AUGUST.

Fortnightly narrative.—Submitting to Government, with remarks, — of the Ganjám district for the period ending 15th July 1897.

PROCEEDINGS OF THE BOARD OF REVENUE
(REVENUE SETTLEMENT, LAND RECORDS AND AGRICULTURE).

READ—the following Fortnightly Narrative for the Ganjam District during the period ending 15th of July 1897:—

STATE OF THE COUNTRY.

Rainfall and Water-supply.—

District rainfall.	Actual rainfall.	Expected rainfall.
INCHES.	INCHES.	INCHES.
In the fortnight	2.48	3.63
Up to the fortnight from April	9.05	11.40

During the latter half of the fortnight, there was rain more or less throughout the District. Tanks and wells received a moderate supply of water. There were also slight river freshes. There is no anxiety for water for drinking purposes at present. Pits are being dug in tank and river-beds for water where necessary. The amount spent for the improvement of drinking water-supply during the fortnight was Rs. 1,425. More rain was wanted for agricultural operations at the close of the fortnight, but has subsequently fallen.

Agricultural operations and condition of the standing crops.—Ploughing and sowing generally, and transplantation of ragi in parts are still in progress throughout the District. Paddy, ragi, gingelly, sugarcane are thriving at present, except in Aska, where the first three crops are reported to have been affected by insects. The Headquarters Deputy Collector reports that a peculiar kind of caterpillar caused considerable damage to the ragi plants in his Division, but after the rains the pest has disappeared. The Senior Assistant Collector also reports that gingelly in some parts of the Pedda Kimedi estate was attacked by insects. In Tekkali summer ragi under wells and tanks has been reaped with a fair outturn. Rain-fed paddy in Berhampur, Aska and Purushottapur is thriving, having revived under the influence of the recent rains.

Supply of fodder and pasture and condition of cattle.—Fodder is available, but dear. Pasture is generally available. Condition of cattle is generally good, but cattle diseases exist in some villages of Goomsur and Chicacole taluks.

General remarks on the previous subjects.—The rain during the fortnight has proved very beneficial for the standing crops and seed-beds of paddy and ragi, which would have withered away had the rain held off a few days longer. The state of the season seems encouraging at present.

FOOD SUPPLIES AND THE STATE OF THE MARKETS.

PRICES of principal food-grains at principal markets in the affected tracts, in seers of 80 tolas per rupee, for the period ending 10th of July 1897.

Aska	10.20	10.88	9.78	10.68	10.32	9.97	9.40	14.83
Purushottapur	10.50	12.50	10.50	12.50	11.50	11.50	10.00	16.00
Chatrapur	8.50	10.00	8.50	10.50	10.50	10.00	10.50	17.00
Berhampur	9.00	10.50	8.50	10.00	10.20	11.05	10.00	17.50
Ichchhapuram	9.00	9.00	8.50	9.00	9.90	9.90	9.00	16.00
Sompeta	9.07	..	8.25	..	10.46	9.45	10.80	17.60
Parlakimedi	7.50	8.62	7.50	8.25	10.69	10.40	10.50	19.50
Tekkali	8.50	..	7.55	..	10.70	11.00	9.50	17.00
Narasannapeta	9.37	..	9.00	..	12.35	10.40	11.50	21.00
Chicacole	7.68	..	7.68	..	11.08	10.65	10.50	20.00
Total	109.53	83.06	104.51	81.75	131.26	126.54	121.70	205.18
Average	9.13	10.33	8.71	10.22	10.94	10.55	10.14	17.10

REMARKS.—The rise in the price of raw rice at Russellkonda, Surada, Aska, Berhampur, Ichchhapuram, Sompeta, Tekkali, and Narasannapeta and of ragi at Russellkonda, Surada, Aska, Chatrapur, Parlakimedi, Narasannapeta, and Chicacole is probably due to want of supply in the local markets. The considerable demand for ragi in connection with relief operations partly accounts for the rise in the price of that article.

Activity of Trade.—Trade within the District is reported to be slack. The Goomsur Deputy Collector reports that about 132 cart-loads of paddy have been imported from Nyaghur, but these imports are now stopped by the rains. The headquarters Deputy Collector reports that imports from Orissa still continue, but to a limited extent owing to the prevalence of cholera at Rambha.

Exports and imports of food-grains by rail and by sea are as follows:—

	Exports.	Imports.
	MDS.	MDS.
By rail	4,731	7,070
By sea	2,858	8,406

The exports consist of rice and imports of ragi.

