr. James has come and gone. I am very doubtful whether his visit will do us much good. It seems he has only 16 lakhs to divide between Madras and Bombay—a sum which would only just suffice for the Deccan districts of this Presidency. I gave him all the information in my power, but if he has not the funds, he cannot give them.

RESOLUTION—dated 23rd June 1897, No. 461.

Submitted for the information of Government.

2. The rainfall during the fortnight under report was good. The supplies of drinking-water were much improved, but difficulties are still felt in parts. Tanks received small supplies, but they are insufficient to encourage wet cultivation to any considerable extent. Preparations were being made on dry lands for the next crop, but sowings will not be extensive unless further rain falls shortly.

3. Pasture was *nil*, though there are hopes of some in the near future. Fodder was dear and scarce. The price of imported fodder was increased owing to the brisk demand, and it appears from the daily reports that ryots willingly pay the enhanced price.

4. Prices were slightly easier, except in the case of cholam. Their comparative position is shown by the following figures:—

Rate.	Measures for a rupee.		
	Rice.	Ragi.	Cholam (mixed).
Normal	13.2	32.0	30.0
Warning	10.6	24.0	22.5
Scarcity	7.9	16.0	15.0
Current	9.1	16.6	12.9
June 1892	9.1	16.0	15.7
June 1877	6.7	7.3	7.2

Trade was fairly brisk.

5. The condition of the people was generally good, except in the Gooty division where it was fair. The numbers on relief works, which at the middle of the fortnight showed a considerable increase, fell off by the end of the period under report by 665 or by about $1\frac{1}{2}$ per cent. The Collector is uncertain whether this was due to the rain or to the Mohurram. The only noticeable decrease was in Dharmavaram — 35 per cent.; and as it was in this area that the rainfall was best, the more probable cause seems to be the improvement of the season. The numbers on gratuitous relief in villages increased by about 2,700; but this was the result of the extension of the administration of gratuitous relief in villages to the Dharmavaram taluk.

6. The progress in the disposal of applications for loans is shown by the following figures:—

Week ending —	RS.
May 29th	1,75,133
June 5th	1,81,573
Do. 12th	1,94,351
Do. 19th	2,07,194

Applications for 4 lakhs still remains to be disposed of. The arrears will not be overtaken unless the price is increased. Much remains to be done in Gooty.

JULY.

Fortnightly Narrative.

Recording Board's Proceedings submitting to Government, with remarks, — of the Anantapur district for the period ending 15th June 1897.

GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

READ—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 23rd June 1897, No. 461 :—

Read—the following Fortnightly Narrative for the Anantapur district during the period ending 15th of June 1897 :—

STATE OF THE COUNTRY.

Rainfall and water-supply.—There has been rain in all stations of the district during the fortnight, the lowest fall 0.56 having been registered in Yadiki and the largest in Uravakonda (2.87).

				INCHES.
Average district rainfall during the fortnight	...	...	...	1.76
Do. up to the fortnight	...	...	...	3.43
Average expected in the period	...	...	...	1.34
Do. up to the period	...	...	...	4.11

The rainfall was general throughout and was moderately heavy in the Kanaganupalli firka of Dharmavaram taluk and Uravakonda division of the Gooty taluk. In the former a few tanks have received full and several others partial supplies ranging from one to two months. In the remaining taluks also, kuntas and tanks are reported to have received from ten days to one month-and-a-half supplies. Several of the large tanks in the district have received a fair supply also, notably Anantapur (kasba) and Pattakottucheruvu. In Dharmavaram taluk one tank breached and another is in a dangerous condition. The drinking water trouble is not at an end. The rains have improved the available supplies, but the difficulty is still considerable in parts which further showers alone can remedy. Water is still to be found at a very low depth in wells and springs, and steps are being taken in parts of Gooty, Tadpatri, Anantapur, Dharmavaram and Madakasira, where want is felt, to deepen the existing wells at Provincial cost for the benefit of the Panchamas and other lower orders.

There is some water in tanks and kuntas in several parts of the district available for irrigation but the supplies are too short to induce wet cultivation to any appreciable extent. In Dharmavaram, the full supply to some of the tanks will give a start to the mungari wet cultivation. The Hagari and the Penner brought down slight freshes which have augmented the supply in the river-fed nalas.

