PROCEEDINGS OF THE BOARD OF REVENUE (REVENUE SETTLEMENT, LAND RECORDS AND AGRICULTURE).

W. J. H. LEFANT, Esq.
(Famine Commissioner).

READ—the following Fortnightly Narrative of the Kurnool district for the period ending 15th of October 1897:—

STATE OF THE COUNTRY.

Rainfall and water-supply.—

Rainfall during the period	INCHES.
Do. up to the period from 1st April 1897	3.22
Average rainfall expected during the period	23.73
Do. rainfall expected up to the period	1.78
	21.53

The rain continued to be general throughout the district, and the quantity registered at the various rain-recording stations was as shown below:—

Affected tracts—

Stations.	Fall in inches
Pyapalli	6.72
Allagadda	5.41
Koilkuntla	5.12
Pattikonda	3.38
Owk	3.23
Nandyal	2.84
Kurnool town	2.41
Kalwa	1.33
Unaffected tracts—	
Markapur	3.72
Atmakur	2.21
Giddalur	1.57
Nandikotkur	0.56

There has been more than enough rain throughout the affected area, except in the villages of the Owk firkha bordering on the Cuddapah and Anantapur districts, and the total fall was above the average for the corresponding period of the previous five years.

Water-supply.—Except under a few tanks in the Sirvel and Markapur taluks, the supply was sufficient for irrigation purposes. The supply for drinking purposes was, of course, ample everywhere. Almost all the tanks have received good supplies.

Agricultural operations and condition of the standing crops—Eastern Section.—In the Cumbum taluk, cumbu, jonna and korra were being harvested with a good outturn. In the Markapur taluk sowing of variga and horsegram commenced in parts, and the transplantation of paddy and weeding were going on under many tanks. Cumbu and korra were harvested with a good outturn. The standing crops are in good condition, though the late cholam and cumbu have been slightly damaged in parts on account of excessive rain. **North Central Section.**—White cholam and horsegram were being sown, and the standing crops are in good condition. **South Central Section.**—White cholam, cotton and horsegram were sown in parts of Owk and Kalwa

divisions, and in the Sirvel taluk. Weeding and transplanting of paddy in canal and tank-fed lands were the chief agricultural operations. Indigo, early cholam, korra and cumbu were harvested with a fair outturn. The standing crops are in good condition, but, in the northern portion of the Kalwa division, cholam and korra are said to have been attacked by insects due to excessive rain, and are not expected to yield well. **Western Section.**—Sowing late crops on black soils continued, and weeding was carried on everywhere. Korra and cumbu were being harvested. The standing crops are in good condition.

Supply of fodder and pasture, and condition of cattle.—Fodder was scarce generally throughout the district, though the supply was increased to a certain extent by the recent harvests. Pasture has been abundant everywhere for sometime, and the condition of cattle in the affected tracts has thereby greatly improved. Rinderpest unfortunately still continued to prevail, especially in the Sirvel and Cumbum taluks, and caused many deaths.

General remarks on the previous subjects.—The rain that fell during the early part of the fortnight was generally in excess of requirements, and in consequence the standing crops which had come to maturity suffered to some extent. Harvesting operations too were retarded by the incessant rain. There has, however, been a most welcome break in the rain of late.

FOOD SUPPLIES AND THE STATE OF THE MARKETS.

PRICES of principal food-grains at principal markets in the affected tracts, in seers of 80 tolas per rupee, for the period ending 15th of October 1897.

Activity of trade.—Trade was moderately active except in the North Central Section and in the Koilkuntla taluk of the South Central Section. The markets were well supplied.

CONDITION OF THE PEOPLE.

On Works.—The condition of the labourers on the several works was very fair. The comparatively large number on relief works in the Koilkuntla taluk in spite of the improvement in the season was due to the late commencement of agricultural operations.

In Villages.—The condition of the people in villages was generally fair; though cholera continued to prevail throughout the district, except in the Nandikotkur and Nandyal taluks, causing 385 deaths.

Sickness and Mortality.—Cholera, fever, diarrhoea and dysentery were the principal complaints. There were no deaths from starvation.

General Remarks.—Eight works were closed, and certain other works were amalgamated during the period. It is believed that, since its close, all the remaining works, but three central works, have been closed in accordance with my proposals approved of by the Commissioner. Demand for employment is now locally met in almost every part of the affected area, and the central works alluded to above will be closed by the end of the month.

General Remarks.—Eight works were closed, and certain other works were amalgamated during the period. It is believed that, since its close, all the remaining works, but three central works, have been closed in accordance with my proposals approved of by the Commissioner. Demand for employment is now locally met in almost every part of the affected area, and the central works alluded to above will be closed by the end of the month.