CONDITION OF THE PEOPLE.

On works.—Condition of people on works is generally good except on a few works. The worst at Jchomi and Batkumaradu.

In villages.—The condition of the cultivating and upper classes is generally good except in Tekkali, where ryots are greatly reduced, and Parlakimedi, where the Savaraks are emaciated and distress extending to other classes. The test and relief works already opened have afforded ample employment to labourers in their vicinity, but, for want of overseers, it has not been possible to open many desirable works. Grain-doles are being distributed on a large scale to the helpless poor, but greater supervision is required over the circle inspectors. Three taluk relief officers have now been sanctioned; a fourth is required.

The following remittances are reported from emigrants to Burma, through the Post-offices noted below:—

	RS.
1. Kasibugga	4,424
2. Kotabommali	834
3. Tekkali	1,050
4. Jalumr	113
5. Nanpada	2,781
Total	9,202

Sickness and Mortality.—One death from starvation in Tekkali taluk was reported to me in the early part of the fortnight. I fear that a considerable number of deaths, if not directly, are indirectly due to want of food. Enquiries are being made. Fever, small-pox and cholera are generally prevalent. Cholera is still severe:—

	Cholera deaths.
Goomsur Division	94
Head-quarters Deputy Collector's Division	374
Berhampur Division	382
Chicacole Division	801
Total ...	1,651

Remarks.—The following kitchens and works have been opened during the fortnight:—

	Kitchens.	Works.
Tekkali taluk.	Nandigama. Naupada.	1. Special repairs to Tekkali and Anantagiri road. 2. Construction of a feeder road to Kosabommali station.
Parlakimedi taluk.	Kaviti. Karasavada. Uppalada. Garabanda.	3. Bandivant tank. 4. Gravel quarry at Khojiria. 5. Kanchili quarry. 6. Mavidipally quarry. 7. Chodialanji. 8. Ankoli.

* This includes 247 dependants of weavers.

Private charity.—There is no organized private charity at work. The zemindar of Kallikot and Atagada continues to keep his kitchen at Haradamuli, but many undeserving persons are fed there, and he has also opened some irrigation works in Atagada to afford relief to the poor. The Famine Charitable Relief Committee is giving money-doles and also making advances for seed-grain. The General Deputy Collector, Goomsur, reports that some gentlemen at Aska are feeding some forty to fifty persons a day. The zemindar of Chinna Kimedi continues to feed at his temples and mutts 112 persons daily. The Raja of Parlákimedi has been assisting the poor by opening works in his estate. Total number of persons on his works was 8,634.

GENERAL REMARKS.

It has been found necessary, in consequence of drought between 21st June and 7th July and the continued rise in prices, to increase the number of circle inspectors, especially in Parlákiniedi. Hence the increase in the number in receipt of gratuitous relief. These numbers will probably continue to increase for another fortnight until transplantation is general, when the turning point may be looked for. More works would have been opened and the numbers on gratuitous relief thereby reduced, had the subordinate staff sufficed. Now that good rain has fallen generally, I am doubtful about the utility of opening further works, especially as the difficulty in regard to paymasters becomes intensified from day to day.

The demand for agricultural labour is likely to be considerably restricted this year, as the ryots and their families will themselves do as much work as possible without employing hired labour. Agricultural labourers are generally paid in grain, but this will not be possible this year, and in consequence they will not leave relief works as rapidly as if grain wages were paid. Notwithstanding the favourable prospects, especially in the north of the District, prices continue to rise.

Transactions under the Land Improvement and Agriculturists' Loans Acts.

[illegible]

INSPECTIONS OF THE DISTRICT OFFICERS.

Taluk and places visited.—The General Deputy Collector, Goomsur, has visited 66 villages and the Head-quarters Deputy Collector 38 villages in their divisions. The Principal Assistant Collector could not travel during the fortnight owing to a severe attack of fever. Mr. Willimott has now recovered and will tour during the next fortnight. Mr. Ashe, Assistant Collector, has been on tour in the Berhampur taluk. My own touring, owing to indisposition has been somewhat limited. The following places were visited by me:—

Naupada.	Berhampur—Ankoli quarry.
Sompéta—Kitchen weavers' depôts work.	Hinjili—Kitchen and work.
Ichchhapuram—Kitchen weavers' depôts work.	Aska—Kitchen and weavers' depôt.
	Boirani—Kitchen and works.

RESOLUTION—No. 550, dated 4th August 1897.

Submitted for the information of Government.