Agricultural operations and condition of the standing crops.—Ploughing has been general in the district and sowing has begun in many tracts, mostly of gingelly and castor, and occasionally cholam and sajja (cumbu) in Gooty and Kalyandrug. Ragi and korra are also being sown and transplanted under wells and nalas. Agricultural operations are not yet brisk however, more rain and more money are urgently needed ere they will be in full swing.

Standing crops, ragi, cholam, korra and sugarcane under wells and springs, though not extensive, are in a thriving condition.

All harvest operations are over except in an occasional tank-bed, but the outturn of late cholam in these is reported to be bad.

Supply of fodder and pasture and condition of cattle.—Pasture nil. It is just beginning to sprout. Its growth will be hastened by the rain of last night and the drizzle and shower that have fallen this morning as I am writing this narrative. Fodder is, as usual, dear and scarce. The import of fodder into Tadpatri has saved many valuable cattle. The local demand for fodder is daily increasing. I have bought a second weighing machine to enable the sales to proceed more rapidly. The price of fodder has been raised to Rs. 17-8-0, and this unexpected rise has proved too much for the means of some intending purchasers who went home again with empty carts. Similar depôts have been opened in Guntakal and Dharmavaram. I have extended the period during which free grazing in the reserves is permitted to the

1st August 1897. There need be no anxiety about cattle thereafter if the rains continue. The condition of cattle is still critical. They are still deteriorating in many places, especially in the black cotton-soil tracts. Prospects, however, are not so gloomy. If the showers continue—and there is every indication of the coming monsoon—the hills will ere long be clothed with verdure, and grass and pasture in the plains will soon spring up.

FOOD SUPPLIES AND THE STATE OF THE MARKETS.

PRICES of principal food-grains at principal markets in the affected tracts, in seers of 80 tolahe per rupee, for the period ending 15th of June 1897.

Activity of trade.—Private trade is brisk in Tadpatri and Hindupur and fairly brisk in Penukonda and Dharmavaram. Cholam is being exported from the two latter taluks to Bellary and other places. Ragi is being imported into Dharmavaram from the Mysore province and rice into Tadpatri from Guntur, Salem, Coimbatore, &c., and cholam from Nellore and Venkatagiri.

CONDITION OF THE PEOPLE.

(1) **On works.**—Generally fair in the Gooty division and good in other places. There are still many cases of guineaworm on the Gudur work (Tadpatri). There are weakly workers still on every work in this taluk, especially among the children. This is due probably to the trying heat of May, but the change in the weather will probably bring on improvement.

(2) **In villages.**—Generally good. About 6,200 men are employed on loan works in the district. The Deputy Collector, Gooty, mentions in his report that some needy weavers of Uravakonda have come on the relief works, and I am making further inquiries as to why the weavers here have chosen this less congenial field for their livelihood. My visit to Damaketepalli work showed me that there were none on the work who could support themselves otherwise. Many of them had husbands who were doing odd jobs, but did not earn enough to keep their wives and children as well as themselves. Further a field in Budali firka, good rains have fallen and the people can get work for the present at least.

Sickness and mortality.—Fever and small-pox in Penukonda and Hindupur. About 83 attacks and 5 deaths in the latter taluk. A case of suspected cholera was reported by the overseer of Pennér relief work in Tadpatri which on investigation proved to be a severe attack of indigestion consequent upon an unexplained and unnecessary meal of raw ragi. Necessary arrangements for keeping the water-supply free from pollution have also been effected. The District Surgeon has informed me that he has received notice of the posting of one or two medical sub-ordinates to this district some ten days or more ago. They have not yet arrived. I would submit that it might be suggested to the Surgeon-General that it does not seem sufficient to post men to this district; it is also necessary to send them. It was because of these repeated delays that I addressed Government above his head in the

matter of the Plague Hospital Assistants. One thing appears certain, which is, that the rate of pay offered is not high enough. The services of medical officers with 3 or 4 works under them would be cheap at Rs. 100.

Remarks.—Nil.

MEASURES OF RELIEF.