2. Rain, which held off at the commencement of the fortnight, began to fall towards its close, the fall, though below the average, being good and useful.

Since the report was written, further rain has fallen as noted below:—

Station.	Up to 26th.	Station.	Up to 26th.
	INCHES.		INCHES.
Balliguda	3.40	Gopalpur	2.06
Russelkonda	1.50	Berhampur	5.27
Surada	3.06	Iskapur	1.60
Aska	5.57	Sompét	2.11
Udayagiri	1.80	Pundi	0.30
Ramagiri	8.38	Tekkali	1.60
Parlakimedi	4.70	Narasannapet	0.10
Rambha	1.40	Calingapatam	0.10
Purushottapur	4.30	Chicacole	0.20
Chatrapur	2.36		
		District Average	2.62

The position, which had commenced to be improved as soon as the rain fell, has now changed very much for the better; the standing crops, which would have withered away without rain, have revived; wells have received supplies, and pasture will soon be renewed.

3. Prices, however, still continued to rise, due partly to the demand created by the extension of gratuitous relief, and partly to the falling off in import due to the rain and the prevalence of cholera.

The comparative position of prices is shown by the following figures:—

Rate.	Measures for a rupee.	
	Rice.	Ragi.
Normal	17.0	30.0
Warning	13.6	22.5
Scarcity	10.2	15.0
Current	9.5	10.5
July 1889	10.3	16.3
July 1878	8.2	11.0

4. The condition of the people is reported to have been generally good; but signs of distress were visible at some of the works in the north, and among the ryots of Tekkali and Parlakimedi. However, Mr. Taylor, the Agent of the Parlakimedi zemindar, reports that a very fair ragi crop has been harvested in the estate and that the conditions are very favourable for a good harvest for the crops now on the ground.

The numbers on work increased by nearly 4 per cent., while those on gratuitous relief nearly doubled. Explanation for the sudden increase in those relieved in villages in Berhampur taluk should be submitted. Orders on the subject of relief have been communicated to the Collector by Government in its telegrams of 23rd and 24th July. The Collector will do his best to contract the number of works as far as possible; they will have to remain open for a considerable time longer owing to the reduced demand for agricultural labour that is likely to be experienced this year; the more stringent condition of relief now adopted will, however, reduce any attractions that relief works may have had in the past.

5. Cholera has been severe in the district for some time past and shows but little sign of abating. The following figures give the number of deaths reported since January, 1st 1897:—

Period.	Number of deaths.
January	351
February	302
March	254
April	381
May	1,236
June	4,116
July (up to 15th)	2,506

If the outbreak persists, the Collector should telegraph to the Sanitary Commissioner for some of the newly-trained Sanitary Inspectors, and, with reference to G.O., No. 540, dated 7th July 1897, should ask the Famine Commissioner for sanction for such staff as he may require to combat the disease on works. The Famine Commissioner has recently had the advantage of seeing these Sanitary Inspectors at work in Kurnool, and was agreeably surprised at the excellent organization introduced. It is plain that these measures are no more sanitary fad, but truest practical measures, intelligently carried out. The Famine Commissioner only hopes that the Inspectors whom he saw at Kurnool are fair samples of the whole forty recently turned out.

6. The progress made in the disbursement of loans is shown by the following figures:—

Up to end of week ending.		Loans disbursed.
		RS.
June	19th	21,974
	26th	25,439
	3rd	30,209
July	10th	34,994
	17th	41,189

The work turned out under this head is quite insufficient to keep pace with requirements.

REVENUE DEPARTMENT.

Read—the following Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), No. 550, dated 4th August 1897 :—

Read—the following Fortnightly Narrative for the Ganjam District during the period ending 15th of July 1897 :—

STATE OF THE COUNTRY.

Rainfall and Water-supply.—

District rainfall.	Actual rainfall.	Expected rainfall.
	INCHES.	INCHES.
In the fortnight	2.48	3.63
Up to the fortnight from April	9.05	11.40

During the latter half of the fortnight, there was rain more or less throughout the District. Tanks and wells received a moderate supply of water. There were also slight river freshes. There is no anxiety for water for drinking purposes at present. Pits are being dug in tank and river-beds for water where necessary. The amount spent for the improvement of drinking water-supply during the fortnight was Rs. 1,425. More rain was wanted for agricultural operations at the close of the fortnight, but has subsequently fallen.

Agricultural operations and condition of the standing crops.—Ploughing and sowing generally, and transplantation of ragi in parts are still in progress throughout the District. Paddy, ragi, gingelly, sugarcane are thriving at present, except in Aska, where the first three crops are reported to have been affected by insects. The Headquarters Deputy Collector reports that a peculiar kind of caterpillar caused considerable damage to the ragi plants in his Division, but after the rains the pest has disappeared. The Senior Assistant Collector also reports that gingelly in some parts of the Pedda Kimedi estate was attacked by insects. In Tekkali summer ragi under wells and tanks has been reaped with a fair outturn. Rain-fed paddy in Berhampur, Aska and Purushottapur is thriving, having revived under the influence of the recent rains.

Supply of fodder and pasture and condition of cattle.—Fodder is available, but dear. Pasture is generally available. Condition of cattle is generally good, but cattle diseases exist in some villages of Goomsur and Chicacole taluks.

General remarks on the previous subjects.—The rain during the fortnight has proved very beneficial for the standing crops and seed-beds of paddy and ragi, which would have withered away had the rain held off a few days longer. The state of the season seems encouraging at present.

Average	9.13	10.38	8.71	10.22	10.94	10.55	10.14	17.10

REMARKS.—The rise in the price of raw rice at Russellkondá, Suradá, Aska, Berhampur, Ichchhapuram, Sampeta, Tekkali, and Narasannapeta and of ragi at Russellkondá, Suradá, Aska, Chatrapur, Parlakimedi, Narasannapeta, and Chicacole is probably due to want of supply in the local markets. The considerable demand for ragi in connection with relief operations partly accounts for the rise in the price of that article.

Activity of Trade.—Trade within the District is reported to be slack. The Goomsur Deputy Collector reports that about 132 cart-loads of paddy have been imported from Nyaghur, but these imports are now stopped by the rains. The headquarters Deputy Collector reports that imports from Orissa still continue, but to a limited extent owing to the prevalence of cholera at Rambha.

Exports and imports of food-grains by rail and by sea are as follows :—

	Exports.	Imports.
	MDS.	MDS.
By rail	4,731	7,070
By sea	2,858	3,406

The exports consist of rice and imports of ragi.

CONDITION OF THE PEOPLE.

On works.—Condition of people on works is generally good except on a few works. The worst at Jchomi and Batkumaradu.

In villages.—The condition of the cultivating and upper classes is generally good except in Tekkali, where ryots are greatly reduced, and Parlakimedi, where the Savaraks are emaciated and distress extending to other classes. The test and relief works already opened have afforded ample employment to labourers in their vicinity, but, for want of overseers, it has not been possible to open many desirable works. Grain-doles are being distributed on a large scale to the helpless poor, but greater supervision is required over the circle inspectors. Three taluk-relief officers have now been sanctioned; a fourth is required.

The following remittances are reported from emigrants to Burma, through the Post-offices noted below :—

	RS.
1. Kasibugga	4,424
2. Kotabommali	834
3. Tekkali	1,050
4. Jalumur	113
5. Naupada	2,781
Total	9,202

Sickness and Mortality.—One death from starvation in Tekkali taluk was reported to me in the early part of the fortnight. I fear that a considerable number of deaths, if not directly, are indirectly due to want of food. Enquiries are being made. Fever, small-pox and cholera are generally prevalent. Cholera is still severe:—

	Cholera deaths.
Goomsur Division	94
Head-quarters Deputy Collector's Division	374
Berhampur Division	382
Chicacole Division	801
Total ...	1,651

Remarks.—The following kitchens and works have been opened during the fortnight:—

Kitchens.	Works.
Tekkali taluk. { Nandigama.	1. Special repairs to Tekkali and Anantagiri road.
{ Naupada.	2. Construction of a feeder road to Kosabommali station.
Parlakimedi taluk. { Kaviti.	3. Bandivant tank.
{ Karasavada.	4. Gravel quarry at Khojiria.
{ Uppalada.	5. Kanchili quarry.
{ Garabanda.	6. Mavidipally quarry.
	7. Chodialanji.
	8. Ankoli.

† The Tahsildar of Berhampur has been called upon to explain the enormous increase in the number under this head of relief.

* This includes 247 dependants of weavers.

GENERAL REMARKS.

The demand for agricultural labour is likely to be considerably restricted this year, as the ryots and their families will themselves do as much work as possible without employing hired labour. Agricultural labourers are generally paid in grain, but this will not be possible this year, and in consequence they will not leave relief works as rapidly as if grain wages were paid. Notwithstanding the favourable prospects, especially in the north of the District, prices continue to rise.