Works.—In what taluks open and comparison of numbers:—

Taluku.	Number employed		Remarks.
	Last fortnight.	This fortnight.	
Tadpatri	14,912	15,450	Test work. Do. Do. (Last week 49,339.) It is difficult to say whether the fall in numbers is nearly wholly due to the moharam or partially to the rains. I am making enquiries.

General remarks.—Prospects are more hopeful. There are indications of a favourable turn in the weather which is just now monsoonish. But unless a good deal more rain falls soon, what has already fallen will not do much good. There is a decrease of 7,647 coolies on the works as compared with the attendance during the previous week and 665 as compared with the previous fortnight. This is attributable partly to the rains and partly to the "Mohurram" which is a feast with the Hindus as well as the Muhammadans. Two additional works were started during the fortnight—one in Dharmavaram and the other in Anantapur. This makes a total of 37 works in progress. Arrangements have been made to open more works in Gooty, Tadpatri, Dharmavaram and Penukonda taluks, but I am waiting to see the result of the monsoon. In re the condition of the Budili firka of the Hindupur taluk there has been good rain in those parts, and my enquiries show that no works need be opened as yet.

The Surgeon-General to the Government of Madras is apparently somewhat wroth at what he calls "direct intercommunication" with the executive officers of the department. I am quite in accord with him as to the unusual course I took in addressing Government direct for the transfer of the Plague hospital assistants, but the delay in the arrival of men posted to this district by the Surgeon-General left me no option in the matter. Of the two hospital assistants ordered to this district on 27th April 1897—one joined on 22nd May 1897 and was then taken away and posted to Bellary. The other has not joined at all. A third posted on the 3rd May, joined on the 28th idem. A fourth deputed on 18th May has not yet turned up. Under these circumstances I think, perhaps, even the Honourable Mr. James has come and gone. I have some excuse for my action. The Honourable Mr. James has come and gone. I am very doubtful whether his visit will do us much good. It seems he has only 16 lakhs to divide between Madras and Bombay—a sum which would only just suffice for the Deccan districts of this Presidency. I gave him all the information in my power, but if he has not the funds, he cannot give them.

Resolution—dated 23rd June 1897, No. 461.

Submitted for the information of Government.

2. The rainfall during the fortnight under report was good. The supplies of drinking-water were much improved, but difficulties are still felt in parts. Tanks received small supplies, but they are insufficient to encourage wet cultivation to any considerable extent. Preparations were being made on dry lands for the next crop, but sowings will not be extensive unless further rain falls shortly.

3. Pasture was *nil*, though there are hopes of some in the near future. Fodder was dear and scarce. The price of imported fodder was increased owing to the brisk demand, and it appears from the daily reports that ryots willingly pay the enhanced price.

4. Prices were slightly easier, except in the case of cholam. Their comparative position is shown by the following figures:—

Rate.	Measures for a rupee.		
	Rice.	Ragi.	Cholam (mixed).
Normal ..	13.2	32.0	30.0
Warning ..	10.6	24.0	22.5
Scarcity ..	7.9	16.0	15.0
Current ..	9.1	16.6	12.9
June 1892 ..	9.1	16.0	15.7
June 1877 ..	6.7	7.3	7.2

Trade was fairly brisk.

5. The condition of the people was generally good, except in the Gooty division where it was fair. The numbers on relief works, which at the middle of the fortnight showed a considerable increase, fell off by the end of the period under report by 665 or by about $1\frac{1}{2}$ per cent. The Collector is uncertain whether this was due to the rain or to the Mohurram. The only noticeable decrease was in Dharmavaram—35 per cent.; and as it was in this area that the rainfall was best, the more probable cause seems to be the improvement of the season. The numbers on gratuitous relief in villages increased by about 2,700; but this was the result of the extension of the administration of gratuitous relief in villages to the Dharmavaram taluk.

6. The progress in the disposal of applications for loans is shown by the following figures:—

Week ending—	RS.
May 29th	1,75,133
June 5th	1,81,573
Do. 12th	1,94,351
Do. 19th	2,07,194

Applications for 4 lakhs still remains to be disposed of. The arrears will not be overtaken unless the price is increased. Much remains to be done in Gooty.