[illegible]

INSPECTIONS OF THE DISTRICT OFFICERS.

Taluk and places visited.—The General Deputy Collector, Goomsur, has visited 56 villages and the Head-quarters Deputy Collector 38 villages in their divisions. The Principal Assistant Collector could not travel during the fortnight owing to a severe attack of fever. Mr. Willimott has now recovered and will tour during the next fortnight. Mr. Ashe, Assistant Collector, has been on tour in the Berhampur taluk. My own touring, owing to indisposition has been somewhat limited. The following places were visited by me:—

Naupada.	Berhampur—Ankoli quarry.
Sompéta—Kitchen weavers' depôts work.	Hinjili—Kitchen and work.
Ichchhápúram—Kitchen weavers' depôts work.	Aska—Kitchen and weavers' depôt.
	Boirani—Kitchen and works.

Resolution—No. 550, dated 4th August 1897.

Submitted for the information of Government.

2. Rain, which held off at the commencement of the fortnight, began to fall towards its close, the fall, though below the average, being good and useful.

Since the report was written, further rain has fallen as noted below:—

Station.	Up to 26th.	Station.	Up to 26th.
	INCHES.		INCHES.
Balliguda	3.40	Gopalpur	2.06
Russellkondá	1.50	Berhampur	5.27
Surada	3.06	Iskapur	1.60
Aska	5.57	Sompéta	2.11
Udayagiri	1.80	Pandi	0.30
Ramagiri	8.38	Tekkali	1.60
Parlákimedi	4.70	Narasannapéta	0.10
Rambha	1.40	Calingapatam	0.10
Purushottapur	4.30	Chicacole	0.20
Chatrapur	2.36		
		District Average ...	2.62

The position, which had commenced to be improved as soon as the rain fell, has now changed very much for the better; the standing crops, which would have withered away without rain, have revived; wells have received supplies, and pasture will soon be renewed.

3. Prices, however, still continued to rise, due partly to the demand created by the extension of gratuitous relief, and partly to the falling off in import due to the rain and the prevalence of cholera.

The comparative position of prices is shown by the following figures:—

Rate.	Measures for a rupee.	
	Rice.	Ragi.
Normal	17.0	30.0
Warning	13.6	22.5
Scarcity	10.2	15.0
Current	9.5	10.5
July 1889	10.3	16.3
July 1878	8.2	11.0

4. The condition of the people is reported to have been generally good; but signs of distress were visible at some of the works in the north, and among the ryots of Tekkali and Parlákimedi. However, Mr. Taylor, the Agent of the Parlákimedi

zemindar, reports that a very fair ragi crop has been harvested in the estate and that the conditions are very favourable for a good harvest for the crops now on the ground.

The numbers on work increased by nearly 4 per cent., while those on gratuitous relief nearly doubled. Explanation for the sudden increase in those relieved in villages in Berhampur taluk should be submitted. Orders on the subject of relief have been communicated to the Collector by Government in its telegrams of 23rd and 24th July. The Collector will do his best to contract the number of works as far as possible; they will have to remain open for a considerable time longer owing to the reduced demand for agricultural labour that is likely to be experienced this year; the more stringent condition of relief now adopted will, however, reduce any attractions that relief works may have had in the past.

5. Cholera has been severe in the district for some time past and shows but little sign of abating. The following figures give the number of deaths reported since January, 1st 1897:—

Period.	Number of deaths.
January	351
February	302
March	254
April	381
May	1,236
June	4,116
July (up to 15th)	2,506

If the outbreak persists, the Collector should telegraph to the Sanitary Commissioner for some of the newly-trained Sanitary Inspectors, and, with reference to G.O., No. 540, dated 7th July 1897, should ask the Famine Commissioner for sanction for such staff as he may require to combat the disease on works. The Famine Commissioner has recently had the advantage of seeing these Sanitary Inspectors at work in Kurnool, and was agreeably surprised at the excellent organization introduced. It is plain that these measures are no more sanitary fad, but honest practical measures, intelligently carried out. The Famine Commissioner only hopes that the Inspectors whom he saw at Kurnool are fair samples of the whole forty recently turned out.

6. The progress made in the disbursement of loans is shown by the following figures:—

Up to end of week ending.		Loans disbursed.
		Rs.
June	19th	21,974
	26th	25,439
	3rd	30,209
July	10th	34,994
	17th	41,189

The work turned out under this head is quite insufficient to keep pace with requirements.
